

Tokinvest DMCC

Franklin OnChain U.S. Dollar Short-Term Money Market Fund

Virtual Asset Whitepaper (Secondary Distribution)

20th April 2026

REGULATORY DISCLAIMER

VARA has not taken any steps to verify the information set out in this whitepaper, including its accuracy and completeness, and has no responsibility for any loss arising from reliance on it. The liability for the content of the whitepaper rests solely with Tokinvest DMCC.

This whitepaper is a regulated disclosure document prepared in accordance with the requirements of the Dubai Virtual Assets Regulatory Authority (VARA). It is intended to provide prospective investors with a clear explanation of the Product and its distribution through the Tokinvest platform.

Core Product Sections (Sections 1–8)

These sections contain the primary investor-facing disclosure:

1. Key Features & Core Definitions
2. Product Overview
3. Parties, Roles & Responsibilities
4. Subscription, Redemption & Flow of Funds
5. Token Representation & Custody
6. Dealing, Pricing & Liquidity
7. Key Risks
8. Legal Structure & Important Disclosures

Appendices (Supporting Disclosures)

The appendices contain supporting detail required for completeness and regulatory transparency:

Appendix A – Tokinvest Overview, Governance & Regulatory Status

Appendix B – Regulatory Disclosures & Legal Information

This whitepaper provides a high-level description of:

- the tokenised fund product; and
- its distribution through Tokinvest

It does not replicate the full detail of the underlying fund documentation.

Investors should rely on:

- the Franklin Templeton prospectus for fund-level detail; and
- the Risk Disclosure Statement for a full description of risks

1. KEY FEATURES & CORE DEFINITIONS

This Section summarises the key structural, operational, and economic characteristics of the Product and defines the principal terms used throughout this document. Capitalised terms introduced in this Section have the meanings given below and apply throughout.

1.1 Overview

The Product is the Franklin OnChain U.S. Dollar Short-Term Money Market Fund (the “Sub-Fund”), a sub-fund of Franklin Templeton Investments VCC (the “Company”), a Variable Capital Company incorporated in Singapore.

The Sub-Fund is a tokenised collective investment scheme providing exposure to a diversified portfolio of high-quality, short-term, U.S. dollar-denominated money market instruments.

The Product is issued and managed by Franklin Templeton and is made available to investors through a distribution framework involving Tokinvest as a secondary distributor

1.2 Product Type

The Product is a money market fund structured as a Variable Capital Company (VCC) under Singapore law. Investor interests are recorded through:

- a legally recognised shareholder register maintained by the Issuer; and
- a tokenised or digital register maintained using distributed ledger technology.

Any tokenised representation reflects a record of ownership of fund shares and does not constitute a separate financial instrument.

1.3 Investment Objective

The Sub-Fund seeks to:

- provide a high level of current income; and
- preserve capital and maintain liquidity

by investing primarily in high-quality, short-term, U.S. dollar-denominated debt and money market instruments.

1.4 Underlying Assets

The Sub-Fund invests in a diversified portfolio of:

- short-term debt securities;
- money market instruments;
- bank deposits and cash equivalents; and
- government and quasi-government securities, including U.S. Treasury-related instruments.

1.5 Key Parties

The following entities are involved in the structure, management, and distribution of the Product:

- **Issuer (Company):** Franklin Templeton Investments VCC
- **Manager:** Templeton Asset Management Ltd
- **Sub-Manager:** Franklin Advisers, Inc.
- **Registrar and Transfer Agent:** Templeton Asset Management Ltd
- **Custodian:** DB International Trust (Singapore) Limited
- **Primary Distributor:** Pinetree Securities Pte. Ltd., which interfaces directly with the Issuer and facilitates subscriptions and redemptions at the fund level

- **Secondary Distributor / Platform Operator:** Tokinvest DMCC, which provides investor onboarding, order aggregation, execution, and platform access

Tokinvest interfaces with Pinetree as its counterparty and does not interact directly with the Issuer on behalf of underlying investors.

1.6 Role of Tokinvest

Tokinvest acts solely as:

- a secondary distributor of the Product; and
- the operator of the investor platform through which investors access the Product.

Tokinvest does not:

- issue the Product;
- manage the underlying assets;
- determine investment strategy; or
- guarantee performance or returns.

All investment management, asset selection, and valuation are performed by the Issuer and its appointed Manager.

1.7 Dealing and Liquidity

The Sub-Fund operates on a daily dealing basis. Subscriptions and redemptions are submitted by Tokinvest to the Primary Distributor (Pinetree) for execution at the fund level.

Tokinvest applies the following dealing parameters:

- Tokinvest cut-off: 3:00pm Dubai time (GST)
- Execution basis: forward-pricing based on the Net Asset Value (NAV) determined after the applicable fund-level cut-off

Instructions received after the Tokinvest cut-off are processed in the next dealing cycle.

Due to funding timelines, banking cut-offs, and operational processing across jurisdictions, transactions are generally submitted on a T+2 basis relative to investor instruction.

Liquidity is therefore subject to:

- Tokinvest cut-off times and operational processing timelines;
- funding and settlement requirements (including fiat transfer timing);
- dealing deadlines applied by the Primary Distributor and Issuer; and
- any applicable redemption limits, suspension rights, or prevailing market conditions.

While the Sub-Fund offers daily dealing, execution and settlement for investors will reflect the operational timelines of the distribution chain.

1.8 Valuation

The Sub-Fund is valued on each Dealing Day.

Net Asset Value (NAV) is calculated by the Issuer and forms the basis for all subscription and redemption pricing. The applicable dealing price is typically available within two Business Days following the relevant Dealing Day.

1.9 Currency and Foreign Exchange

- **Base currency of the Sub-Fund:** USD
- **Tokinvest subscription currency:** AED (initially), with additional currencies (including USD) expected to be supported

Subscriptions and redemptions made in a currency other than the Sub-Fund's base currency (USD) require foreign exchange conversion. Tokinvest performs this conversion, and the cost of conversion is borne by Tokinvest and is not passed on to investors.

Foreign exchange conversion does not, however, eliminate currency risk.

Investors remain exposed to movements in the exchange rate between AED (or any other subscription currency) and USD between the point of subscription and the point of redemption. The UAE Dirham (AED) is pegged to the U.S. Dollar, which may reduce, but does not eliminate, this risk.

1.10 Distributions

Distributions, if any, are at the discretion of the Directors of the Company.

As at the date of this document, the Sub-Fund does not intend to make periodic distributions, and returns are expected to be reflected in NAV performance.

1.11 Capital Protection

The Product does not provide:

- capital protection;
- guaranteed returns; or
- any form of insurance or principal preservation mechanism.

Investors may lose part or all of their invested capital.

1.12 Nature of Investor Rights

Investors:

- obtain economic exposure to the Sub-Fund through Tokinvest's distribution framework;
- are entitled to economic participation in the performance of the Sub-Fund based on NAV; and
- do not hold direct ownership of the underlying securities within the portfolio.

All rights are governed by the Prospectus and applicable fund documentation issued by the Issuer.

1.13 Tokenisation Framework

The Sub-Fund utilises a tokenised register at the Issuer level, which:

- links investor identity to wallet addresses;
- records ownership using distributed ledger infrastructure; and
- operates alongside traditional register systems.

Within the Tokinvest platform, investor positions are represented through internal tokenised records ("mirror tokens"), which:

- reflect each investor's economic interest in Tokinvest's aggregate holdings in the Sub-Fund; and
- do not constitute direct ownership at the Issuer level.

Neither the tokenised register nor any mirror tokens constitute separate financial instruments.

1.14 Product Identifiers & Reference Data

The following identifiers and reference information relate to the Sub-Fund:

- ISIN: SGXZZ1843866
- Fund Domicile: Singapore
- Fund Structure: Variable Capital Company (VCC)
- Asset Class: Money Market Fund
- Benchmark: Bloomberg U.S. Treasury 1–3 Month Index
- Minimum Investment (Fund Level): USD 20
- Minimum Investment (through Tokinvest): USD 100,000 (or equivalent in other supported currencies) (subject to change)

Further details are set out in the official fund documentation issued by Franklin Templeton.

1.15 Important Distinction

The Product is:

- issued and managed by Franklin Templeton; and
- made available to investors via Tokinvest as a distribution platform.

Tokinvest does not act as issuer, asset manager, or fiduciary and does not assume responsibility for the investment performance of the Sub-Fund.

2. PRODUCT OVERVIEW

2.1 Overview

The Product provides investors with access to the Franklin OnChain U.S. Dollar Short-Term Money Market Fund (the “Sub-Fund”), a regulated fund managed by Franklin Templeton.

The Sub-Fund invests in a diversified portfolio of high-quality, short-term, U.S. dollar-denominated instruments with the objective of generating income while preserving capital and maintaining liquidity.

The Product relates specifically to the distribution of Class A shares of the Sub-Fund (the “Relevant Share Class”), as described in the official fund documentation issued by Franklin Templeton.

Tokinvest makes the Product available to investors through its platform as a secondary distributor, providing access to the Sub-Fund through a digital interface.

2.2 Nature of the Product

The Product is a regulated collective investment scheme and does not constitute a standalone virtual asset issued by Tokinvest.

Tokenisation is used as an operational and record-keeping mechanism at both the fund and platform level to:

- represent investor holdings digitally;
- support custody and internal record-keeping; and
- enable integration with the Tokinvest platform.

The Product does not create a new asset class or alter the underlying legal or economic structure of the Sub-Fund or the Relevant Share Class.

2.3 Role of Tokinvest

Tokinvest acts as:

- a secondary distributor of the Product; and
- the operator of the investor platform through which investors access the Product.

Tokinvest enables investors to:

- submit subscription instructions;
- hold positions within a controlled custody environment; and
- submit redemption instructions.

Tokinvest aggregates investor instructions and submits them to the Primary Distributor (Pinetree Securities Pte. Ltd.) for execution at the fund level.

Tokinvest does not:

- manage the underlying assets;
- determine investment strategy;
- influence valuation or pricing; or
- act as counterparty to the Sub-Fund.

2.4 Investment Exposure

Investors obtain economic exposure to the performance of the Sub-Fund through Tokinvest's distribution framework.

The performance of the Product is driven by:

- income generated from the underlying money market instruments; and
- prevailing interest rate conditions.

Returns are reflected through changes in the Net Asset Value (NAV) of the Relevant Share Class of the Sub-Fund.

2.5 Token Representation

Investor holdings are represented within the Tokinvest platform through internal tokenised records ("mirror tokens").

These mirror tokens:

- reflect each investor's proportional economic interest in Tokinvest's aggregated holdings in the Relevant Share Class of the Sub-Fund; and
- are used for custody, reporting, and internal platform functionality.

Mirror tokens:

- do not represent direct ownership of the Sub-Fund at the Issuer level; and
- do not constitute separate financial instruments.

2.6 Access and Participation

Participation in the Product is limited to investors who:

- complete Tokinvest onboarding and AML/KYC requirements; and
- meet applicable eligibility and compliance requirements.

Investors:

- do not subscribe directly with the Issuer or the Primary Distributor; and
- do not hold positions directly on the register of the Sub-Fund.

All access to the Product is provided through Tokinvest.

2.7 Relationship to Fund Documentation

This document provides a high-level overview of the Product and its distribution through Tokinvest.

Full details of the Sub-Fund and the Relevant Share Class are set out in the official fund documentation issued by Franklin Templeton, including the prospectus and key investor information.

In the event of any inconsistency, the official fund documentation shall prevail.

Investors should review the underlying fund documentation before making any investment decision.

3. PARTIES, ROLES & RESPONSIBILITIES

3.1 Overview

The Product involves multiple parties across issuance, management, distribution, and custody. Tokinvest provides investor access to the Product through its platform but does not issue, manage, or operate the Sub-Fund.

3.2 Issuer and Fund Manager

- **Issuer:** Franklin Templeton Investments VCC
- **Manager:** Templeton Asset Management Ltd
- **Sub-Manager:** Franklin Advisers, Inc.

The Issuer (acting through its appointed Manager) is responsible for:

- establishing and operating the Sub-Fund;
- portfolio management and investment decisions;
- valuation and Net Asset Value (NAV) calculation; and
- overall fund governance and oversight.

3.3 Primary Distributor

Pinetree Securities Pte. Ltd. acts as the Primary Distributor and interfaces directly with the Issuer. Pinetree is responsible for:

- processing subscriptions and redemptions at the fund level; and
- maintaining its relationship with the Issuer and its appointed service providers.

Pinetree acts as the counterparty to Tokinvest in respect of all fund-level transactions.

Tokinvest submits aggregated investor instructions to Pinetree and does not interact directly with the Issuer.

3.4 Tokinvest (Secondary Distributor & Platform Operator)

Tokinvest DMCC acts as:

- the secondary distributor of the Product; and
- the operator of the investor platform.

Tokinvest is responsible for:

- investor onboarding and AML/KYC;
- aggregation of investor instructions and submission to Pinetree;
- client money handling and settlement;
- maintenance of internal investor records; and
- investor servicing and reporting.

Tokinvest does not:

- manage the Sub-Fund or control investment decisions;
- influence valuation or pricing; or
- guarantee performance or returns.

3.5 Custody

Investor positions within the Tokinvest platform are maintained within a platform-controlled custody framework supported by third-party custody providers.

As at the date of this document, custody services are provided through Hex Trust.

Custody providers are responsible for:

- safeguarding digital assets within the platform environment; and
- supporting secure holding and transfer of digital representations of investor positions.

Investors:

- do not self-custody assets;
- do not interact directly with the custodian; and
- access their holdings solely through the Tokinvest platform.

3.6 Investor Relationship

Investors:

- access the Product exclusively through Tokinvest;
- do not have a direct contractual relationship with the Issuer or Primary Distributor; and
- rely on Tokinvest for submission of instructions, custody access, and investor servicing.

All investor-facing services are provided by Tokinvest.

3.7 Responsibility Summary

- **Franklin Templeton:** fund structure, investment management, valuation, and NAV determination
- **Pinetree:** fund-level distribution, execution, and intermediary relationship with the Issuer
- **Tokinvest:** investor access, instruction aggregation, platform operation, and investor servicing

Each party operates within its defined role and is responsible only for the functions described above.

4. SUBSCRIPTION, REDEMPTION & FLOW OF FUNDS

4.1 Overview

Investors access the Product exclusively through the Tokinvest platform. Tokinvest aggregates investor instructions and submits them to the Primary Distributor (Pinetree) for execution at the fund level. Tokinvest acts as the sole counterparty to Pinetree in respect of subscriptions and redemptions submitted through its platform.

4.2 Subscription Process

The subscription process operates as follows:

1. **Onboarding**
Investors complete onboarding, including AML/KYC verification and account setup on the Tokinvest platform.
2. **Funding**
Investors deposit funds into their Tokinvest account via approved funding rails.
3. **Instruction**
Subscription instructions are submitted through the platform prior to the applicable cut-off time.
4. **Aggregation**
Tokinvest aggregates investor instructions into a single subscription order.
5. **Execution**
The aggregated order is submitted to Pinetree for execution at the fund level.
6. **Allocation**
Following execution, holdings are allocated to investors based on their respective subscription amounts and recorded within Tokinvest's internal systems.

4.3 Minimum Subscription Amount

Subscription amounts are subject to:

- minimum investment thresholds applied by the Issuer at the fund level; and
- any minimum subscription amounts determined by Tokinvest for operational or commercial purposes.

Tokinvest may apply minimum subscription sizes on a per-order or per-investor basis, which may differ from the minimum investment specified in the underlying fund documentation.

4.4 Redemption Process

Redemptions follow a corresponding process:

1. Investors submit redemption instructions via the platform.
2. Tokinvest aggregates redemption requests.
3. Instructions are submitted to Pinetree for execution at the fund level.
4. Proceeds, once received, are credited to investor accounts.

Redemptions are subject to fund-level processing, liquidity conditions, and operational timelines across the distribution chain.

4.5 Flow of Funds

Subscription:

Investor → Tokinvest Client Money Account → Pinetree → Issuer (Sub-Fund)

- Investor funds are held in segregated Client Money Accounts (CMAs).
- Tokinvest transfers aggregated funds to Pinetree.
- Pinetree executes the subscription with the Issuer.

Redemption:

Issuer (Sub-Fund) → Pinetree → Tokinvest → Investor

- Redemption proceeds are paid by the Issuer to Pinetree.
- Proceeds are then transferred to Tokinvest.
- Funds are credited to investor accounts upon receipt.

4.6 Dealing Cycle

Subscriptions and redemptions are processed on a daily dealing basis at the level of the Sub-Fund. Tokinvest applies the following dealing parameters:

- **Tokinvest cut-off:** 3:00pm Dubai time (GST)
- **Instructions received after the cut-off:** processed in the next dealing cycle

Tokinvest applies this cut-off to allow for:

- order aggregation;
- funding confirmation; and
- submission to the Primary Distributor (Pinetree).

All transactions are executed on a forward-pricing basis using the Net Asset Value (NAV) determined after the applicable fund-level cut-off.

Due to funding timelines, banking cut-offs, and operational processing across jurisdictions, transactions are typically submitted on a T+2 basis relative to investor instruction, although actual timing may vary.

4.7 Settlement

Settlement is performed through standard fund subscription and redemption processes across the distribution chain.

Funds are transferred from Tokinvest to Pinetree via:

- telegraphic transfer (USD); and
- digital settlement rails (e.g. USDC/USDT), where supported in future, subject to regulatory approval and operational readiness.

Settlement timelines are dependent on:

- funding receipt and banking cut-off times;
- payment processing timelines; and
- operational coordination across Tokinvest, Pinetree, and the Issuer.

As a result, settlement will generally occur on a T+2 basis or longer, depending on payment method, processing conditions, and upstream fund timelines.

4.8 Investor Position

Investors:

- do not submit instructions directly to the Issuer or Primary Distributor;
- are represented by Tokinvest in all subscription and redemption activity; and
- receive allocations and proceeds through the Tokinvest platform.

Tokinvest maintains internal records of investor holdings and transactions within its platform, which are reconciled against aggregate positions held via Pinetree.

5. TOKEN REPRESENTATION & CUSTODY

5.1 Overview

Investor holdings in the Product are represented within the Tokinvest platform through a controlled, tokenised framework.

This framework enables digital record-keeping, custody integration, and operational functionality. The underlying fund interests are held through the distribution chain via Pinetree and are not directly held by investors.

5.2 Upstream Fund Holdings

The Issuer maintains the official register of ownership of the Sub-Fund through its appointed Registrar and Transfer Agent.

Fund interests are allocated to distributor accounts, including those of Pinetree. Tokinvest's aggregate position in the Sub-Fund is reflected within the relevant Pinetree account and may be commingled with positions attributable to other distributors or sub-distributors within that account.

Tokinvest is recognised by Pinetree as a single investor at the distributor level. Underlying investors are not recorded or recognised by Pinetree, the Issuer, or the fund registrar.

5.3 Token Representation (Mirror Tokens)

Within the Tokinvest platform, investor holdings are represented through internal tokenised records ("mirror tokens").

These mirror tokens:

- reflect each investor's proportional economic interest in Tokinvest's aggregate holdings in the Sub-Fund;
- are used for custody, reporting, and internal platform functionality; and
- do not represent direct ownership of the Sub-Fund at the Issuer level.

Mirror tokens:

- are not issued by the Issuer;
- do not constitute separate financial instruments; and
- are not recognised on the Issuer's official register.

Mirror tokens exist solely within the Tokinvest platform and form part of Tokinvest's internal record-keeping framework.

5.4 Custody Model

Investor holdings are maintained within a platform-controlled custody framework supported by regulated third-party custodians.

As at the date of this document, custody services are provided through Hex Trust.

- Investors do not have the ability to self-custody mirror tokens.
- Mirror tokens cannot be withdrawn to external wallets.
- All investor positions remain within the Tokinvest-controlled platform environment.

Tokinvest may utilise alternative or additional regulated custody providers where appropriate, subject to regulatory requirements.

5.5 Backing and Reconciliation

Tokinvest seeks to maintain a 1:1 economic alignment between:

- its aggregate holdings in the Sub-Fund (via Pinetree); and
- the total mirror tokens recorded on its platform.

Reconciliation processes are performed on a regular basis to align:

- aggregate upstream fund positions; and
- investor-level records maintained within the Tokinvest platform.

Tokinvest is solely responsible for maintaining investor-level records and for mapping those records to its aggregate position held via Pinetree. Such records are not independently verified or recognised by the Issuer, Pinetree, or the fund registrar.

5.6 Transferability

Transfers of mirror tokens, where permitted:

- are restricted to the Tokinvest platform;
- are limited to approved and onboarded investors; and
- are subject to applicable compliance, operational, and regulatory controls.

Mirror tokens cannot be transferred to external wallets or to unapproved platforms.

5.7 Nature of Investor Rights

Investors:

- do not hold direct positions with the Issuer or Primary Distributor;
- do not have access to upstream fund-level accounts; and
- hold their interests solely through Tokinvest's platform and internal record-keeping framework.

Investor rights are limited to economic participation in the Sub-Fund as facilitated through Tokinvest and are contractual in nature.

6. DEALING, PRICING & LIQUIDITY

6.1 Pricing

The Product is priced based on the Net Asset Value (NAV) of the Sub-Fund.

- NAV is determined by the Issuer on each Dealing Day.
- All subscriptions and redemptions are executed on a forward-pricing basis.
- The applicable price is the NAV calculated after the relevant dealing cut-off applied by the Issuer.

Tokinvest does not determine or influence pricing.

6.2 Dealing

The Product operates on a daily dealing basis at the level of the Sub-Fund.

Tokinvest applies the following dealing parameters:

- Tokinvest cut-off: 3:00pm Dubai time (GST).
- Instructions received after the cut-off are processed in the next dealing cycle.

Tokinvest applies this cut-off to facilitate order aggregation, funding confirmation, and submission to the Primary Distributor (Pinetree).

All transactions are executed on a forward-pricing basis using the NAV determined after the applicable fund-level cut-off.

Due to funding timelines, banking cut-offs, and operational processing across jurisdictions, transactions are typically processed on a T+2 basis, although actual timing may vary.

6.3 Liquidity

The Sub-Fund offers daily subscription and redemption at the fund level.

However, investor liquidity is subject to:

- Tokinvest cut-off times and operational processes;
- funding and settlement timelines across the distribution chain;
- dealing and settlement timelines applied by the Issuer and Primary Distributor; and
- any applicable redemption limits, suspensions, or prevailing market conditions.

As a result, while the Sub-Fund operates on a daily dealing basis, investor access to liquidity is dependent on the operational timelines of the full distribution chain.

Liquidity is not guaranteed, and investors may experience delays in accessing or realising their investment.

6.4 Currency and Foreign Exchange

The Sub-Fund is denominated in USD, while Tokinvest may offer subscriptions in AED and other supported currencies.

Where subscriptions or redemptions are made in a currency other than USD, foreign exchange conversion will be required.

Investors are exposed to currency fluctuations, which may impact returns. The UAE Dirham (AED) is pegged to the U.S. Dollar; however, this does not eliminate foreign exchange risk.

6.5 No Secondary Market

The Product does not currently provide an active secondary trading market. Investor liquidity is achieved primarily through redemption at NAV via the dealing process.

6.6 Fees and Charges

Investment in the Product is subject to fees and charges at the fund level, a platform fee charged by Tokinvest, and may also involve additional transaction-related costs.

Fund-Level Fees

The Sub-Fund charges management fees and other expenses, as disclosed in the official Franklin Templeton prospectus and related documentation. These fees are reflected in the Net Asset Value (NAV). As at the date of this document, the management fee is 0.20% per annum, although this may change in accordance with the fund documentation.

Platform Fee

Tokinvest charges a platform fee on all subscriptions made through the Tokinvest platform. As at the date of this document, the platform fee is 0.10% of the subscription amount. The platform fee is applied at the point of subscription and is deducted from the subscription amount, with the net amount applied to the investment in the Sub-Fund. The platform fee is retained by Tokinvest in respect of platform access and operational services, and is separate from, and additional to, the fund-level fees reflected in the NAV. No platform fee is charged on redemptions. The platform fee may change in accordance with the Tokinvest Terms of Business.

Other Costs

Additional costs may arise in connection with:

- banking and payment processing; and,
- use of digital settlement rails (e.g. USDC/USDT), where supported.

In addition to the platform fee described above, Tokinvest may receive distribution or placement-related fees from the Primary Distributor or Issuer. Such arrangements do not result in any further charge to investors beyond the platform fee and the fees and costs reflected in the NAV or otherwise disclosed in this section.

Further details of applicable fees and charges are available through the Tokinvest platform and Terms of Business.

7. KEY RISKS

7.1 Overview

An investment in the Product involves risk. The value of investments may go up or down, and investors may lose part or all of their invested capital.

This Section provides a summary of key risks associated with accessing the Product through Tokinvest and does not constitute a complete description of all risks.

Investors should review:

- the official fund documentation issued by Franklin Templeton for fund-level risks; and
- the Risk Disclosure Statement (RDS) for a comprehensive description of platform, custody, operational, and structural risks.

7.2 Fund and Market Risk

The performance of the Product depends on the performance of the Sub-Fund.

Risks include:

- changes in interest rates;
- credit risk of underlying issuers; and
- broader market conditions affecting short-term fixed income instruments.

Returns are not guaranteed.

7.3 Liquidity Risk

While the Sub-Fund offers daily dealing, liquidity is not guaranteed.

Investors may experience:

- delays in redemption processing; or
- restrictions arising from fund-level conditions, liquidity constraints, or operational factors across the distribution chain.

7.4 Foreign Exchange Risk

The Sub-Fund is denominated in USD, while investors may subscribe or redeem in AED or other currencies.

Foreign exchange movements may:

- reduce returns; or
- increase volatility in realised outcomes.

Tokinvest does not hedge foreign exchange exposure on behalf of investors.

7.5 Platform and Intermediation Risk

Investors access the Product through Tokinvest and do not interact directly with the Issuer or Primary Distributor.

As a result:

- investors rely on Tokinvest for execution, custody integration, and servicing; and
- any disruption to Tokinvest's platform, systems, or operations may impact access to the Product or the ability to transact.

Investment in the Product depends on the proper functioning of the full distribution chain, including Tokinvest, Pinetree, and the Issuer.

7.6 Custody Risk

Investor holdings are maintained within a platform-controlled custody framework supported by third-party custodians.

Risks include:

- failure or disruption of custody providers;
- loss, delay, or restriction of access to assets due to operational or security events; and
- reliance on third-party systems, controls, and infrastructure for asset safekeeping.

7.7 Structural and Record-Keeping Risk

Investor exposure to the Sub-Fund is indirect.

- Tokinvest is recognised as a single investor at the distributor level.
- Underlying investors are not recorded or recognised by the Issuer, Pinetree, or the fund registrar.

Investor holdings are determined solely by Tokinvest's internal records, which are used to map investor entitlements to Tokinvest's aggregate position in the Sub-Fund.

As a result:

- investors rely on the accuracy and integrity of Tokinvest's record-keeping systems; and
- any failure, discrepancy, or delay in these systems or reconciliation processes may result in:
 - delays in processing;
 - inconsistencies in recorded holdings; or
 - temporary or prolonged restriction of access to investor positions.

In certain circumstances, including insolvency or operational failure, recovery of investor interests may depend on these records and applicable legal processes.

7.8 Regulatory Risk

The Product operates within a regulated environment.

Changes in applicable laws or regulatory requirements may:

- affect the availability of the Product;
- restrict investor access; or
- impact the operation of the platform or distribution model.

7.9 Technology Risk

The Product incorporates digital systems and tokenised record-keeping infrastructure.

Risks include:

- system failures or outages;
- data integrity issues; and
- cybersecurity threats.

7.10 Further Information

This summary is not exhaustive.

Investors should refer to the Franklin Templeton prospectus and the Risk Disclosure Statement (RDS) for a full description of risks.

8. LEGAL STRUCTURE & IMPORTANT DISCLOSURES

8.1 Nature of the Product

The Product provides economic exposure to a regulated fund issued and managed by Franklin Templeton. Investor holdings:

- do not constitute direct ownership of underlying portfolio assets;
- do not constitute direct ownership of fund units at the Issuer level;
- are not deposits or guaranteed investments; and
- are subject to the terms of the Sub-Fund and applicable fund documentation.

8.2 Investor Position

Investors access the Product through Tokinvest and:

- do not hold a direct contractual relationship with the Issuer or Primary Distributor;
- do not appear on the fund register at the Issuer level; and
- are represented through Tokinvest's aggregated position.

Investor rights are limited to economic participation in the Sub-Fund as facilitated through Tokinvest. Investors have a contractual relationship solely with Tokinvest in respect of platform access, execution, custody integration, and related services.

8.3 Role of Tokinvest

Tokinvest acts as:

- a secondary distributor; and
- the operator of the investor platform.

Tokinvest is responsible for:

- onboarding and AML/KYC;
- order aggregation and submission for execution;
- custody integration and record-keeping; and
- investor servicing.

Tokinvest does not:

- manage the Sub-Fund;
- control investment decisions; or
- guarantee performance or returns.

8.4 Token Representation

Investor holdings are represented within the Tokinvest platform through internal tokenised records ("mirror tokens").

These mirror tokens:

- reflect each investor's proportional economic interest in Tokinvest's aggregate holdings in the Sub-Fund;
- are used for custody, reporting, and platform functionality; and
- do not constitute direct ownership at the Issuer level or separate financial instruments.

Mirror tokens are not issued by the Issuer and are not recognised on the Issuer's official register.

8.5 Custody and Control

Investor holdings are maintained within a platform-controlled custody framework supported by regulated third-party custodians.

- Investors do not self-custody assets.
- Transfers are restricted to the Tokinvest platform.
- Access and control are subject to platform rules, custody arrangements, and regulatory requirements.

8.6 No Ownership or Control Rights

Investors:

- do not have legal or beneficial ownership of the underlying portfolio assets;
- do not have direct ownership of fund units at the Issuer level;
- do not have governance or voting rights; and
- do not participate in fund-level decision-making.

All investment decisions are made by the Issuer and its appointed Manager.

8.7 Reliance on Third Parties

The Product depends on multiple third parties, including:

- the Issuer and fund manager;
- the Primary Distributor;
- custody providers; and
- Tokinvest's platform infrastructure.

Tokinvest is recognised as a single investor at the distributor level, and upstream holdings may be maintained in commingled distributor-level accounts.

Any failure, disruption, or insolvency affecting these parties may impact investor outcomes.

8.8 Insolvency and Structural Considerations

Investors do not hold direct claims against the Issuer, the Primary Distributor, or the underlying assets of the Sub-Fund.

Underlying investors are not recognised at the level of Pinetree, the Issuer, or the fund registrar. Investor entitlements are determined solely by Tokinvest's internal records and reconciliation processes.

In the event of insolvency or operational failure of Tokinvest or any other relevant party:

- investor access to the Product may be delayed, restricted, or suspended;
- recovery of assets will depend on applicable legal frameworks, custody arrangements, and Tokinvest's rights within the distribution chain; and
- outcomes may be uncertain, including the risk of partial or total loss.

Investors should assume that their rights are contractual in nature and subject to applicable law.

8.9 Regulatory Considerations

The Product is distributed within a regulated framework.

However:

- regulatory treatment may vary across jurisdictions; and

- changes in law or regulation may affect availability, transferability, or access.

Investors are responsible for complying with applicable local laws.

8.10 No Investment Advice

Tokinvest does not provide financial, legal, or investment advice.

Nothing in this document constitutes a recommendation or suitability assessment.

Investors are responsible for making their own investment decisions.

8.11 Limitation of Liability

To the extent permitted by applicable law:

- Tokinvest is not liable for the market performance of the Sub-Fund; and
- Tokinvest's liability is limited to the performance of its operational responsibilities.

Nothing excludes liability for fraud, wilful misconduct, or matters that cannot be excluded under applicable law.

8.12 Further Information

This document is a summary of the Product and its distribution through Tokinvest.

Investors must refer to:

- the official Franklin Templeton fund documentation for fund-level details; and
- the Risk Disclosure Statement (RDS) for a comprehensive description of platform, custody, operational, and structural risks.

These documents should be read together before making any investment decision.

APPENDIX A

TOKINVEST OVERVIEW, GOVERNANCE AND REGULATORY STATUS

A.1 Tokinvest DMCC

Tokinvest DMCC is a company incorporated in the United Arab Emirates, with its registered address at Unit No: UT-12-PO-8, DMCC Business Centre, Level 12, Uptown Tower, Dubai, United Arab Emirates.

In relation to the Product described in this whitepaper, Tokinvest acts as:

- a secondary distributor; and
- the operator of the investor platform through which investors access the Product

Tokinvest is not the issuer or manager of the Product.

A.2 Incorporation and Registration

Tokinvest DMCC is registered under DMCC licence number DMCC-928046 and was incorporated on 10 May 2024.

A.3 Regulatory Status

Tokinvest DMCC is licensed by the Dubai Virtual Assets Regulatory Authority ("VARA") as a Broker-Dealer and Issuer under licence number VL/2024/12/004.

In relation to the Product described in this whitepaper, Tokinvest acts solely as a distributor and platform operator.

A.4 Ownership and Senior Management

Tokinvest DMCC is an independently owned entity with no parent company.

Its senior management includes:

- **Scott Thiel** – Chief Executive Officer
- **Matt Blom** – Chief Strategy Officer
- **Robert Cooper** – Chief Operating Officer
- **James Byrne** – Chief Technology Officer

The senior management team has experience across digital assets, financial markets, regulated financial services, operations, and technology.

A.5 Fit and Proper Status

To the best of Tokinvest's knowledge and based on information available at the date of this document:

- no member of its senior management or key decision-makers has been convicted of offences involving fraud, financial crime, or dishonesty; and
- no such individuals are subject to ongoing criminal investigations or regulatory enforcement actions

A.6 Governance Framework

Tokinvest operates under a formal governance framework designed to ensure effective oversight, accountability, and risk management across its regulated activities.

Oversight includes:

- business strategy and product approval;
- regulatory compliance;

- enterprise risk management;
- technology and cybersecurity; and
- operational controls

This framework is supported by internal governance forums and committees, including risk, compliance, and technology oversight functions.

The governance arrangements described in this Appendix are intended to support regulatory oversight and do not create contractual rights for investors.

A.7 New Product Approval

Products made available through the Tokinvest platform are subject to Tokinvest's internal new product approval process.

This process includes structured assessment of:

- strategic alignment;
- legal and regulatory considerations;
- operational readiness;
- custody and settlement arrangements;
- financial crime risks; and
- technology and reputational risks

Approval requirements are determined according to the assessed risk profile of the Product.

A.8 Financial Controls and Regulatory Capital

Tokinvest maintains regulatory capital in accordance with VARA requirements.

The company:

- maintains segregation between regulatory capital, operational funds, and client money;
- submits periodic financial and capital adequacy reports to VARA; and
- is subject to annual external audit by a UAE-registered audit firm

A.9 Client Money and Asset Safeguarding

Client fiat funds received in connection with subscriptions and redemptions are held in segregated client money accounts with authorised banking institutions.

Tokinvest is not a standalone VARA-regulated custodian. Digital asset custody is facilitated as an incidental activity to its Broker-Dealer services using:

- VARA-licensed third-party custodians; and/or
- regulated custody technology providers

Tokinvest remains responsible for oversight of these arrangements in accordance with applicable regulatory requirements.

A.10 AML / CFT and Financial Crime Controls

Tokinvest maintains AML/CFT policies and procedures in compliance with:

- VARA Rulebooks; and
- applicable UAE AML/CFT legislation

All investors accessing the Product through Tokinvest are subject to:

- customer due diligence and KYC;

- beneficial ownership verification (where applicable);
- sanctions and adverse media screening; and
- ongoing transaction monitoring

Enhanced due diligence is applied where required.

Oversight is performed by Tokinvest's appointed Money Laundering Reporting Officer (MLRO).

A.11 Outsourcing and Third-Party Providers

Tokinvest relies on third-party service providers for certain operational functions, including:

- banking and payment services;
- digital asset custody;
- blockchain infrastructure; and
- technology and security services

All outsourcing arrangements are subject to due diligence, contractual controls, and ongoing oversight. Outsourcing does not relieve Tokinvest of its regulatory responsibilities.

A.12 Conflicts of Interest and Market Conduct

Tokinvest maintains policies and controls to identify, manage, and mitigate conflicts of interest arising from its role as distributor and platform operator.

These include:

- segregation of duties;
- governance oversight and approval processes;
- restrictions on inappropriate internal activity; and
- market conduct and surveillance controls, where applicable

Tokinvest does not manage the Product and does not determine the underlying investment strategy or portfolio composition.

A.13 Role in Relation to the Product

In relation to the Product described in this whitepaper, Tokinvest is responsible for:

- investor onboarding and AML/KYC;
- order aggregation and submission to the Primary Distributor;
- client money handling, settlement and reconciliation;
- custody integration and investor record-keeping; and
- investor servicing through its platform

Tokinvest does not:

- issue the Product;
- manage the Sub-Fund;
- control valuation or NAV calculation; or
- guarantee investment performance or returns

A.14 Other Key Parties

Other parties involved in the Product include:

- **Franklin Templeton Investments VCC** – Issuer
- **Templeton Asset Management Ltd** – Manager and Registrar / Transfer Agent

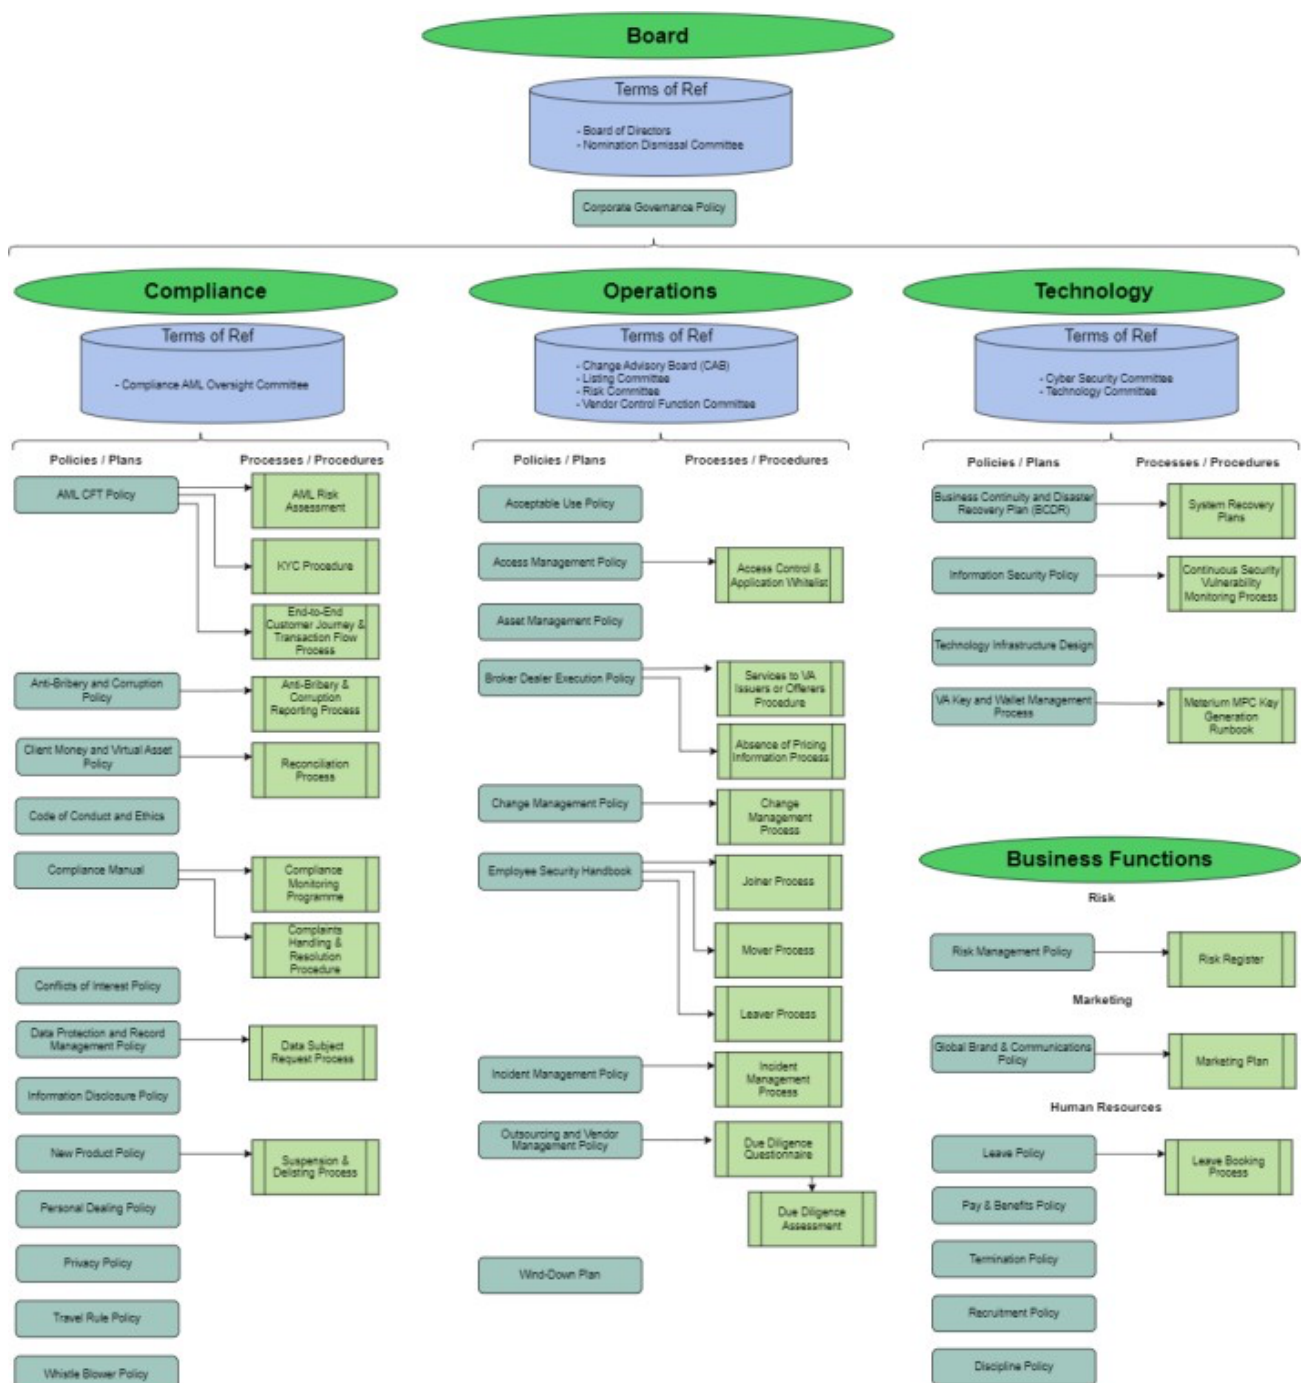

- **Franklin Advisers, Inc.** – Sub-Manager
- **DB International Trust (Singapore) Limited** – Custodian
- **Pinetree Securities Pte. Ltd.** – Primary Distributor

These parties operate within their own defined roles and responsibilities.

Tokinvest is not responsible for the performance of functions carried out by these parties outside the scope of its role as distributor and platform operator.

A.15 Governance, Risk and Product Approval Flow (Illustrative)

The diagram below provides a high-level, illustrative overview of Tokinvest's governance, risk oversight, and product approval structure as it relates to products made available through the Tokinvest platform. This diagram is provided for explanatory purposes only and does not form part of the contractual terms applicable to the Product.

APPENDIX B

REGULATORY DISCLOSURES & LEGAL INFORMATION

B.1 Status of this Whitepaper

This whitepaper is a regulated disclosure document prepared by Tokinvest DMCC in accordance with the requirements of the Dubai Virtual Assets Regulatory Authority ("VARA").

This document:

- does not constitute a prospectus under UAE securities legislation;
- does not constitute an offer of securities by Tokinvest or a solicitation in any jurisdiction where such activity would be unlawful; and
- is intended to provide a high-level description of the Product and its distribution through the Tokinvest platform.

This whitepaper must be read together with:

- the applicable Risk and Disclosure Statement (RDS);
- the official fund documentation issued by Franklin Templeton (including the prospectus and key investor information); and
- Tokinvest's Brokerage Terms of Business.

B.2 No Investment Advice

This whitepaper is provided for informational and disclosure purposes only.

Tokinvest:

- does not provide investment advice or personalised recommendations;
- does not act as a fiduciary, adviser, or portfolio manager; and
- does not assess the suitability or appropriateness of the Product for individual investors.

Investors are responsible for determining whether the Product is appropriate for their own circumstances.

B.3 Eligibility and Jurisdictional Restrictions

Access to the Product is limited to investors who:

- complete Tokinvest's onboarding and AML/KYC requirements; and
- meet applicable eligibility, regulatory, and compliance requirements.

The Product may not be offered or made available in jurisdictions where such distribution would be unlawful.

Tokinvest may:

- restrict or refuse access;
- suspend transactions; or
- impose additional controls,

where required to comply with applicable law, regulation, or internal compliance policies.

B.4 Nature of Tokinvest's Role

Tokinvest acts solely as:

- a secondary distributor of the Product; and

- the operator of the investor platform.

Tokinvest:

- is not the issuer of the Product;
- does not manage the underlying assets; and
- does not guarantee performance or returns.

All investment management, valuation, and asset-level decisions are performed by the Issuer and its appointed Manager.

B.5 Reliance on Third Parties

The Product relies on multiple third parties, including:

- the Issuer and fund manager;
- the Primary Distributor (Pinetree);
- custody providers; and
- banking and payment partners.

Tokinvest is not responsible for the performance, actions, or omissions of these parties outside the scope of its own role.

B.6 Amendments and Updates

Tokinvest may amend or update this whitepaper in accordance with applicable regulatory requirements. Material updates will be communicated through the Tokinvest platform or other appropriate channels.

B.7 Governing Law and Jurisdiction

Unless otherwise specified in applicable contractual documentation, this whitepaper and the contractual relationship between Tokinvest and investors are governed by English law.

Tokinvest submits to the jurisdiction of the courts of the Dubai International Financial Centre (DIFC), subject to applicable law.

B.8 Hierarchy of Documents

This whitepaper is a summary document.

In the event of any inconsistency between:

- this whitepaper;
- the Risk and Disclosure Statement;
- the Tokinvest Terms of Business; and
- the official Franklin Templeton fund documentation,

the relevant contractual and fund documentation shall prevail to the extent permitted by applicable law.

B.9 Entirety of Disclosure

This whitepaper should be read together with:

- the Risk and Disclosure Statement (RDS); and
- the official Franklin Templeton fund documentation.

These documents together form the overall disclosure framework for the Product.
