

Tokinvest FZCO

Built Real Estate Economic Interest Token

Virtual Asset Whitepaper TVBREIBBWUK1

REGULATORY DISCLAIMER

VARA has not taken any steps to verify the information set out in this whitepaper, including its accuracy and completeness, and has no responsibility for any loss arising from reliance on it. The liability for the content of the whitepaper lies with the Issuer.

SECTION A: INFORMATION ABOUT THE ISSUER

A.1 Issuer Name, Legal Structure and Registered Address

Tokinvest FZCO is a company duly incorporated under the laws of the United Arab Emirates, and with its principal office at Unit No: UT-12-PO-8, DMCC Business Centre, Level No 12, Uptown Tower, Dubai, United Arab Emirates. ("**Tokinvest FZCO**").

A.2 Issuer Incorporation/Registration Date

Tokinvest FZCO is registered under DMCC license number DMCC-928046, with a date of incorporation of 10 May 2024.

A.3 Issuer Parent Company

Tokinvest FZCO is a wholly owned subsidiary of OREHC Holding Limited, a private company limited by shares incorporated on 13 February 2025 under company number 25680, with its registered office at Unit PC-1, Level 7, Al Maryah Tower, Abu Dhabi Global Market Square, Al Maryah Island, Abu Dhabi, United Arab Emirates. OREHC Holding Limited holds 100% of the issued share capital of Tokinvest FZCO.

A.4 Issuer Related Functions

Tokinvest FZCO functions:

- **Scott Thiel** (Chief Executive Officer)
Leads the company and sets strategic direction. Brings extensive expertise in tokenisation and aims to broaden access to previously exclusive asset classes.
- **Matt Blom** (Chief Strategy Officer)
Responsible for identifying market trends and product development. Brings deep market insight and forward-looking product strategy.
- **Robert Cooper** (Chief Operating Officer)
Oversees day-to-day operational efficiency and execution of strategic plans.
- **James Byrne** (Chief Technology Officer)
Manages the technology stack supporting issuance, custody, and lifecycle management of virtual assets.

Business Address:

Tokinvest FZCO, DMCC Crypto Centre, Office 8, Floor 12, Uptown Tower, Jumeirah Lake Towers, Dubai

A.5 Related Persons Legal Status

To the best of Tokinvest FZCO's knowledge and based on available information, no individual associated with the company has been convicted of any offence involving dishonesty, fraud, financial crime, or offences related to companies, banking, insolvency, money laundering, or insider trading.

Furthermore, no such individuals are currently subject to any ongoing criminal investigations or inquiries in any relevant jurisdiction.

A.6 Issuer Business Activity

Tokinvest FZCO is a Virtual Assets Regulatory Authority (VARA) licensed Broker-Dealer and Issuer (Licence No. VL/2024/12/004), authorised to provide services related to the design, structuring, issuance, placement, marketing, distribution, and over-the-counter (OTC) trading of Virtual Assets including ARVAs.

A.7 Issuer Financial Condition

Tokinvest FZCO holds a fixed amount of its own money in a specially designated 'capital lock-up' bank account, as required by VARA for broker-dealer and issuer licence holders. This money acts as a financial safeguard and must always remain in the account. It cannot be used for running the business, paying expenses, or any other day-to-day activity.

The bank account is legally ring-fenced, meaning the funds are kept completely separate from the company's operational accounts. Tokinvest FZCO is required to maintain this minimum balance at all times and regularly reports this to VARA. VARA can request proof at any time, and using or moving these funds without regulatory approval would be a breach of licence conditions. This ensures that investors know the company always holds a protected capital reserve as part of its regulatory obligations..

Since obtaining its licence, Tokinvest has maintained continuous compliance with VARA's capital adequacy and reserve requirements, with no material deterioration in its financial position. The company holds sufficient liquidity to meet all operational and regulatory obligations, and its regulatory capital consistently remains above VARA's prescribed minimum threshold.

Tokinvest submits monthly financial statements to VARA including balance sheet, income statement, and capital adequacy reports ensuring ongoing transparency and supervisory oversight. The company's accounts are also subject to annual audit by a UAE-registered audit firm, reaffirming its adherence to sound financial and governance standards.

A.8 Issuer Assessment

Tokinvest FZCO was incorporated in May 2024 and is registered within the Dubai Multi Commodities Centre (DMCC).

In its inaugural year, Tokinvest secured its VARA Broker-Dealer licence (VL/2024/12/004), affirming its regulatory standing. In September 2025, Tokinvest secured the first VARA multi asset and full market Issuance License (VL/2024/12/004). The company has quickly positioned itself as a key player in the UAE's tokenisation ecosystem, serving a growing client base interested in tokenising a range of assets including real estate, commodities, funds, alternative assets and fixed-income securities.

The BREI Token represents one of the Issuer's early offerings. As such, performance metrics are not yet available but will be developed and disclosed in accordance with regulatory guidelines following issuance.

A.9 Issuer Governance Framework

Given its fiduciary responsibility to shareholders, the Board is responsible for delivering efficient and effective corporate governance, through which Tokinvest strives to promote sustainable growth and maximise corporate value. After establishing the strategic direction of the Company, the Board shall use its supervisory function on general operations to ensure that these operations are fair and transparent. The Board shall also make decisions on the important business affairs of the Company, such as decisions on the formulation of management plans and business plans and decisions on investment projects that exceed a certain fixed amount of money.

The Board shall delegate responsibility for the conduct of other business affairs and decisions to other members of senior management, and the Board shall carry out the oversight of the performance of their duties.

The Board has established a framework of policies so that business affairs are efficiently conducted under suitable internal controls and shall put in place and monitor the use of a system to manage compliance and risks. The Board shall take the actions necessary to enable external Financial Auditors to fulfil their role.

The Tokinvest Board meets once a quarter to discuss the business updates for that quarter and vote upon anything that requires Board approval. There are three voting Board members and a majority vote is required. Tokinvest FZCO's Corporate Governance Policy sits across the top of all business activities and provides the governance framework to which the company operates. Diagram 1 below breaks down the Committees that oversee the various policies and processes that the company has in place.

The Tokinvest Board delegates power to a number of committees by formally assigning specific responsibilities and decision making authority to these groups, specially:

- Board of Directors
- Change Advisory Board (CAB)
- Compliance AML Oversight Committee
- Cyber Security Committee
- Listing Committee
- Nomination & Dismissal Committee
- Risk Committee
- Technology/Product Committee
- Vendor Control Function Committee

Diagram 1: Governance Structure

Tokinvest FZCO conducts due diligence on all counterparties with whom it works. All asset owners are subject to stringent checks ahead of commencing whitepaper completion which is subsequently submitted to VARA for approval once completed.

Tokinvest has in place a whitepaper review cycle to ensure all department heads have reviewed the issuance documentation; inclusive of risk, finance, technology and operations. Alongside the whitepaper, Tokinvest ensures that the following documentation is in order ahead of the business's Listing Committee reviewing and approving the new product:

- VARA's IDQ document
- Compliance Due Diligence report on the asset owner

- Broker Dealer Risk Disclosure Statement
- Issuer Disclosure Statement
- Broker Deal Declaration
- New Product Form which is part of Tokinvest's New Product Policy which governs the oversight of new products. The New Product Form is of critical importance as it is how the business conducts a risk assessment analysis for a given product, considerations are made for:
 - Strategic risk
 - Liquidity risk
 - Finance risk
 - Tax risk
 - Legal risk
 - Compliance risk
 - Credit risk
 - Market risk
 - Technology risk
 - Operational risk
 - Reputation risk

In order for a product to be approved for launch, the areas of risk listed above are analyzed against the business's Risk Management Policy criteria. They are then added to the New Product Form by the Product Owner ahead of review and approval by the following roles:

- Chief Executive Officer
- Chief Strategy Officer
- Chief Legal Officer (CEO currently fulfilling role)
- Chief Compliance Officer
- Chief Risk Officer
- Chief Operating Officer
- Chief Technology Officer

The voting mechanism requires all individuals to review and approve a product prior to release with final approval being held at one of three levels depending on the level of residual risk; low, medium and high as per the table below.

Residual Risk Level	Risk Committee	Executive Committee	Board Risk Committee
Low	Approve	Review	Review
Medium	Recommend for Approval	Approve	Review
High	Recommend for Approval	Recommended for Approval	Approve

A product with a high level of residual risk requires sign-off by the Tokinvest Board, a low residual risk product can be approved by the Risk Committee.

Compliance & Regulatory Considerations:

Tokinvest's AML/CFT Policy and Procedures, as approved by VARA during the licensing process, comprehensively address all applicable requirements for Customer Due Diligence (CDD), Know-Your-Customer (KYC), and ongoing monitoring.

Specifically:

- All participants/customers are subject to full identification and verification in accordance with VARA's Part III – Anti-Money Laundering and Combating the Financing of Terrorism Rulebook, the UAE Federal Decree-Law No. 20 of 2018, and Cabinet Decision No. 10 of 2019.
- The standards applied include risk-based CDD, verification of beneficial ownership for entities, sanctions screening, and ongoing transaction monitoring
- Enhanced due diligence measures are applied for higher-risk categories (e.g., PEPs, complex structures).
- Our AML/CFT controls are implemented through automated KYC onboarding, screening tools, and manual review by our appointed Money Laundering Reporting Officer (MLRO).

Governance & On-Chain Controls:

Tokinvest applies a structured governance and compliance framework designed to protect investors and ensure all BREI Tokens operate within a regulated, permissioned environment.

1. Board & Management Oversight

- Strategic decisions, product approvals, and risk governance are overseen by the Board of Directors of Tokinvest FZCO.
- Daily operations are managed by the CEO, Chief Strategy Officer, and relevant function heads.
- All key individuals are subject to regulatory fitness, propriety, and competence requirements.

2. Independent Compliance Function

- The Compliance Officer oversees adherence to VARA rules, customer due diligence, AML/CFT monitoring, and reporting obligations.
- Compliance is independent from commercial and operational teams.

3. Risk Management Framework

- Tokinvest maintains risk assessment procedures covering operational, market, liquidity, cyber, and smart-contract risks.
- These controls evolve as new products and on-chain modules are introduced.

4. Conflicts of Interest Management

- Conflicts are identified, monitored, and managed through clear policies covering disclosure, segregation of duties, and related-party interactions.
- Tokinvest does not act as principal or market maker unless explicitly disclosed to investors.

5. Internal Policies

- Tokinvest maintains internal AML/CFT Policies and Procedures, an Operational Risk Manual, and an Information Security Program.
- These are internal regulatory documents, but their existence and governance principles are disclosed for transparency.

6. Phased On-Chain Compliance and Governance Controls

Tokinvest will introduce on-chain controls in phases. These enhancements are designed to strengthen investor protection and ensure that BREI Tokens remain within a permissioned, compliant ecosystem.

Phase 1–2 (Current):

Off-chain KYC, AML/CFT screening, and eligibility checks before allowing any participation or trading.

Phase 3–4 (Future):

Introduction of on-chain compliance modules such as:

- Whitelisted/permissioned wallet restrictions
- Transfer-control logic
- Attestation-based access (e.g., investor category or eligibility flags)

These modules will be activated only after regulatory approval and external audit.

Phase 5 (Where Applicable):

- Optional governance functions (e.g., vote-escrowed rights or staking mechanisms) for products designed to include them.

All future on-chain modules will be implemented only after formal approval and testing to ensure alignment with VARA requirements. On-Chain Governance

A.10 ISSUER VIRTUAL ASSET ACTIVITIES

The BREI Token represents one of Tokinvest FZCO's Virtual Asset issuance products.

As a VARA-licensed broker-dealer and issuer, Tokinvest may conduct further issuances in the ordinary course of its regulated activities, subject to applicable regulatory approvals and compliance requirements.

A.11 ISSUER/DLT RELATIONSHIP

Tokinvest FZCO utilises the BSC distributed ledger technology (DLT) network for the issuance of this Virtual Asset.

There is no legal, financial, or operational affiliation between Tokinvest FZCO and the BSC protocol or its developers. The selection of the BSC network was made based on its technical characteristics and suitability for the product.

A.12 DETAILS OF ALL ENTITIES INVOLVED IN THE ISSUANCE

Tokinvest FZCO is the sole **Issuer** of the BREI Token described in this whitepaper. As a VARA-licensed broker-dealer and issuer (Licence No. VL/2024/12/004), Tokinvest FZCO is responsible for the design, structuring, issuance, distribution, and lifecycle management of the Virtual Asset.

Entities involved in the issuance are as follows:

- **Tokinvest FZCO** (Issuer & Licensed Distributor) – responsible for the issuance, marketing, distribution, custody arrangements (via outsourcing), and ongoing regulatory compliance. ("**Issuer**")
- **GHSW Holdings Limited (UK, Company No. 17001987)** – the registered legal owner of the reference property (the underlying real estate asset located in the Jewellery Quarter, Birmingham). This entity

has engaged with Tokinvest FZCO for the tokenisation of its asset but does not act as Issuer of the Virtual Asset. (“**Asset Owner**”)

- **Nurtured Homes West Midlands Limited (Registered Number: 16409128)** and **M.D.R Properties Limited t/a Martin & Co (Registered No: 07887348)**- independent, UK-licensed broker and property management businesses engaged as agents for letting, managing, and maintaining the reference property. (“**Property Manager**”)

No allocation of tokens at issuance will be made to any entity other than whitelisted investors who have completed AML/KYC checks.

SECTION B: INFORMATION ABOUT THE VIRTUAL ASSET

B.1 VA NAME AND ABBREVIATION

The name of the Virtual Asset is **Built Real Estate Token (TVBREIBBWUK1)**).

The abbreviation for this whitepaper is **BREI**.

Each BREI issuance carries a unique identifier that references the underlying Property. For this issuance, the token is designated the name given above.

The property referenced for this White Paper is the entirety of the Great Hampton Street Works, Jewellery Quarter, Birmingham (the “**Property**”), as recorded under UK Land Registry title number WM656558.

B.2 VA CHARACTERISTICS, FEATURES & USES

The BREI Token is an Asset-Referenced Virtual Asset (ARVA) representing the contractual economic rights associated with the Property as described in this Whitepaper (the “**Reference Asset**”).

Key characteristics include:

Economic Rights:

Tokenholders are entitled to a proportional share of:

- The net rental yield generated by the Property.
Distribution commences after the first month and accrues on a block-by-block basis, with token holders eligible to claim outstanding rental returns at any time, up to and including the corresponding block; and
- The net proceeds of any future sale of the Property, following deduction of agreed costs and fees as set out in this White Paper.

The timing and process of the Property sale is determined as set out in Appendix B of this White Paper.

Property Reference Structure:

- Each BREI Token corresponds to the economic rights associated with a specific Property, as constituted by the Reference Asset
- The Property referenced for this whitepaper is economic contractual rights relating to UK Land Registry title WM656558 (the “**Property**”)
- Tokens are semi-fungible: those linked to the same Property are interchangeable, but tokens linked to different properties are not.

- The Reference Asset for a BREI token cannot be changed under any circumstance.

Property Management:

Tokinvest has appointed the Property Manager to undertake the management of the Property Asset including the activities set out in Appendix A of this White Paper.

Property Rights Agreement

Tokinvest has entered into a contract with the Asset Owner pursuant to which it acquires the contractual economic rights associated with the Property, which constitute the Reference Asset referenced by the BREI Token.

No Ownership Rights:

Ownership of the BREI token does not confer legal or beneficial ownership of the Property. Instead, tokens represent contractual economic participation rights referenced to the Property, entitling tokenholders to distributions derived from the Reference Asset in accordance with this Whitepaper.

Governance & Voting:

Tokenholders have no governance rights in respect of the decisions over the management or sale of the Property. Authority of the Property sale and process for selling the Property is set out in Appendix B.

Trading & Liquidity:

BREI tokens can be traded on Tokinvest FZCO's secondary marketplaces and can be traded on regulated RWA platforms by whitelisted investors who have passed the required AML/KYC checks.

Use Case:

The BREI token provides investors with blockchain-based access to fractionalised real estate returns, combining rental yield with potential capital appreciation, underpinned by a regulated issuance framework.

B.3 PLANS FOR VA AND RELATED PROJECTS**Primary Issuance:**

Proceeds are applied to the acquisition, structuring, and management of the Property, including settlement of existing debt, payment of transaction costs, and preparation for rental.

Rental Yield Distribution:

Once purchased and let, the Property will generate rental yield distributions, net of management and operating costs, payable to tokenholders in proportion to their holdings.

Distribution commences after the first month and accrues on a block-by-block basis, with token holders eligible to claim outstanding rental returns at any time, up to and including the corresponding block.

Exit and Sale:

The decision making and sale process is set out in Appendix B. Where Tokinvest FZCO completes a sale process for the Property then the proceeds will be distributed to tokenholders.

B.4 VA TARGET MARKET

The BREI Token is designed for retail, qualified and institutional investors seeking fractionalised exposure to

the economic rights of residential property through a regulated, blockchain-based structure. Target investor categories include:

Professional and Institutional Investors: Asset managers, family offices, and private wealth managers seeking alternative asset exposure with yield and capital appreciation potential.

High Net Worth Individuals: Whitelisted investors seeking access to prime real estate opportunities without the requirement to directly purchase and manage property.

International Investors: Particularly those interested in diversifying into residential property markets while benefiting from a transparent, regulated virtual asset issuance framework.

Retail Investors: who are looking to get fractional exposure to the economic benefits of being a residential property landlord without having to acquire and manage an entire property.

Participation Requirements:

Access to the BREI Token is restricted exclusively to investors who have:

1. completed Tokinvest's full AML/KYC onboarding;
2. been reviewed and approved by Tokinvest; and
3. been added to the investor whitelist together with their verified wallet address.

Only investors satisfying *all* of the above conditions are eligible to subscribe for, hold, or transfer BREI Tokens. Investors must also meet a minimum subscription threshold of 1,000 tokens (AED 100,000 or currency equivalent).

The BREI Token is not available to:

- residents or citizens of the United States of America; or
- persons located in, or associated with, sanctioned or FATF high-risk jurisdictions.

B.5 VA TRADING PLATFORM AND RELATED PROCESSES

BREI Tokens are admitted to trading exclusively on the Tokinvest FZCO Investor Platform in the first instance, operated under Tokinvest's VARA-regulated Broker-Dealer licence (VL/2024/12/004).

Secondary-market functionality is expected to be available at or shortly after the Token Generation Event (TGE), enabling investors to buy and sell tokens through Tokinvest's regulated marketplace.

Future listings may occur only on other VARA-licensed RWA platforms that maintain equivalent compliance, KYC/AML, and settlement standards to Tokinvest and are approved by Tokinvest for interoperability and investor-protection purposes.

Only whitelisted investors who have completed full AML/KYC onboarding may access the marketplace. Access is provided via secure login to the Tokinvest Investor Platform web portal, where investors can view live order books, place buy/sell orders, and settle trades using pre-funded client-money accounts in AED or approved currency equivalents.

Access to the Tokinvest App and Investor Platform is available to fully onboarded and whitelisted investors irrespective of their travel location. Tokinvest does not apply geo-blocking to verified users, provided they are not residents of a sanctioned or FATF high-risk jurisdiction. Jurisdictional restrictions apply only at the onboarding stage.

Transfers occur as standard BEP-20-compliant blockchain transactions between verified wallets. A 0.25 % secondary-market transfer fee applies to both buyer and seller.

Brokerage, custody, and token-management fees are detailed in Section F.14; no other trading charges are levied by Tokinvest beyond those disclosed.

Custody and Cap-Table Management:

The CAP table denoting token ownership is maintained internally by Tokinvest.

Where an investor chooses to leave their Virtual Asset for custody on Tokinvest platform, there are no additional technical requirements to own or hold BREI Tokens beyond use of the Tokinvest Investor Platform. BREI Token Custody may remain with Tokinvest, be transferred to another regulated custodian or VASP providing incidental custodian services or be self custodied by the investor.

Primary Issuance Process

Subscription Period :

BREI Tokens are offered during an initial subscription period of up to 60 days on the Tokinvest platform (the “**initial Subscription Period**”). The initial Subscription Period commences on the date on which the first valid subscription for BREI Tokens is accepted by Tokinvest from a whitelisted investor. Making the offering available on the Tokinvest platform does not of itself commence the initial Subscription Period. Where the authorised Token Supply has not been fully issued at the close of the initial Subscription Period, Tokinvest may open no more than two subsequent Subscription Periods, each of up to 30 days. Each subsequent Subscription Period commences immediately on the close of the Subscription Period preceding it. The initial Subscription Period and any subsequent Subscription Periods are each a “Subscription Period” and run consecutively. No subscriptions may be accepted more than 120 days after the commencement of the initial Subscription Period.

Minimum Investor Subscription Amount:

Participation in the issuance is subject to a minimum subscription by each investor of 1,000 BREI Tokens, equivalent to AED 100,000 (or currency equivalent). (the “**Minimum Investor Subscription Amount**”)

Token Price:

Each BREI token has a face value of AED 100. For transparency, the GBP equivalent price is also displayed on the platform using prevailing exchange rates.

No Pre-Sales or Discounts

There are no pre-sales or discounted offers for BREI Tokens.

Investor Requirements:

Investors must complete Tokinvest’s onboarding process, including AML/KYC clearance.

Investors must pre-fund their client money account with sufficient cleared funds to cover their subscription and associated fees. Subscriptions are binding once made, and funds are debited immediately from the investor’s balance.

Token Generation Event (TGE)

The Token Generation Event (the “TGE”) occurs following the close of the first Subscription Period at which the Minimum Subscription Amount for the issuance has been achieved and all applicable verification and compliance checks have been completed. This may be the initial Subscription Period or, where the Minimum

Subscription Amount has not been achieved by the close of the initial Subscription Period, any subsequent Subscription Period up to and including the last.

Prior to the TGE, Tokinvest performs a formal reconciliation of all cleared investor funds held in its Client Money Account (CMA) and confirms that subscriptions received up to the close of that Subscription Period correspond to the approved issuance parameters.

This reconciliation and verification process is reviewed jointly by Tokinvest's Compliance and Operations teams to ensure that:

- all participating investors have successfully completed AML/KYC onboarding;
- all subscription funds have been fully cleared and correctly matched to investor accounts; and
- no outstanding eligibility, sanctions, or ownership restrictions apply.

Upon completion of these checks, Tokinvest authorises the TGE.

At the TGE:

- the maximum total Token Supply for the issuance is authorised and fixed by reference to the Property Price and the foreign exchange mechanics described in this Whitepaper;
- the Token Price and the fractional economic entitlement per Token are fixed; and
- no Tokens may be authorised in excess of the fixed total Token Supply.

The authorised Token Supply represents the maximum number of Tokens that may ever be issued for the relevant Property and cannot be increased.

Following the TGE, Tokens corresponding to subscriptions received up to and including the Subscription Period at which the TGE occurred are minted and credited to investor wallets within two (2) business days. Each issuance is recorded in Tokinvest's internal systems and reflected in the investor's Tokinvest platform dashboard.

Subsequent Subscription Periods

Where, at the close of the initial Subscription Period, the Minimum Subscription Amount has not been achieved or the authorised Token Supply has not been fully issued, Tokinvest may, in accordance with the issuance documentation and applicable disclosures, open no more than two subsequent Subscription Periods for the same issuance, each of up to 30 days.

Tokens issued in subsequent Subscription Periods:

- are minted at the same fixed Token Price;
- confer identical economic rights; and
- do not alter or dilute the economic position of existing Tokenholders.

No Tokens may be minted once the authorised Token Supply has been fully issued.

Unsuccessful Subscription

If the Minimum Subscription Amount is not achieved by the close of the final Subscription Period, being the

last subsequent Subscription Period opened or, where no subsequent Subscription Period is opened, the initial Subscription Period:

- no TGE occurs; and
- all subscription funds are returned to investors in full, without deduction, in accordance with Tokinvest's platform terms.

In such circumstances, the issuance does not proceed.

Secondary Market Trading:

BREI Tokens may subsequently be listed for resale on the Tokinvest secondary market.

Only whitelisted investors (AML/KYC cleared) are eligible to participate.

Trading is suspended once an Exit Property Valuation is set.

Settlement & Recordkeeping:

All transactions executed on Tokinvest Marketplaces follow an integrated settlement and confirmation process:

Automated Trade Confirmation - when a buy or sell order is matched and executed, Tokinvest's trading system automatically generates a transaction confirmation. This confirmation is sent to both buyer and seller via email immediately upon completion.

Dashboard Update - simultaneously, the investor's Tokinvest dashboard is updated in real time to reflect the new token or cash balance, with full transaction details (token quantity, price, timestamp, and counterparty).

Daily Reconciliation - Tokinvest's internal systems reconcile the platform order book, CAP table, and Client Money Account balances daily to ensure that tokenholder and cash positions remain accurate.

Custody Alignment - the reconciled records are cross-checked against the custodian's ledger for those investors who elect to retain custody with Tokinvest.

Audit Record - all confirmations and reconciliations are logged in Tokinvest's internal compliance and audit systems to maintain an immutable record of transaction activity.

B.6 VA CUSTODY

Unless an Investor elects to self-custody, BREI Tokens are held in secure custody with **Hex Trust MENA**, a VARA-licensed custodian engaged under a material outsourcing agreement with Tokinvest FZCO. where tokens are held in a segregated secured wallet and reconciled daily against Tokinvest's cap table.

Minting

The total authorised Token Supply for the issuance is fixed at the Token Generation Event (TGE) and may not be increased.

Following the TGE, Tokens are minted solely in respect of valid investor subscriptions, whether during the initial Subscription Period or any subsequent Subscription Periods permitted under the issuance documentation, provided that the authorised Token Supply is not exceeded.

Minting does not alter the Token Price, economic entitlements, or proportional rights of existing Tokenholders.

Burning

Tokens are burned only upon completion of a verified terminal event for the issuance, including the sale of the Property or any other wind-down event expressly provided for in the issuance documentation. Burning represents the end of the Token's lifecycle and the termination of the associated economic rights.

Transfers and Supply Integrity

Transfers of Tokens between investors - whether on the Tokinvest platform or on another VARA-licensed marketplace - are standard blockchain transfers and do not trigger minting or burning.

The total authorised Token Supply remains constant and fully auditable on-chain throughout the life of the Token.

Cross-Chain Transfers:

BREI Tokens are issued and operate exclusively on a single blockchain network. Cross-chain transfers are not supported. All transfers occur solely on the native chain between verified, whitelisted wallets. Token supply remains fixed and fully auditable on-chain.

Operational Oversight:

Tokinvest retains control of issuance, transfers, and lifecycle management, ensuring full compliance with VARA requirements.

Safeguards:

Tokens custodied on the Tokinvest platform are protected by institutional-grade systems, including multi-factor authentication and encryption protocols. Client assets are fully segregated from company assets, ensuring that investor holdings remain ring-fenced in the event of Tokinvest insolvency or operational disruption.

In such an event, Tokinvest's Wind Down Plan, approved by VARA, governs the secure transfer or recovery of investor assets.

B.7 VA ISSUANCE STRUCTURE

The BREI Token is issued under a regulated subscription-based issuance model operated by Tokinvest FZCO pursuant to its VARA licence.

Each issuance follows an all-or-nothing minimum subscription framework, with a defined maximum issuance size linked to the agreed Property Price. Tokens are issued only where the minimum aggregate subscription threshold is achieved.

Token Price and Authorised Supply

Each BREI token has a face value of AED 100.

The maximum authorised Token Supply for the issuance is determined at the Token Generation Event (TGE), being the close of the first Subscription Period at which the Minimum Subscription Amount is achieved, by

reference to the agreed GBP-denominated Property Price, converted into AED using a single spot AED/GBP exchange rate captured at that TGE. The FX reference rate is sourced from Fixer.io (APILayer).

The resulting AED amount is divided by the fixed Token Price to determine the total authorised Token Supply for the issuance. This authorised Token Supply is fixed at TGE and may not be increased.

Any subsequent Subscription Periods, if conducted, allocate Tokens from this fixed authorised supply and do not alter the FX rate, Token Price, or total authorised Token Supply.

Subscription Parameters:

Maximum Subscription Amount

An amount equivalent to the Property Price, converted into AED at TGE. The aggregate value of all Tokens issued for the issuance (prior to costs and fees) may not exceed this amount.

Minimum Subscription Amount

A minimum aggregate subscription amount equivalent to £5.2 million (or AED equivalent). If this minimum threshold is not achieved by the close of the final Subscription Period, the issuance does not proceed.

Minimum Investor Subscription Amount

Each investor must subscribe for a minimum of 1,000 BREI Tokens (AED 100,000), or currency equivalent.

Subscription Process

BREI Tokens are offered through an initial Subscription Period of up to 60 days and, where required, no more than two subsequent Subscription Periods of up to 30 days each, conducted on the Tokinvest platform.

To participate, investors must:

- complete full AML/KYC onboarding;
- pre-fund their Tokinvest Client Money Account (CMA); and
- submit binding subscription instructions through the Tokinvest platform.

Subscription amounts are deducted immediately from an investor's cleared CMA balance and held in Tokinvest's segregated Client Money Account at Zand Bank.

There are no pre-sales, discounts, or preferential allocations.

Token Generation Event (TGE)

The Token Generation Event (TGE) occurs once the Minimum Subscription Amount has been achieved and all participating investors have been verified.

Prior to TGE, Tokinvest performs a formal reconciliation of cleared investor funds and confirms that:

- all investors have completed AML/KYC onboarding;
- subscription funds have fully cleared; and
- all eligibility requirements have been satisfied.

At TGE:

- the maximum authorised Token Supply for the issuance is fixed;
- Tokens are minted only in respect of valid subscriptions received; and
- Tokinvest applies subscription proceeds in accordance with the issuance documentation, including acquisition of the contractual economic rights comprising the Reference Asset.

Tokens are credited to investor wallets within two business days following TGE.

Subsequent Subscription Periods

Where the Minimum Subscription Amount has not been achieved by the close of the initial Subscription Period, or has been achieved but the Maximum Subscription Amount has not been fully subscribed, Tokinvest may open no more than two additional Subscription Periods for the same issuance, each of up to 30 days.

Any Tokens issued in subsequent Subscription Periods:

- are issued at the same fixed Token Price;
- form part of the same issuance; and
- carry identical economic rights and terms.

The authorised Token Supply may not be exceeded, and no repricing, dilution, or alteration of Tokenholder rights is permitted.

Unsuccessful Subscription

If the Minimum Subscription Amount is not achieved by the close of the final Subscription Period:

- no TGE occurs;
- no Tokens are issued; and
- all investor subscription funds are returned in full without deduction, in accordance with Tokinvest platform terms.

Flow of Funds

Investor subscriptions are credited into Tokinvest's client money account.

Upon TGE, funds are deployed as follows:

- Payment for the economic rights to the Property.
- Legal and structuring costs related to the tokenisation.
- Tokinvest brokerage and platform fees (as detailed in Section F.14).
- Establishment of reserves for property management, insurance, and maintenance costs.

Any net rental yield is subsequently collected and distributed to tokenholders as set out in this whitepaper.

Upon property sale, net proceeds are remitted through Tokinvest, credited to investor accounts, and all tokens are burnt.

Allocation Restrictions

BREI Tokens may be retained by the Asset Owner to reflect its continuing economic interest in the underlying

property and to maintain alignment with tokenholders. Such retained tokens are not held for the purpose of proprietary trading or market making, and do not give rise to any obligation to provide liquidity.

Tokinvest FZCO and the Property Manager do not retain tokens for market making or proprietary trading purposes.

Tokens are issued solely to subscribed, whitelisted investors who have successfully completed all applicable AML/KYC and eligibility requirements

Lifecycle

BREI Tokens remain active and tradable on Tokinvest's secondary market until:

1. The Exit Property Valuation is agreed.
2. The Property is sold; and/or
3. Sale proceeds are received and distributed.

Following sale of the Property, all BREI Tokens are burnt, and investors' accounts are credited with their proportional share of the net proceeds.

B.8 USE OF PROCEEDS

The net proceeds from the issuance of BREI Tokens, after deduction of applicable fees and charges (as set out in Section F.14), will be applied as follows:

Acquisition of Economic Rights

Payment to the Asset Owners for the transfer of the **economic rights** to the designated Property.

Legal and Structuring Costs

Costs associated with the drafting and execution of legal agreements, tokenisation structuring, and regulatory submissions.

Brokerage and Platform Fees

Fees payable to Tokinvest FZCO for arranging, distributing, and managing the issuance, as described in Section F.14.

Property Management & Maintenance Fund

An allocation to cover ongoing maintenance, repairs, insurance, and compliance costs of the Property Manager, as described in Appendix A.

Marketing & Agency Costs

Costs relating to the marketing and letting of the Property, including professional photography, tenant sourcing, and agency commissions.

Reserves

Establishment of appropriate reserves for unforeseen property-related expenses, supporting continuity of rental income and yield distributions to tokenholders.

Ongoing Proceeds Distribution:

- **Rental Yield:** Net rental income, after deduction of management and maintenance costs, will be distributed to tokenholders in proportion to their holdings. Distribution commences after the first month and accrues on a block by block basis, with token holders eligible to claim outstanding rental returns at any time, up to and including the corresponding block.
- **Final Settlement:** Upon sale of the Property, net sale proceeds (after deduction of sale costs and fees) will be distributed to tokenholders, and BREI Tokens will be burnt.

Proceeds from Issuance Activities

Any profits realised by Tokinvest FZCO from issuance-related activities (including brokerage, management, and platform fees) are to be retained by Tokinvest as part of its ordinary operating revenue.

These profits will be used to:

Maintain and enhance Tokinvest's trading and compliance infrastructure;

Support ongoing regulatory and audit obligations under VARA;

Fund research and development into tokenisation technology and secondary market integrations; and

Strengthen Tokinvest's capital reserves in line with regulatory capital requirements for VARA-licensed entities.

No portion of issuance-related profits will be reinvested into the specific property asset or distributed back to tokenholders.

SECTION C – INFORMATION ABOUT RIGHTS AND OBLIGATIONS ATTACHED TO THE VIRTUAL ASSET**C.1 VA FUNCTIONALITY**

The BREI Token entitles tokenholders to receive:

1. A proportional share of net rental yield generated by the Property; and
2. A proportional share of net proceeds from any sale of the Property, following deduction of all fees and costs as outlined in this whitepaper.

The BREI Token does not provide any ownership or title rights over the Property. All rights are contractual economic rights only.

Stability of Functionality:

There are no current plans to alter the functionality of the BREI Token. Tokinvest is not aware of any circumstances that would affect its operation or expected lifecycle.

C.2 VA RIGHTS AND OBLIGATIONS

Rights of BREI Tokenholders:

Economic Rights

Proportional entitlement to net rental yield and to net proceeds from any sale of the Property.

Governance and Voting Rights

BREI Tokens do not confer any voting, management, or governance rights in Tokinvest FZCO. Ownership of the token is strictly limited to proportional economic interest rights on the Property and does not extend to equity or control of the Property or the Asset Owner.

Liquidity Rights

Ability to buy or sell tokens via the Tokinvest secondary market, subject to eligibility and compliance requirements.

Obligations of BREI Tokenholders:

- Completion of AML/KYC onboarding and adherence to Tokinvest platform terms.
- Acceptance that tokens will be custodied on the Tokinvest Platform and can only be transferred to a third-party custodian or investor self-custody wallet with Tokinvest approval.
- Compliance with all applicable regulatory and legal requirements in their jurisdiction.
- Complaints, if any, are to be directed through Tokinvest's published Complaints Handling and Resolution Procedure.

BREI Tokenholders have no rights of ownership, title, or control over the Property.

C.3 VA DLT AND RIGHTS

The BREI Token is minted, managed, and burnt by Tokinvest FZCO on the BNB Smart Chain (BSC) blockchain, using the BEP-20 token standard.

There is no legal, financial, or operational affiliation between Tokinvest FZCO and the BSC protocol or its developers. The use of BSC was selected for its technical suitability, scalability, and regulatory alignment.

Tokenholder rights are defined entirely by the contractual terms set out in this whitepaper and are not dependent on or altered by the functioning of the underlying DLT.

C.4 CONDITIONS FOR RIGHTS/OBLIGATIONS MODIFICATION

There are no known conditions under which the rights and obligations of tokenholders may be modified. Tokinvest FZCO does not have the ability to unilaterally amend or alter these rights.

C.5 RELATIONSHIP WITH SUBSEQUENT ISSUANCE

BREI involves a single authorised issuance.

The final Token supply is determined at the Token Generation Event.

Following this point, no increase in the authorised Token supply is permitted.

Tokens are minted only upon receipt of valid subscriptions.

Where the full authorised supply is not subscribed during the initial Subscription Period, no more than two additional Subscription Periods, each of up to 30 days, may be conducted for the purpose of allocating and minting the remaining Tokens from the fixed authorised supply. Any such allocations do not constitute a further issuance.

Such subsequent Subscription Periods:

- do not constitute further issuances;
- do not alter the Token Price; and
- do not increase the authorised Token supply.

Once the authorised Token Supply for the issuance has been fully issued, no additional BREI Tokens relating to the Property may be created or issued.

Any future BREI issuances will relate to different properties, each with:

- a separate whitepaper;
- a unique token designation;
- distinct smart contract identifiers; and
- issuance-specific Reference Assets.

Such future issuances are legally, economically, and operationally separate and have no impact on the rights or obligations of tokenholders in this issuance.

C.6 VA TRADING VENUE

BREI Tokens may be traded on the Tokinvest FZCO Investor Platform, which operates under Tokinvest's VARA-regulated broker-dealer licence.

While BREI Tokens will initially only be traded on the Tokinvest Investor Platform, they may be accepted for listing on other approved and appropriately regulated RWA platforms and Tokinvest will publish details of such licensed distribution on its website.

C.7 VA TRANSFER RESTRICTIONS

BREI Tokens can be transferred via the Tokinvest platform to other whitelisted investors / wallets. All transfers are restricted to whitelisted investors who have successfully completed AML/KYC checks.

Trading is suspended once an Exit Property Valuation has been established. At that point, tokens remain valid for rental yield distributions until redeemed and burnt.

C.8 VA VALUE PROTECTION MEASURES

The BREI Token does not include any contractual guarantees, redemption floors, or value protection mechanisms.

The token's value is derived solely from:

- Net rental income generated by the Property; and
- Net proceeds realised from any Property sale.

These are variable in nature and subject to market conditions, operating costs, and management fees as outlined in this whitepaper.

C.9 ENFORCEABILITY OF RIGHTS (INCLUDING PERMANENT REDEMPTION) AND CLAIMS AGAINST THE ISSUER

By acquiring BREI Tokens, holders acknowledge and agree that the token represents a contractual right to receive certain distributions as described in this whitepaper. The BREI Token does not confer any ownership, title, equity, or governance rights in the Issuer, Tokinvest FZCO, the Asset Owner or the Property.

The Issuer shall have no obligation to repurchase or redeem the token at any time. Upon expiry of the token, all rights (contractual, legal, or otherwise) shall automatically terminate, and no further claims shall be enforceable unless explicitly permitted under the terms of this whitepaper. Tokenholders accept that enforceability is contingent upon proper adherence to these terms, and that any legal or contractual recourse shall be limited to the mechanisms and remedies described herein.

All enforceable rights are contractual and are governed by this whitepaper, Tokinvest Brokerage Terms and Conditions, and the associated legal agreements executed at issuance.

C.10 INSOLVENCY EVENT

Tokinvest Insolvency Risk

In the event of Tokinvest FZCO entering into an insolvency event, tokenholders maintain third party rights under the contract between Tokinvest FZCO and the Asset Owner. This creates a contractual nexus for tokenholders to receive their economic rights directly from the Asset Owner. In practice this means that Tokenholders have the ability to recover their economic rights directly from the Asset Owner. This includes net rental yield and their entitlement to the net Property sale proceeds if the Asset Owner sells the Property. In the event of Tokinvest insolvency, the Asset Owner has the right to appoint a third party to administer the process or dealing directly with Tokenholders rights and the cost of such third party administrator can be set off against rental payments or Property sale proceeds.

Furthermore, in the event of such insolvency, the directors will implement the Wind Down Plan identified in Diagram 1. The Wind Down Plan was approved by VARA as part of Tokinvest's licensing approval. The plan outlines all the activities and processes that the business will undertake should it become insolvent. A critical aspect of the plan is to ensure that client assets are at all times protected and secured within named "client accounts" which will constitute a one of two options depending on if fiat or digital assets are being custodied:

- Fiat currency (cash) will, at all times, be securely stored with an approved third-party bank within the UAE. Tokinvest utilises Client Money Account(s) with Zand Bank.
- Digital assets, where possible, are securely stored with a VARA licensed third-party custodian within the UAE. Tokinvest utilises Hex Trust MENA.

The purpose of client assets being held within accounts designated "client accounts", is to ringfence client assets from company assets in the case of an insolvency.

Tokenholders will be able to engage with the appointed insolvency practitioners during the insolvency proceedings to recover their assets and have them transferred to a third-party location. The appointed insolvency practitioner will ensure that tokenholders are kept fully abreast of the situation and detail to the tokenholders what they need to do, and provide, in order to recover their assets.

Asset Owner Insolvency Risk

Tokinvest has established legal rights to protect investors interests in the event of an insolvency of the Asset Owner. Specifically, the Asset Owner has granted Tokinvest:

- a) a first legal charge over the Property; and
- b) an assignment of income derived from the Property (including rent, sale proceeds, insurance proceeds, and other income).

Tokinvest's interest over the Property is registered on the UK Land Registry.

The terms of this security are set out in the Property Rights Agreement entered into between Tokinvest and the Asset Owner and includes the right to appoint a receiver to administer the Asset Owner and/or the right to sell the Property so that Property sale proceeds can be returned to tokenholders. Tokinvest is entitled to enforce this security interest in the event of material breach of insolvency of the Asset Owner. Tokinvest will exercise these rights promptly and in the interests of Tokenholders economic rights under this whitepaper which will enable tokenholders to continue to receive their economic rights include to receive Property sale proceeds.

C.11 VARIATION OF RIGHTS

All BREI Tokenholders hold identical and non-discriminatory rights. There are no separate classes of holders (e.g., retail, professional, market-maker, or affiliate) and no preferential or differential entitlements to information, liquidity, or governance.

Every whitelisted investor, once approved under Tokinvest's AML/KYC process, enjoys the same contractual rights to economic distributions and secondary trading access.

Market makers, if appointed, operate solely to provide liquidity under Tokinvest supervision and do not receive preferential rights or enhanced access.

All eligible investors (as defined in Section B.4) may participate equally in primary issuance, secondary trading, and distributions.

Rights may not be varied unilaterally by Tokinvest FZCO.

Any change to tokenholder rights or eligibility criteria requires prior VARA regulatory review and approval. Following approval, Tokinvest will give all tokenholders no less than 30 days' written notice via the investor dashboard and registered email before implementation.

Existing tokenholders are grandfathered under the prior terms for any obligations or benefits accrued prior to the effective date of the amendment.

Tokinvest must publish a Summary of Change Notice setting out:

- the rationale for the variation;
- confirmation that the change applies equally to all holders; and
- the expected effective date.

Transferability rules are identical across all holder categories and are governed by Tokinvest's platform terms. Tokens may only be held or transferred by investors whose wallets remain on the approved whitelist.

Removal from the whitelist (e.g., due to failed compliance review) suspends transfer and distribution rights until reinstatement.

Whitelist reviews occur annually, with appeals permitted under Tokinvest's Complaints and Review Policy.

C.12 VA LIQUIDITY

BREI Tokens are designed to accommodate secondary market liquidity through the Tokinvest FZCO Investor Platform.

Secondary Market

Tokenholders may list BREI Tokens for sale to other whitelisted investors on Tokinvest's secondary marketplace. All initial and ongoing secondary trading will take place on the Tokinvest Investor Platform, operated under Tokinvest's VARA-regulated Broker-Dealer licence (VL/2024/12/004).

Secondary-market functionality is expected to be available at or shortly after the Token Generation Event (TGE), enabling investors to buy and sell tokens in a regulated environment.

Any future listings on other VARA-licensed RWA marketplaces would require prior regulatory approval and alignment with Tokinvest's compliance, settlement, and KYC standards.

Eligibility

Only investors who have completed AML/KYC clearance may buy or sell BREI Tokens.

**Liquidity Facilitation**

Tokinvest provides a price-discovery interface for each BREI Token individually.

The platform maintains an electronic order book where whitelisted investors may submit limit orders (bids or offers) in accordance with published market rules. Each BREI Token has a dedicated liquidity page displaying outstanding orders, recent trades, and indicative pricing information to support transparency and price discovery.

Orders are eligible for execution where buy and sell instructions contain compatible terms, including matching price, quantity, and settlement conditions. In such cases, Tokinvest may temporarily interpose itself as principal solely for the purpose of facilitating settlement, executing both sides of the transaction simultaneously at the same price on a delivery-versus-payment basis.

Tokinvest does not act as a market maker, does not provide continuous two-way pricing, and does not take directional or speculative trading positions. Any principal execution is risk-neutral, operational in nature, and subject to the same pricing logic, execution rules, and compliance oversight applicable to all secondary market activity.

Market Insights and Valuation Support

Tokinvest will periodically publish indicative net-asset values (NAVs), housing-market data, and (where available) AI-driven pricing analytics to assist investors in assessing fair-value ranges for secondary-market pricing.

Ongoing Monitoring, Reporting and Investor Communications

Tokinvest conducts ongoing monitoring of each BREI Token and its underlying property to support asset oversight and investor transparency. Monitoring includes, at a minimum, rental performance and yield metrics, occupancy and vacancy status, maintenance and operating expenditures, material FX exposure (where applicable), and relevant market and valuation indicators. Information is sourced from the property manager, third-party service providers, market data sources, and Tokinvest's internal reconciliation and oversight processes.

Tokinvest provides periodic reporting to tokenholders via the Tokinvest Investor Platform, typically on a quarterly basis. Reporting includes property performance summaries, indicative net asset values (NAVs), relevant housing-market data, and commentary on material developments affecting the property or token. Indicative NAVs are derived from market data and analytical tools and are provided for informational purposes only.

Indicative NAVs are calculated in GBP, being the functional currency of the underlying property. For investor reporting purposes, NAVs are presented in both GBP and AED.

AED values are derived using a reference FX rate captured at 12:00 GMT on the relevant reporting date. FX rates are sourced from Tokinvest's designated pricing data provider, Fixer.io (APILayer), which aggregates exchange rate data from multiple commercial sources.

FX conversions are applied consistently in accordance with Tokinvest's internal pricing policy and are provided for valuation and disclosure purposes only. FX rates do not represent executable rates and may differ from rates available in the secondary market or through financial institutions.

In addition to scheduled reporting, Tokinvest communicates material events to investors on an ad-hoc basis through platform notifications and direct communications. Tokenholders have continuous access to their holdings, transaction history, and cash balances via their investor dashboard.

Suspension of Trading

Trading will be suspended once an Exit Property Valuation is established. During this period, yield distributions continue until the sale is settled.

Exit and Resale Liquidity

BREI Tokens do not guarantee capital preservation. Tokenholders may only be able to resell their tokens at a price below the original issue price, or may be unable to resell them at all.

Any resale, buy-back, or redemption of BREI Tokens may occur at a discount to the most recently published indicative NAV and may result in tokenholders receiving less than their original investment, or, in adverse market conditions, no recovery of capital. Tokinvest does not guarantee liquidity, resale price, or exit timing.

Real estate is a semi-liquid asset class, - exit ultimately depends on market supply and demand. Tokenholders can list their tokens on the Tokinvest platform and may offer them at a discount to improve the likelihood of resale.

In rare and exceptional circumstances, and at its sole discretion, Tokinvest may consider repurchasing BREI Tokens for the limited purpose of supporting orderly market functioning where prolonged secondary-market illiquidity is evidenced. Buy-back consideration may arise only where BREI Tokens have been continuously offered for sale at the maximum permitted discount under platform pricing controls (currently 10% below the most recently published indicative NAV) for a sustained period (currently eight weeks) without execution.

Where such conditions are met and subject to internal governance, compliance oversight, and approval processes independent of commercial functions, Tokinvest may repurchase tokens at a price of up to 15% below the most recently published indicative NAV. Tokinvest has no obligation to undertake any buy-back, does not engage in proprietary trading or market-making activities, and does not use buy-backs to influence secondary-market pricing or generate trading profits. Any tokens repurchased are promptly relisted on the platform under the same market rules, pricing logic, and execution protocols applicable to all investors.

Any buy-back, if undertaken, is intended solely to support orderly market functioning and does not protect tokenholders from loss, does not establish a price floor, and should not be relied upon as an exit mechanism. Following any eventual property sale, all tokens linked to that asset are redeemed and burnt, and net sale proceeds are credited to tokenholder accounts in AED or approved currency equivalents.

Following any eventual sale of the underlying property, all tokens linked to that asset are redeemed and burnt, and net sale proceeds (which may be less than the original investment amount after costs, liabilities, and market movements) are credited to tokenholder accounts in AED or approved currency equivalents.

For the purposes of this section, “rare and exceptional circumstances” are limited to situations where continued listing or holding of the underlying property would reasonably be expected to materially disadvantage tokenholders or impair the integrity of the product, as determined and documented in accordance with Tokinvest’s internal governance and compliance procedures.

Operational Process and Settlement

All trades settle on a delivery-versus-payment (DvP) basis within the Tokinvest ecosystem. Upon execution,

the buyer's client account is debited, the seller's is credited, and the platform updates the CAP table immediately to reflect the new token ownership positions. Token transfers between verified wallets are then processed within two business days, subject to standard compliance and custody verification checks. Each transaction is confirmed by email and displayed in real time on investor dashboards.

Liquidity Risk

Tokinvest makes no assurance of continuous liquidity; tokenholders may not be able to sell their holdings on demand.

C.13 COMPLAINTS HANDLING

For any complaints, please go to Tokinvest's website; [Tokinvest Complaints Handling and Resolution Procedure](#) which details the complaints handling procedure and how to submit a complaint.

C.14 REDEMPTION RIGHTS

BREI Tokens do not include any contractual right of redemption during their lifecycle other than as set out below. Tokinvest FZCO has no obligation to repurchase or redeem tokens at any time.

Upon sale of the Property, the issuance enters a mandatory wind-up process as described in Appendix B. Net sale proceeds are distributed to Tokenholders in accordance with the contractual mechanics, following which the Tokens are automatically extinguished and burned. No other redemption options or buy-back mechanisms exist.

C.15 MATERIAL LEGAL CONSIDERATIONS

The BREI token structure has been designed to be a VA product that is suitable for retail, qualified and institutional investors.

All investors must pass KYC/AML checks and comply with platform terms. Transfer of these Virtual Assets can only be made via the Tokinvest OTC platform to pre-authorised and screened investors. Investors outside of the UAE are responsible for ensuring compliance with their local laws regarding virtual assets. Ownership and transaction of these Virtual Assets is not available to citizens or residents of the United States of America or any sanctioned or FATF high risk jurisdiction.

Note that changes in laws or regulations may affect token legality, transferability, or value. A comprehensive risk disclosure document accompanies this whitepaper, detailing all potential risks associated with ownership of this Virtual Asset.

Each investor / owner of these Virtual Assets agrees to the following:-

1. This Whitepaper together with the Tokinvest Brokerage Terms and Conditions and the associated Risk and Disclosure statement sets out the basis upon which the investors agree to acquire and trade this Virtual Asset.
2. Notwithstanding the following, in its capacity as the Issuer Tokinvest FZCO does not limit or exclude its actual or potential civil liability in respect of the accuracy of any information in this whitepaper, or any other disclosure or communication relating to this whitepaper. Subject to the foregoing:-

- a) Tokinvest FZCO shall not be liable to you for any indirect or consequential losses or for any loss or profits or anticipated returns;
 - b) the total aggregate liability of Tokinvest FZCO to you in contract, tort, negligence, for breach of statutory duty, under an indemnity or otherwise arising out of or in connection with the issuance of this virtual asset will be capped at a sum equal to the amount of payments that have been received by Tokinvest for distribution to tokenholders and which are due to you in accordance with the terms of this Virtual Asset whitepaper.
3. Tokinvest FZCO will not be liable in contract, tort (including negligence), for breach of statutory duty, under an indemnity or in any other way for any special or indirect or consequential loss or damage suffered or incurred by you arising out of or in connection with the issuance of this Virtual Asset.
4. Nothing contained in this section shall be applicable to the extent that it: a) constitutes a limitation or exclusion of liability for death or personal injury caused by negligence or constitutes a limitation or exclusion of liability for fraud, deceit, or reckless disregard of professional obligations; or b) would render either you or us in breach of any applicable and mandatory legal, regulatory or other professional restriction or requirement.
5. Unless otherwise specified in this whitepaper, the rights of an investor / owner of this Virtual Asset cannot be changed or varied without the approval of the investor / owner of the Virtual Asset.
6. Any complaints arising out of, or in connection with, this whitepaper or token should be should be directed to the published [Tokinvest Complaints Handling and Resolution Procedure](#) on the company website.
7. Unlike Crypto tokens which are themselves the underlying asset, RWA tokens are on-chain representations of off-chain assets or their associated economic benefits. This means that if RWA tokens are lost or compromised, they can be burnt and re-issued to the rightful owner as registered on the Tokinvest CAP table. In exceptional circumstances where Tokens are demonstrably lost or compromised (e.g., due to private key compromise), the Issuer may, subject to internal compliance procedures and verification requirements, invalidate the affected Tokens and reissue an equivalent number to the verified beneficial owner.
In such cases:
 - the original Tokens are permanently burnt or rendered invalid;
 - no net increase in Token supply occurs;
 - the authorised Token supply remains unchanged; and
 - the economic rights attached to the issuance are not modified.

Reissuance is not discretionary and occurs only following documented verification and approval processes.

C.16 APPLICABLE LAWS

Any dispute arising out of or in connection with this whitepaper, including any question regarding its existence, validity or termination, shall be referred to and finally resolved by the Courts of the DIFC. The governing law of the contract shall be the substantive law of England & Wales.

SECTION D: INFORMATION ABOUT UNDERLYING TECHNOLOGY

D.1 VA DLT

The BREI token is deployed on the Binance Smart Chain (BSC) DLT, a public, EVM blockchain compatible with industry standards.

The BREI token uses a standard BEP-20 token incorporating ERC1404 transfer restriction logic. The smart contract has undergone a comprehensive independent audit, most recently on 14 December 2022. The contract remains unchanged and the audit is still considered current.

The audit was conducted by Block Solutions, a reputable cybersecurity and blockchain auditor.

The results of the audit confirmed that the BREI token smart contract is secure, and functions as intended, with no critical vulnerabilities detected.

Tokens can be held on the Tokinvest platform in secure digital wallets provided by a VARA licensed VASP providing regulated Custody Services. Investors may also self-custody their tokens.

Transfers are facilitated through the Tokinvest Investor Platform, ensuring compliance with regulatory requirements.

D.2 DLT CONSENSUS MECHANISM

BNB Smart Chain uses a Proof-of-Staked-Authority (PoSA) consensus mechanism under which a limited set of validators produce and validate blocks. Validator selection is based on staking and governance processes defined by the BNB Chain protocol.

The design of the token indicate that there are no observable risks of a variance to the rights of token owners should other DLTs be used in the future.

BNB Smart Chain relies on a limited validator set. While this may increase throughput and efficiency, it may also introduce concentration risk relative to more decentralised networks. Tokinvest does not control, operate, or influence BNB Smart Chain validators.

D.3 DLT DETAILS

Validators on the BSC chain receive a portion of transaction fees as well as block rewards. BSC transaction fees are paid in BNB and are typically low and predictable but may fluctuate based on network demand. They depend on the gas price and the limit used by each transaction.

D.4 ISSUER/THIRD PARTY DLT

N/A

D.5 ENVIRONMENTAL IMPACT STATEMENT

Tokinvest is dedicated to sustainable practices and continuously seeks ways to reduce its environmental footprint. We will always provide information on the environmental impact of all our activities and positively encourage and support eco-friendly initiatives within the industry.

By implementing the BREI token on an energy-efficient blockchain using Proof of Staked Authority (PoSA), Tokinvest ensures minimal environmental impact due to the low energy consumption of the underlying technology.

SECTION E: INFORMATION ABOUT LICENSED DISTRIBUTOR

Tokinvest is the sole licensed distributor of the BREI token at the time of issuance.

BREI Tokens may be accepted for listing on other approved and appropriately regulated RWA platforms and Tokinvest will publish details of any such licensed distributors.

E.1 Licensed Distributor Name

Tokinvest FZCO

E.2 Legal Form

Tokinvest FZCO a company organized and existing under the laws of the United Arab Emirates, license no DMCC-928046 (registered on 10th May 2024)

E.3 Registered Address

Unit No: UT-12-PO-8, DMCC Business Centre, Level No 12, Uptown Tower, Dubai, United Arab Emirates.

E.4 VARA Number

VARA regulated broker dealer reference number VL/2024/12/004

E.5 Parent Company

Tokinvest FZCO is a wholly owned subsidiary of OREHC Holding Limited (company number 25680, incorporated 13 February 2025), registered at Unit PC-1, Level 7, Al Maryah Tower, Abu Dhabi Global Market Square, Al Maryah Island, Abu Dhabi, United Arab Emirates.

E.6 Business Activity

Providing Virtual Asset design, placement, marketing, distribution and OTC trading services for the Virtual Asset.

SECTION F: INFORMATION ABOUT ANY INITIAL OFFER TO THE PUBLIC OF THE VIRTUAL ASSET**F.1 REASONING BEHIND PUBLIC OFFER**

The BREI Token gives investors the opportunity to gain fractionalised exposure to the economic returns from residential real estate in a regulated, blockchain-based format. Investors participate in both net rental yield and potential capital appreciation from sale of the Property.

F.2 OFFER AMOUNT (AED)

The maximum aggregate offer amount corresponds to the agreed acquisition price of the Property (the "Property Price"), as disclosed in this Whitepaper.

The Property Price represents the maximum aggregate subscription amount for this issuance. The total value of all BREI Tokens issued for the Property (prior to costs and fees) shall not exceed the Property Price, converted into AED in accordance with the foreign exchange mechanics described elsewhere in this Whitepaper.

BREI Tokens are issued with a fixed face value of AED 100 each.

Minimum Investor Subscription Amount: 1,000 BREI Tokens (**AED 100,000** or currency equivalent) per investor.

F.3 OVERSUBSCRIPTION PROCESS

Oversubscription is not permitted.

The total number of BREI Tokens issued for the Property shall not exceed the authorised maximum Token Supply determined at the Token Generation Event (TGE). Once this supply is fully issued, no further Tokens

referencing the Property may be created.

F.4 SPECIFIC NOTICE

BREI Tokens may be offered through an initial Subscription Period of up to 60 days, commencing on the date Tokinvest accepts the first valid subscription, and no more than two subsequent Subscription Periods of up to 30 days each, conducted on the Tokinvest FZCO platform, each forming part of the same issuance and on identical economic and pricing terms.

A Token Generation Event (TGE) occurs once the minimum aggregate subscription threshold for the issuance has been achieved and all investor subscriptions have been verified.

If the minimum subscription threshold is not reached by the close of the final Subscription Period, no TGE occurs and all investor funds are returned in full without deduction.

Following the TGE, Tokens may continue to be issued during subsequent Subscription Periods for the same issuance until the authorised maximum Token Supply is reached. No Tokens may be issued beyond this cap.

F.5 ISSUE PRICE

The issue price of each BREI Token is set at **AED 100**.

For transparency, and where relevant, Tokinvest FZCO also displays the GBP currency equivalent price on its platform, calculated using prevailing exchange rates at the time of subscription.

F.6 VA SUPPLY

The total Token Supply for the issuance is determined at the Token Generation Event (TGE) by reference to the Property valuation and the fixed Token price of AED 100.

Once established at the TGE, the total Token Supply is fixed, auditable on-chain, and cannot be increased. Any subsequent subscription windows relate solely to the distribution of Tokens within this fixed supply and do not alter the total Token Supply.

F.7 PROSPECTIVE OWNERS

The target market for BREI Tokens is retail, qualified and institutional investors, over the age of 18, who are seeking exposure to the economic rights of residential real estate through fractionalised, blockchain-based investment structures.

- Minimum subscription: 1,000 tokens (AED 100,000) or currency equivalent.
- All investors must complete Tokinvest's AML/KYC checks and be approved as whitelisted investors before participation in the issuance.

F.8 VA OFFER PHASES

There will be no phased offerings or discounted sales of BREI Token. All tokens are offered on the same terms during each applicable Subscription Period.

F.9 TIME-LIMITED OFFERS

There will be no time-limited offers or promotional discounts of BREI Tokens.

Subscriptions may be accepted only in respect of an offering designated as open for subscription on the

Tokinvest platform. Where no offering is so designated, or after the close of the final Subscription Period, no subscriptions may be made.

F.10 VA SAFEGUARDING DURING OFFER PERIODS

Not applicable. BREI Tokens are not distributed until the Token Generation Event (TGE). Investor subscriptions are safeguarded in Tokinvest's designated client money accounts at Zand Bank throughout the Subscription Period. If the issuance is unsuccessful, funds are returned to investors in full without deduction.

F.11 METHODS OF PAYMENT AND VALUE TRANSFER FOR THE VA

Funding and Subscription

To subscribe to an offering of the BREI token, investors must deposit funds into their Tokinvest client account in AED (or another approved currency equivalent) prior to subscribing. Note that all payments and settlements are securely processed through Tokinvest's CBUAE-approved Client Money Account (CMA).

When these funds have cleared, the investor can open the offering in the Tokinvest marketplace and click the 'Subscribe' button to select the number of tokens they wish to purchase. When the subscription has been confirmed by the investor, Tokinvest debits the investor's fiat account and then allocates to them the requisite number of tokens to be minted at the Token Generation Event (TGE). This allocation will be displayed in the Investor Dashboard as an Open Order

Upon TGE, BREI Tokens are minted and transferred into each investor's individual wallet within two business days, following completion of compliance and custody verification checks. Investors will then see the tokens with a confirmed status in their portfolio in the Investor Dashboard.

Secondary-Market Sales and Fiat Redemption

When an investor sells BREI Tokens on the Tokinvest secondary market, the platform automatically debits the buyer's client account and credits the seller's account with the equivalent fiat proceeds in AED (less applicable trading fees).

Settlement occurs on a delivery-versus-payment (DvP) basis: the CAP table updates immediately to reflect new ownership, while token transfers between verified wallets are processed within two business days.

Proceeds from token sales remain in the investor's Tokinvest fiat wallet, held within the CMA. These balances may either:

- be used to purchase other virtual assets listed on the platform; or
- be withdrawn to the investor's verified external bank account via standard domestic or international bank transfer. Withdrawals are typically processed within two business days of request.

Ongoing Cashflows

Net rental income generated by the Property accrues on a block-by-block basis following completion of the first full month after issuance.

Distributions to tokenholders will be made in a permitted distribution currency supported by Tokinvest's regulated client money and virtual asset infrastructure at the relevant time. Such currency may include fiat currency or a VARA-permitted Virtual Asset, where supported by Tokinvest's licensing permissions.

Where conversion from GBP is required prior to distribution, conversion will be effected using the relevant GBP/[distribution currency] reference rate captured at 12:00 GMT on the applicable distribution date. The

reference rate is sourced from Tokinvest's designated pricing data provider, Fixer.io (APILayer), which aggregates exchange rate data from multiple commercial sources. Tokinvest applies the captured reference rate consistently for distribution calculations.

Net rental yield distribution commences after the first month and accrues on a block-by-block basis.

Tokenholders are eligible to claim outstanding rental returns at any time, up to and including the corresponding block.

FX movements between receipt of rental income and the applicable reference time may positively or negatively affect the amount ultimately received by tokenholders. Tokinvest does not hedge foreign exchange risk on behalf of tokenholders.

Distribution on Property Sale

Upon property sale or disposal, gross sale proceeds (denominated in GBP) will be converted into the permitted distribution currency using the AED/GBP reference rate captured at 12:00 GMT on the applicable conversion date, sourced from Fixer.io (APILayer).

After deduction of disclosed transaction costs and Tokinvest's capital appreciation fee, net sale proceeds are distributed to tokenholders in proportion to their holdings via the same block-based settlement mechanism.

Following distribution of sale proceeds, all Tokens linked to the Property are redeemed and burnt in accordance with the issuance mechanics.

Withdrawal of Funds

Investors may withdraw available cash balances at any time, subject only to the absence of compliance, security, or operational restrictions reasonably required to protect client assets and platform integrity.

Cross-Platform Settlement

Where a sale occurs on another VARA-licensed RWA platform that meets Tokinvest's compliance and reconciliation standards, the transaction follows the same delivery-versus-payment (DvP) process. Both fiat and token legs are settled in AED through CBUAE-approved client accounts, with Tokinvest maintaining the definitive record of tokenholder positions through daily reconciliation.

Trade confirmations and updated balances are reflected in investors' dashboards once final settlement is verified by both counterpart platforms.

No settlement or value transfer is permitted with unlicensed or offshore venues.

Inter-Platform Transfers

Transfers of BREI Tokens are permitted only between Tokinvest and other VARA-licensed RWA or VASP platforms that maintain equivalent KYC/AML, reconciliation, and settlement standards. Transfers to unregulated or non-licensed venues are not permitted.

Reconciliation and Confirmation

All transactions (whether executed on Tokinvest or an approved VARA-licensed partner platform) are fully reconciled through Tokinvest's internal records. Each transaction is confirmed by email and reflected in real time on the investor's dashboard.

F.12 ISSUER RIGHT TO WITHDRAW/CANCEL

Tokinvest reserves the right, in its sole discretion and at any time prior to the completion of the offering, to withdraw or cancel the offering for any reason, including but not limited to insufficient investor interest, adverse market conditions, regulatory concerns, or changes in business strategy. In the event of such withdrawal, no further tokens will be issued but all existing tokens will maintain full rights and will be

unaffected by the withdrawal.

F.13 SCHEDULE OF VA TRANSFER

Upon a successful subscription and TGE, Tokinvest debits the investor's account, credits the Asset owner with the proceeds (net of fees) and mints the requisite BREI Tokens. Tokens are transferred to each investor's individual wallet within two business days of the TGE.

F.14 VA PURCHASING FEES

All fees and charges are paid in addition to the token purchase price.

- **2%** Brokerage fee due to Tokinvest FZCO for the purchase of primary issuance tokens
- **0.25%** transfer fee for OTC secondary market purchases and sales (payable by both token buyer and seller) payable to Tokinvest FZCO.
- **0.1%** Transfer fee for VA transfer (payable by the token buyer)
- **0.1%** Lifetime Token Management fee payable to Tokinvest FZCO (calculated daily, billed monthly)
- **0.2%** Annual Custody fee payable to Tokinvest FZCO (calculated daily, billed monthly)
- **5%** share of the capital appreciation of the Property will be retained by Tokinvest FZCO – i.e. 5% of the difference between the Property Value at Issuance and the Property sale price.

F.15 POTENTIAL CONFLICTS OF INTEREST

Tokinvest confirms that, to the best of its knowledge no member of its board of directors, executive management, or any other significant person with decision-making authority has any personal, professional, or financial relationship or interest with any individual associated with this issuance nor with any party involved in the operation, management, or governance of Distributed Ledger Technology (DLT) platform BSC. This affirmation is made to ensure full transparency and to confirm that there are no existing or potential conflicts of interest that could impair the independence or integrity of Tokinvest's operations or its relationship with investors.

F.16 APPLICABLE LAW FOR VA OFFERING

Any dispute arising out of or in connection with this whitepaper, including any question regarding its existence, validity or termination, shall be referred to and finally resolved by the Courts of the DIFC. The governing law of the contract shall be the substantive law of England & Wales.

SECTION G – ADDITIONAL WHITEPAPER DISCLOSURES (FOR ASSET-REFERENCED VIRTUAL ASSETS (ARVA))

G.1 ARVA VALUE AND RIGHTS

The BREI Token is an Asset-Referenced Virtual Asset (ARVA). Its value is directly linked to the economic performance of the Property.

Tokenholders are entitled to:

- A proportional share of net rental yield generated by the Property; and
- A proportional share of net proceeds from any sale of the Property.

G.2 REFERENCE ASSET TYPE AND COMPOSITION

The reference asset for the BREI Token (**TVBREIBBWUK1**) is the contractual economic rights associated with

the Property which is owned by the Asset Owner.

G.3 REFERENCE ASSET CONSISTENCY

The underlying reference asset will not change throughout the life of the token.

G.4 REFERENCE ASSET RIGHTS REPRESENTATION

There is no direct or indirect right of ownership of the Property or the Asset Owner. The BREI token represents economic rights only.

G.5 REFERENCE ASSET LEGAL/REGULATORY REQUIREMENTS

There are no specific legal or regulatory requirements in respect of settlement or transfer of title of the Property, which remains at all times remains registered to the Asset Owner.

- At the point of Issuance the Property is not encumbered by any regulatory conditions affecting its transferability. Following the Issuance, Tokinvest's interest will be noted on the Property Title to secure it for the benefit of tokenholders. The Property will not otherwise be encumbered for the duration of this Virtual Asset.
- Ownership of BREI Tokens does not affect, alter, or transfer title in the Property.
- Changes in tokenholder ownership (e.g. via Tokinvest's secondary market) do not affect the legal status or ownership of the Property itself.

G.6 STABILITY OF ARVA VALUE TO REFERENCE ASSETS

The BREI Token references the economic performance of the Property.

Secondary market prices of the Token are determined by supply and demand and may differ, potentially materially, from the net asset value (NAV) of the underlying Property.

Factors including liquidity conditions, discounting, platform risk, FX movements, regulatory developments, and investor sentiment may cause market prices to trade at a premium or discount to NAV.

No assurance is given that the Token will trade in line with the value of the Property.

G.7 MAINTENANCE OF RESERVE ASSETS

The VARA regulatory framework dictates that for certain asset-referenced Virtual Assets issuers must maintain a Reserve Asset allocation.

Reserve Assets

The VARA regulatory framework dictates that for certain asset-referenced Virtual Assets issuers must maintain a Reserve Asset allocation.

Tokinvest will allocate a portion of their Reserve Assets that corresponds to 2% of the net BREI token issuance fiat currency amount (excluding fees and commissions) within the VARA stipulated timeframe for each individual BREI that is issued.

G.8 TYPE AND COMPOSITION OF RESERVE ASSETS

Reserve Assets will be held in fiat AED, being the base currency of the issuance and of Tokinvest FZCO. At this time Tokinvest sees no reason to expect the Reserve Asset composition to change.

G.9 CHANGEABILITY OF RESERVE ASSET

N/A. Reserve Assets will remain in AED at all times.

G.10 TOKEN EXPIRY PROCESS

There is no redemption of the BREI Token (TVBREIBBWUK1) during its lifecycle. Tokens will expire only upon the sale of the Property. At that point:

- Net sale proceeds (after deduction of applicable costs and fees) are credited to tokenholders' Tokinvest accounts in proportion to their holdings.
- All BREI Tokens relating to the Property are then redeemed and burnt, automatically terminating tokenholder rights.

The detailed procedure governing the property sale, including valuation, marketing, remarketing, and transparency of settlement, is set out in Appendix B (Exit and Sale Process).

G.11 FLOW OF FUNDS FOR ARVA HOLDERS AT EXPIRY

When the Property is sold:

- Gross Sale Proceeds are received by Tokinvest FZCO on behalf of tokenholders.
- Deductions are made for:
 - Property sale costs (legal, agency, conveyancing, valuation), and
 - Tokinvest's capital appreciation fee (5%).
- Net Proceeds are transferred to Tokinvest's designated client money account.
- Distribution: Each tokenholder's proportional share is credited to their Tokinvest investor account.
- Redemption: All BREI Tokens are burnt at expiry, formally closing out the issuance.

The procedure for property valuation, marketing, sale, and proceeds distribution is described in Appendix B.

G.12 REFERENCE ASSET/RESERVE ASSET CUSTODY ARRANGEMENT

Funds are placed in a segregated account with Zand Bank, a CBUAE licensed domestic institution, and managed strictly according to Tokinvest's Reserve Assets policy.

G.13 RISK ASSESSMENT OF REFERENCE AND RESERVE ASSETS

Credit Risk

Reserve assets are subject to the creditworthiness of Zand Bank. Tokinvest shall only maintain reserve accounts with banks that meet minimum capital adequacy and credit rating thresholds approved by the Tokinvest Risk Committee.

Market Risk

As reserves are denominated solely in fiat AED, market risk is limited to inflation or devaluation of the AED. Tokinvest does not engage in FX hedging or interest rate speculation.

Counterparty Risk

Tokinvest faces counterparty risk in relation to Zand Bank, the reserve asset custody institution. Due diligence is performed annually to assess financial health, operational controls, and regulatory compliance of the custodian bank. No reserve assets shall be placed with unlicensed or offshore financial institutions at any time.

Liquidity Risk

All reserve assets will be available for redemption or conversion on demand and with same-day liquidity.

Term deposits or restricted access holdings will not exceed 10% of total reserves and be pre-approved by the Tokinvest Risk Committee.

G.14 ANY OTHER RELEVANT INFORMATION

N/A

APPENDIX A – PROPERTY MANAGERS ROLE

The Property Manager has been appointed by Tokinvest FZCO to act as the agent for the Property. The Property Manager's responsibilities are designed to ensure the property is well-maintained, legally compliant, attracts suitable tenants, and maximises rental yield.

Services provided by the Property Manager include:

1. Property Marketing and Advertising

- Listing the property on major UK real estate portals (e.g. RightMove, Zoopla), social media, and agency websites.
- Preparing professional photography and virtual tours.
- Organising open houses or private viewings.

2. Tenant Screening and Selection

- Conducting background checks (rental history, employment verification, references, creditworthiness).
- Drafting and negotiating tenancy agreements to align with UK legal requirements.

3. Rent Collection and Payment Management

- Managing rent collection through automated systems.
- Sending reminders, following up on late payments, and applying late fee policies.

4. Maintenance and Repairs

- Scheduling routine maintenance and inspections.
- Coordinating emergency repairs with vetted contractors.
- Conducting regular condition checks.

5. Legal and Regulatory Compliance

- Ensuring tenancy agreements comply with UK tenancy law.
- Registering deposits under the UK Tenancy Deposit Protection scheme, where applicable.
- Monitoring compliance with new legislation (e.g. Renters' Rights Bill expected in 2025).

6. Tenant Relations and Communication

- Acting as primary contact for tenant queries.
- Managing tenancy renewals, rent adjustments, and move-out arrangements.
- Mediating disputes between landlord and tenants.

7. Property Inspections and Deposit Handling

- Conducting check-in / check-out inspections with full inventories.
- Determining return or retention of deposits for damages beyond fair wear and tear.

8. Financial Reporting

- Providing detailed statements of rental income and expenses.
- Preparing documentation to assist with tax filings.

9. Rent Increase Management

- Advising on lawful rent increases under Section 13 procedures.
- Providing tenant notices in line with statutory timelines.

10. Eviction Assistance

- Managing legal eviction processes where tenants breach contracts.
- Coordinating with UK courts where required.

11. Insurance and Risk Management

- Advising on appropriate property insurance and ensuring cover is maintained.
- Recommending tenant insurance where appropriate.

12. Exit and Property Handover

- Managing end-of-lease handovers and deposit settlements.
- Re-marketing the property to minimise vacancy periods.

APPENDIX B – PROPERTY EXIT SALE PROCESS

The following process governs the property sale and settlement:

1. Property Sale

- While the intention is for this to be a long term Virtual Asset, **Tokinvest**, reserves the right, in its sole discretion, to sell the underlying property where the Issuer reasonably determines that circumstances justify an early sale, including but not limited to: material changes in market conditions, regulatory developments, unforeseen risks to the property or the project, or opportunities to realize enhanced value for token holders.

In the event of such a sale, the Issuer shall apply the net proceeds of the sale (after deduction of applicable costs, taxes, and fees) towards the early wind-up of the financial product represented by the tokens. Token holders will receive their proportionate entitlement from the net sale proceeds in accordance with the terms of this White Paper and any applicable offering documents.

- Any decision to initiate a Property sale is taken in accordance with Tokinvest FZCO's internal governance, compliance, and conflict-of-interest frameworks, and is supported by independent valuation evidence and prevailing market conditions. Secondary market token prices are considered as contextual indicators only and are not determinative of sale timing.

2. Exit Property Valuation

- Tokinvest FZCO will instruct no fewer than three independent, licensed real estate agents to provide written valuations of the property.
- Where one valuation materially diverges from the others without objective market justification, Tokinvest may disregard the outlier valuation or commission an additional independent valuation to confirm pricing integrity.
- The property is then marketed at the median price of those three valuations, which becomes the **Exit Property Valuation**.

3. Marketing and Sale

- The property will be marketed at or above the Exit Property Valuation.
- If the property is not sold within six months, Tokinvest will obtain three further valuations, determine a revised median valuation, and relist the property at this updated price.
- This process will be repeated as necessary until the property is sold (the *Property Sale Price*).

4. Transparency of Process

- Tokinvest FZCO will publish on its platform all legal documents, valuations, and contracts relating to the sale, to provide tokenholders with full transparency of the settlement process.
- This disclosure obligation applies equally to all valuation materials, agency appointments, and sale documentation used in determining and executing the Property Sale.

5. Distribution of Proceeds

- Upon receipt of sale proceeds, Tokinvest will deduct:
 - Transaction costs (legal, conveyancing, valuation, agency commissions), and
 - Tokinvest's capital appreciation fee (5%).
- The Property will be sold in GBP. Where conversion from GBP is required prior to distribution, conversion will be effected using the relevant GBP/[distribution currency] reference rate captured at 12:00 GMT on the applicable conversion date, sourced from Tokinvest's designated pricing data provider, Fixer.io (APILayer). FX movements between issuance and sale may positively or negatively impact the amount distributed to tokenholders.
- The net proceeds will be distributed to tokenholders in proportion to their holdings and credited to their Tokinvest accounts.
- The capital appreciation fee is payable only upon completion of an actual Property sale and is calculated solely by reference to the realised sale price relative to the Property Value at Issuance.

6. Token Redemption

- Following completion of the sale and distribution of proceeds, all BREI Tokens relating to the property will be redeemed and burnt, formally terminating tokenholder rights in respect of the Property.
