

**INFORMATION MEMORANDUM DATED 26 February 2026
as amended on 16 March 2026**

LCL OPPORTUNITIES 3 S.à r.l.

A Luxembourg private limited liability company (*société à responsabilité limitée*), having its registered office at 34, rue du Curé, L-1368 Luxembourg, Grand Duchy of Luxembourg, registered with the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*) under number B 260326 (the “**Issuer**”)

Up to EUR 1,000,000 secured digital bonds issuance programme (the “**Programme**”)

The Issuer accepts full responsibility for the accuracy of the information contained in information memorandum (the “Information Memorandum”) and confirms, having made reasonable enquiry, that to the best of its knowledge and belief there are no other facts the omission of which would make any statement within this Information Memorandum misleading.

This Information Memorandum is provided for information purposes only. It does not constitute and is not construed as any advice, solicitation, offer, endorsement, commitment or recommendation to invest in the securities described herein. The provision of the Information Memorandum is not and shall not be a substitute for your own researches, investigations, verifications, checks or consultation for professional or investment advice.

YOU ARE USING THIS INFORMATION MEMORANDUM AT YOUR OWN RISKS.

This Information Memorandum must only be used for the purposes for which it has been published. The Digital Bonds may not be offered to the public or indirectly to the public unless the requirements of the Luxembourg law have been satisfied. Any person making or intending to make any offer of the Digital Bonds in any Member State of the EEA may only do so in circumstances in which no obligations arises for the Issuer to prepare a prospectus pursuant to article 3 of the Prospectus Regulation. The Issuer has not authorised, nor does the Issuer authorise, the making of any offer of the Digital Bonds in circumstances in which an obligation arises for it to publish a prospectus for such offer in any jurisdiction.

This Information Memorandum has been prepared on the basis that any offer of Digital Bonds in any Member State of the EEA (each, a “**Relevant Member State**”) will be made pursuant to an exemption under the Prospectus Regulation, from the requirement to publish a prospectus for offers of Digital Bonds. Accordingly any person making or intending to make an offer in that Relevant Member State of Digital Bonds which are the subject of an offering contemplated in this Information Memorandum as completed by Final Terms in relation to the offer of those Digital Bonds may only do so in circumstances in which no obligation arises for the Issuer to publish or a supplement to a prospectus pursuant to the Prospectus Regulation, in each case, in relation to such offer. The Issuer has not authorized the making of any offer of Digital Bonds in circumstances in which an obligation arises for the Issuer to publish or supplement a prospectus for such offer.

Under the Programme described in this Information Memorandum, the Issuer, issues Digital Bonds which rank equally among themselves and (subject to the provisions of any security documents) *pari passu* in right of payment with all other present and future unsecured and unsubordinated obligations of the Issuer (except for obligations mandatorily preferred by law), substantially on the terms set out herein, as supplemented in respect of each issue by a set of final terms supplementary hereto (each “**Final Terms**”).

The Digital Bonds will be issued in separate series (each a “**Series**”). Where further fungible issues of a Series are made, the Digital Bonds of such Series will have one or more issue dates and be on terms otherwise identical (or identical other than in respect of the first payment of any interest) and will be intended to be interchangeable with all other Digital Bonds of that Series. Each Series of Digital Bonds may be issued in tranches (each a “**Tranche**”) and may have different settlement, issue dates or first interest payment dates of interest and nominal amount of the Tranche and redemption rules but will on terms otherwise be identical to the terms of other Tranches of the same Series. The specific terms of each Tranche (which will be supplemented, where necessary, with supplemental terms and conditions) will be set out in the relevant Final Terms. Each Series and Tranche will be authorised by the Issuer. The terms and conditions of a Series or of a Tranche (as the case may be) will comprise the terms and conditions set out in this Information Memorandum and as contained hereinafter, as supplemented by the relevant Final Terms (as implemented in smart contracts).

A purchase of Digital Bonds involves various risks. Several risk factors may simultaneously affect the performance of the Digital Bonds, although no binding statement can be made as regards their interaction. In addition, other risks which are currently unknown may also affect the value of the Digital Bonds. Prospective investors are advised to consider all the information contained in this Information Memorandum, as supplemented by the relevant Final Terms, before making an investment in Digital Bonds. Prior to purchasing the Digital Bonds, prospective investors should carefully examine whether an investment in the Digital Bonds is in line with their financial and tax profile and other circumstances applicable to them and meets their requirements and expectations in terms of safety, profitability and liquidity.

The key factors described below and in the relevant Final Terms are essential risks which may have a significant impact on an investment in the Digital Bonds. Before making an investment in the Digital Bonds, prospective investors are advised to read in its entirety this Information Memorandum, as supplemented by the relevant Final Terms, and to consult a legal, tax or other adviser.

A PROSPECTIVE DIGITAL BONDHOLDER (AS DEFINED BELOW) SHALL NOT ASSUME THAT THE INVESTMENTS ARE SECURED, UNLESS SO SPECIFIED IN THE RELEVANT FINAL TERMS OF EACH SERIES OR OF A TRANCHE OF A SERIES (AS THE CASE MAY BE). SHOULD ONE OR MORE OF THE KEY FACTORS BELOW AND IN THE RELEVANT FINAL TERMS MATERIALIZE, THIS MAY RESULT IN MATERIAL AND SUSTAINED DECREASES IN THE PRICE OF THE DIGITAL BONDS, OR IN THE WORST CASE, A TOTAL LOSS OF THE CAPITAL INVESTED BY THE DIGITAL BONDHOLDER.

The Issuer (the “**Responsible Person**”) accepts responsibility for the information contained in this Information Memorandum. To the best of the knowledge and belief of the Issuer (which has taken all

reasonable care to ensure that this is the case), the information contained in this Information Memorandum is in accordance with the facts and does not omit anything likely to affect the import of such information. The delivery of this Information Memorandum at any time does not imply any information contained herein is correct at any time subsequent to the date hereof.

No person has been authorised to give any information or to make any representation other than those contained in this Information Memorandum in connection with the issue or sale of the Digital Bonds and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer.

This Information Memorandum may only be used for the purposes for which it has been published.

This Information Memorandum is to be read in conjunction with all the documents which are deemed to be incorporated herein by reference (see *“Documents Incorporated by Reference”*).

This Information Memorandum does not constitute an offer of, or an invitation by or on behalf of the Issuer to subscribe for, or purchase, any Digital Bonds. The distribution of this Information Memorandum and the offering or sale of the Digital Bonds in certain jurisdictions may be restricted by law. Persons into whose possession this Information Memorandum comes are required by the Issuer to inform themselves about and to observe any such restriction.

The Digital Bonds will not be listed or traded on any market and the aggregate volume of bonds offered to the public whether under this programme or under any other issue to the public by the Issuer shall at all times be limited to one million euro.

1. PERSON RESPONSIBLE

The Issuer is responsible for the content of this Information Memorandum and declares that, having taken all reasonable care to ensure that such is the case, the information contained in this Information Memorandum is, to the best of its knowledge, in accordance with the facts and contains no omission likely to affect its import.

Where any third-party information has been included in this Information Memorandum, such information has been accurately reproduced and, as far as the Issuer is aware and is able to ascertain from information made available or published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

The source of information will be indicated where third-party information has been included in this Information Memorandum. Where the Issuer refers to third-party websites, the Issuer is not responsible for the completeness and correctness of the contents on these websites.

No person has been authorised to give any information or to make any representation in connection with the issue or the sale of the Digital Bonds other than those contained in this Information Memorandum. The Issuer does not assume any liability for information which is not contained in this Information Memorandum. The information contained herein is current as of the date of this Information Memorandum and may have become inaccurate and/or incomplete due to changes which have occurred subsequently.

2. INVESTOR SUITABILITY

Prospective investors should determine whether an investment in the Digital Bonds is appropriate in their particular circumstances and should consult with their legal, business and tax advisers to determine the consequences of an investment in the Digital Bonds and to arrive at their own valuation of the investment.

The tax consequences for each investor in the Digital Bonds can be different and therefore investors are advised to consult with their tax advisers as to their specific consequences.

By subscribing to the Digital Bonds, each Digital Bondholder shall be deemed to be fully aware of, adhere to and be bound by the terms and conditions and the provisions of the Articles of the Issuer.

3. OVERVIEW OF THE PROGRAMME

3.1. Introduction – forward looking statements

Certain of the statements included in this Information Memorandum that are not historical facts are forward-looking statements. These forward-looking statements are based on current expectations, estimates and projections about the industry and markets in which the Issuer operates, management's beliefs and assumptions made by management of the Issuer. Such statements involve

uncertainties that could significantly impact the Issuer's financial results.

Words such as "expects", "anticipates", "intends", "plans", "believes", "seeks" and "estimates", variations of such words and similar expressions are intended to identify such forward-looking statements, which generally are not historical in nature. All statements that address operating performance, events or developments that the Issuer expects or anticipates will occur in the future are forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict.

Although the Issuer believes the expectations reflected in any forward-looking statements are based on reasonable assumptions, it can give no assurance that its expectations will be attained and therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Some of the factors that may affect outcomes and results include, but are not limited to: (i) national, international, regional and local economic climates, (ii) changes in financial markets, interest rates and foreign currency exchange rates, (iii) availability of financing and capital, the levels of debt that the Issuer maintains and its credit ratings (if any), (iv) risks of doing business internationally, including currency risks, (v) environmental uncertainties, including risks of natural disasters, pandemic, and (vi) those additional factors described under "*Risk Factors*". The Issuer undertakes no duty to update any forward-looking statements appearing in this Information Memorandum except as may be required by law.

3.2. Overview and general description of the Programme

The maximum aggregate principal amount of Digital Bonds outstanding at any one time under the Programme will not exceed one million euro (EUR 1,000,000), or its equivalent in other currencies.

Digital Bonds under this Programme may be offered to any legal or natural persons having legal capacity to subscribe to such Digital Bonds and the individual denomination of the Digital Bonds may start at one euro (EUR 1). The public offering of the Digital Bonds is allowed in the European Union and third countries provided that in the latter case, local requirements are respected.

The purpose of the issuance of Digital Bonds is to have access to retail clients. The proceeds of the Digital Bonds will be invested solely within the LynxCap Group and more specifically in bonds issued by **LCL Opportunities Luxembourg S.C.S.**, is a Luxembourg common limited partnership (*société en commandite simple*), established on 19 May 2022 in the Grand Duchy of Luxembourg, for an unlimited period, having its registered office at 34, rue du Curé, L-1368 Luxembourg, Grand Duchy of Luxembourg, and being registered with the Luxembourg *Registre de Commerce et des Sociétés* under number B 267834. This entity has issued bonds listed and traded on the professional segment of the Euro MTF of the Luxembourg Stock Exchange (the "**Traditional Bonds**").

The terms and conditions of any particular Tranche of Digital Bonds will be the terms and conditions substantially in the form set out under "*Terms and conditions of the Digital Bonds*" as supplemented, by the Final Terms, substantially in the form set out in Section 11 (*Form of Final Terms*), applicable thereto and, in respect of any Digital Bonds.

4. INFORMATION ON THE ISSUER

4.1. Corporate structure

The Issuer is **LCL OPPORTUNITIES 3 S.à r.l.**, a Luxembourg private limited liability company (*société à responsabilité limitée*), having its registered office at 34, rue du Curé, L-1368 Luxembourg, Grand Duchy of Luxembourg, registered with the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*) under number B 260326.

The LynxCap group of companies is headed by **LynxCap Investments AG**, a Swiss public limited liability company, having its registered office at Lüssihofweg 4, 6300 Zoug, Switzerland, registered with the Register of Commerce of the canton of Zug under number CHE-244.186.164 ("**LynxCap**").

LynxCap fully owns the Issuer.

The Issuer was incorporated on 5 October 2021 and its articles of incorporation were published in the electronic Compendium of Companies and Associations (the "**RESA**") under reference RESA_2021_225.312 on 22 October 2021. The articles of association were amended for the last time on 26 February 2025 and have been published in the RESA under reference RESA_20255_059.398 on 17 March 2025.

The Issuer's LEI is 485100EKU8FVREA8DP27.

Its last unqualified audited accounts, for the financial year ended on 31 December 2024 have been lodged with the Luxembourg Register of Commerce and Companies under reference L250357858 on 27 October 2025.

Deloitte Audit S.à r.l., a private limited liability company (*société à responsabilité limitée*) having its registered office at 20 boulevard de Kocklescheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg and registered with the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*) under number B 67895, will audit the accounts of the Issuer.

The Issuer does not qualify, and shall not be authorized by the CSSF, as (i) an undertaking for collective investment under the law of 17 December 2010 on undertakings for collective investment, as (ii) a specialized investment fund under the law of 13 February 2007 on specialized investment funds, nor as (iii) an investment company in risk capital (SICAR) under the law of 15 June 2004 relating to the investment company in risk capital and is therefore not subject to the supervision of the CSSF.

The share capital of the Issuer amounts to 12,000 euro and is fully paid up and subscribed by LynxCap Investments AG.

The fiscal year of the Issuer shall commence on the 1st day of January and end on the 31st day of December in each year (the “**Issuer Fiscal Year**”). Except as otherwise required by law, the Issuer shall have the same Issuer Fiscal Year for financial and accounting purposes.

The present Information Memorandum and the Programme have been approved by the Issuer by resolutions of the Board of Managers dated 23 April 2026.

4.2. Executive Management

In accordance with the Articles, the Issuer is managed by a board of managers (the “**Board**”) which is composed of one or several managers who need not be shareholders and are appointed and removed from office by a simple majority decision of the Limited Partner’s general meeting of shareholders, which determines the term of their mandates.

In dealing with third parties, the Board of Managers will have all powers to act in the name of the Issuer in all circumstances and to carry out and approve all acts and operations consistent with the Issuer's objects and provided the terms of the articles of association shall have been complied with.

The Board is currently composed of the following executive members:

- ➔ **Mr. Peteris Kadiss**, appointed on 30 September 2022 as Category A Manager, for an unlimited duration.
- ➔ **Mr. Konstantins Kraiss**, appointed on 30 September 2022 as Category A Manager, for an unlimited duration;
- ➔ **Mrs. Tea Puh**, appointed on 30 September 2022 as Category B Manager, for an unlimited duration; and
- ➔ **Mrs. Dora Vrkic Oriskovic**, appointed on 30 September 2022 as Category B Manager, for an unlimited duration;

Category C Managers might be appointed. They are non-executive managers and may only be appointed among people not being employees or shareholders of any company affiliated directly or indirectly to the Issuer either through its shareholder(s) or its subsidiaries.

Peteris Kadiss

Prior to joining LynxCap Group, Peteris Kadiss was responsible for NPL portfolio acquisitions at DDM Group AG, managing key transactions in the CEE region, specifically focused on the Slovenian, Croatian and Serbian markets. Mr. Kadiss has a background in Private Equity and Investment Banking. He was an Investment Director at a EUR 5 billion Private Equity & Credit fund, as well as Head of Syndicate at an investment bank, where he was responsible for major Oil and Gas Eurobond placements. Peter holds BA in Economics from University of Latvia, was Erasmus student in Gent

university in Belgium, holds a Master's degree in Banking and Finance from University of Sheffield, UK and completed an Executive MBA from London Business School. Peteris is a CFA charter holder.

Konstantins Kraiss

Konstantins Kraiss was responsible for all aspects of NPL portfolio acquisitions for DDM Group AG in the CSEE region, with a special focus on the Romanian, Hungarian and Greek markets. Prior to DDM Group, Mr. Kraiss was employed by Deloitte, Ernst & Young and leading regional Private Equity funds, focusing on mergers and acquisitions as well as financial and strategic advice to industry leading companies and financial institutions in Central and Eastern Europe. Mr. Kraiss has 15 years of experience in corporate finance and a proven track record of successful cross-border transactions with total investment value over EUR 1 billion. Mr. Kraiss holds a BSc in Business and Economics with a specialization in Finance, Stockholm School of Economics in Riga, Latvia.

Dora Vrkic Oriskovic

Dora Vrkic Oriskovic is an internal legal advisor responsible for transactions. Prior to joining LynxCap, she was part of the Group Transaction Team at B2Holding Group, where she was responsible for large transactions and co-investments within the Group in addition to supervising and supporting local acquisition and deal teams. Earlier in her tenure at B2, Ms. Vrkic Oriskovic was part of the Acquisition department at B2 Kapital d.o.o., a Croatian subsidiary of B2Holding Group, where she was in charge of NPL portfolio acquisitions, due diligence and transactional support across the CEE and SEE regions, with focus on CE markets. Ms. Vrkic Oriskovic holds a Master's in Law from the University of Zagreb.

Tea Puh

Tea Puh is a seasoned investment manager in charge of the LynxCap Luxembourg office. Prior to joining LynxCap, she was the Group Head of Portfolio Management with B2Holding Group, a listed pan-European NPL purchaser and servicer with a presence in over 20 European countries. At B2Holding, Ms. Puh was responsible for the execution of B2's investment strategy, maximising portfolio performance, managing the new acquisition approval process and existing portfolio reforecasting. Ms. Puh has a background in the acquisition and management of NPL portfolios in the majority of the European NPL markets with a particular focus on the CE markets. Ms. Puh holds a Masters in Finance from the University of Zagreb.

4.3. Auditors

The approved independent auditor (*réviseur d'entreprises agréé*) of the Issuer is **Deloitte Audit S.à r.l.**, a private limited liability company (*société à responsabilité limitée*) having its registered office at 20 boulevard de Kockelscheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg and registered with the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*) under number B 67895. The approved independent auditor is entrusted with the auditing of the annual accounts of the Issuer.

LCL Opportunities 3 S.à r.l. has resolved to proceed with audit of its annual accounts in order to provide comfort to the Digital Bondholders.

Each year, the auditors shall perform an audit of the financial statements, as prepared by the management of the Issuer.

Unless otherwise provided for in this Information Memorandum as supplemented by the relevant Final Terms, in the performance of the audit of the annual financial statements, the auditor shall control the method of valuation and of assessment of the assets by the management.

The Issuer may resolve to change its auditor through time. However, in such a case, he shall only appoint an auditor belonging to a big four group (Deloitte, Ernst & Young, PricewaterhouseCoopers, KPMG).

4.4. Contact data

The Issuer's contact data are as follows:

Name of contact: **LCL Opportunities 3 S.à r.l.**

Att.: the board of managers

Address: 34, rue du Curé,

L-1368 Luxembourg

Grand Duchy of Luxembourg

Email: p.kadish@lynxcapinvestments.com

Any document concerning the Issuer which is referred to in this Information Memorandum may be consulted upon request at the above mentioned address.

4.5. No significant change / trend information

Unless otherwise specified in this Information Memorandum, there has been no significant last financial information lodged with the Luxembourg Register of Commerce and Companies, and no significant change in the financial or trading position subsequent to the period covered by the last financial information lodged with the Luxembourg Register of Commerce and Companies.

The Issuer is not aware of any pending or imminent legal dispute or arbitration proceeding initiated since its establishment on 19 May 2022, or of legal dispute and arbitration proceeding which have had material effects on the Issuer's financial situation in the recent past or will have such effects in the future.

There are no material events which might have an impact on the assessment of the Issuer's solvency.

4.6. Financial Statements of the Issuer

The Issuer was formed in 2021 and has thus a limited operating history given that it was a dormant entity which actually never had any operational activity since its incorporation as visible in its annual accounts.

The Issuer prepares annual audited non-consolidated financial reports in compliance with Luxembourg accounting standards.

The Issuer shall prepare and make available an audited financial report to each shareholder within 180 days after the end of each Issuer Fiscal Year.

The Issuer's financial year starts on 1 January and ends on 31 December. Standalone annual accounts will be published in accordance with the applicable legal conditions. The Issuer does not prepare interim financial accounts.

Any published annual financial statements prepared for the Issuer can be obtained free of charge at the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*) or on its website at www.lbr.lu.

4.7. No regulation of the Issuer

The Issuer is not required to be licensed, registered or authorized under any current securities, commodities or banking laws of its jurisdiction of incorporation and will operate without supervision by any authority in any jurisdiction. The Issuer is a standard financial holding company (*société de participation financière*) acting for its own account and benefit. It does not provide any investment services to third parties. The issuance of Digital Bonds allows the Issuer to gather financing in order to fund the activities of the LynxCap group of companies. There can be no assurance, however, that regulatory authorities in one or more other jurisdictions will not determine that the Issuer is required to be licensed, registered or authorized under the securities, commodities or banking laws of such jurisdiction or that legal or regulatory requirements with respect thereto will not change in the future. Any such requirement or change could have an adverse impact on the Issuer or investors in the Digital Bonds.

5. OTHER KEY FACTORS

5.1. No listing or trading on a stock exchange

The Digital Bonds will not be listed or traded on a stock exchange. Digital Bondholders may only resell their Digital Bonds directly over the counter through direct transactions.

5.2. Sole debtor

The Issuer is the sole debtor of the Digital Bonds. Digital Bondholders must therefore request all payments due under the Digital Bonds exclusively from the Issuer. In the event of default of the Issuer, Digital Bondholders may therefore lose all of the capital invested.

5.3. Potential conflicts of interest

Digital Bondholders should be aware that there will be situations where the Issuer and its respective Affiliates and service providers may encounter potential conflicts of interest in connection with the Issuer's investment activities. The following details certain potential conflicts of interest which should be carefully considered before making an investment in the Issuer. By acquiring Digital Bonds, Digital Bondholders will be deemed to have acknowledged the existence of any such actual and potential conflicts of interest and to have waived any claim with respect to any liability arising from the existence of any such conflict of interest.

5.4. Contingency Reserves

The Issuer, at any time in its sole discretion, may establish reserves for contingencies (including general reserves for unspecified contingencies). The establishment of such reserves will not insulate any portion of the Issuer's assets from being at risk.

5.5. Risk of loss of the capital invested

The Issuer's obligations resulting from the Digital Bonds create direct liabilities of the Issuer.

Any claim asserted by the Digital Bondholders against the Issuer shall be limited to the Issuer's assets (subject to other creditors having preferential rights of payments).

The Issuer therefore cannot and will not meet its payment obligations in respect of the Digital Bonds from other assets or funds. If payments which have been received by the Issuer in respect of the issue of Digital Bonds are not sufficient to meet all the obligations due to the Digital Bondholders and the other debtors, the Issuer shall be obliged to make payments in respect of the Digital Bonds only to the extent that it has sufficient assets. In the event of a termination of the Digital Bonds for exceptional reasons and a pro-rata distribution of the proceeds from the realisation of the Issuer's assets in accordance with the applicable regulation.

SHOULD THE ASSETS OF THE ISSUER NOT BE SUFFICIENT TO MEET AMOUNTS PAYABLE UNDER THE DIGITAL BONDS, DIGITAL BONDHOLDERS WILL SUFFER A LOSS OF THEIR INVESTED CAPITAL AND/OR

ANY INTEREST PAYMENTS WHICH MAY BE A COMPLETE LOSS. AFTER THE REALISATION OF THE ASSETS, SHOULD THERE BE NO FUNDS AVAILABLE FOR THE PAYMENT OF ANY AMOUNT DUE BY THE ISSUER TO THE DIGITAL BONDHOLDER UNDER THE DIGITAL BONDS, INCLUDING IN RESPECT OF INTEREST (FIXED OR OTHERWISE) OR PRINCIPAL, NO PAYMENT MAY BE MADE.

5.6. No claim against shareholders, managers or executive officers

The shareholders, managers, executive officers or managing directors and employees of the Issuer, assume no personal liability in relation to any obligation, commitment or agreement of the Issuer or arising from the agreements to which the Issuer is a party. The obligations arising for the Issuer from the agreements (including, but not limited to, the Digital Bonds) to which the Issuer is a party shall only create liability for the Issuer as a legal entity.

5.7. Insolvency proceedings and consequences of liquidation of the Issuer

The Issuer can be declared bankrupt (*en état de faillite*) upon petition by a creditor of the Issuer or by the managers (who may have the legal obligation to file for bankruptcy in case the relevant conditions are met), or *ex officio* by the Luxembourg courts in accordance with the relevant provisions of Luxembourg insolvency law. If granted, the Luxembourg courts will appoint a bankruptcy trustee (*curateur*) who shall be obliged to take such action as he deems to be in the best interest of the mass of the creditors of the Issuer (including, as the case may be, by preserving all rights of the Issuer against the latter's own debtors). Certain preferred creditors of the Issuer (including the Luxembourg tax authorities and the receiver, liquidator or insolvency administrator) may have a privilege that ranks senior to the rights of the Digital Bondholders in such circumstances and the proceeds may first be used to pay fees and charges of the preferential claims by law and insolvency claims, before distributing any surpluses to the Digital Bondholders. Other insolvency proceedings under Luxembourg law might be implemented.

Should insolvency proceedings be opened, the Issuer may not be able to make the payments due under the Digital Bonds on the due dates.

5.8. Lack of operating history

Although the Issuer was incorporated on 5 October 2021, this entity was originally designed to act as a securitization vehicle. On 26 February 2025, the sole shareholder resolved to convert this entity into a financial holding company (*société de participation financière* – “*Soparfi*”). By way of consequence, the Issuer is similar to a newly-formed entity and has no operating history as a Soparfi. The Issuer's investment programs should be evaluated on the basis that there can be no assurance that the AIFM's assessment of the short-term or long-term prospects of investments will prove accurate or that the Issuer will achieve its investment objectives.

5.9. Dependence on key personnel

The success of the Issuer depends in substantial part on the skill and expertise of members and employees of the LynxCap group of companies and certain industry specialists. There can be no assurance that such members and employees will continue to be actively involved in the investments of the Issuer throughout the life of the Issuer. The loss of key personnel could have a material adverse effect on the Issuer.

THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE, A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD ANY DIGITAL BONDS.

6. PARTIES INVOLVED

The key roles in the ecosystem include:

- Issuer: which is the entity creating the DLT financial instrument and ensuring regulatory compliance.
- Technology provider: Defactor supplies the smart contract framework and tokenization infrastructure.
- Custodians: these are third-party regulated custodians may be used for off-chain asset backing, outside of Defactor's scope. In this case, the Issuer will act as custodian.
- Investors & Digital Bondholders: these are the end users who acquire and trade tokenized real world assets.
- Investment platform(s): it is the venue to offer the assets for sale, marketing and distribution.

6.1. Electronic platform provider(s) – crypto payment gateway providers

Several electronic platform providers may be appointed at the same time by the Issuer. Digital Bonds of different Series may be issued on different platform depending on the Issuer's needs. Additional service providers may be added through a supplement to this Information Memorandum. Crypto payment gateway providers are third-party servicers that enable businesses to accept payments in cryptocurrencies (like Bitcoin, Ethereum, or stablecoins) from customers. These providers handle the technical infrastructure needed to receive, verify, and often convert crypto payments into fiat currency. Electronic platforms (the "**Electronic Platforms**") are regulated computer-based systems (software and infrastructure) that enables multiple participants to submit, receive, match and/or execute instructions (orders, requests, transfers) through electronic communications, under a defined set of operating rules (access rules, workflow, governance, audit logs).

Currently, appointed electronic platform service providers is:

- (i) **YouHodler S.A.** is a Swiss public limited liability company, with registered office at avenue du Théâtre 7, 1005 Lausanne, Switzerland, registered with the Register of Commerce of the canton of Vaud under number CHE-336.197.657. YouHodler is a regulated entity active as financial intermediary and subject to the supervision of the Swiss Financial Market Supervisory Authority (FINMA).

YouHodler provides the electronic platform where Digital Bonds exchange are possible.

6.2. Defactor

Decentral Limited ("**Defactor**"), is an Irish limited company, having its registered office at Dogpatch Labs, CHQ Building, Dublin 1, D01Y6H7, Ireland, registered under number 625523.

Defactor provides the technology infrastructure for the tokenization process but does not act as an intermediary in issuance, custody, or compliance verification.

7. DOCUMENTS AVAILABLE FOR INSPECTION AND DOCUMENTS INCORPORATED BY REFERENCE

This Information Memorandum should be read and construed in conjunction with each relevant Final Terms and all amendments and supplements from time to time to this Information Memorandum, which shall be deemed to be incorporated in, and to form part of this Information Memorandum and which shall be deemed to modify or supersede the contents of this Information Memorandum to the extent that a statement contained in any such document is inconsistent with such contents.

Save that any statement contained herein or in a document all or the relevant portion of which is deemed to be incorporated by reference herein shall be deemed to be modified or superseded for the purpose of this Information Memorandum to the extent that a statement contained in any such subsequent document all or the relative portion of which is or is deemed to be incorporated by reference herein modifies or supersedes such earlier statement (whether expressly, by implication or otherwise). Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Information Memorandum. Copies of any or all of the documents which are incorporated herein by reference will be available free of charge during normal business hours from the office of the Issuer.

The Issuer will, in the event of any significant new factor, material mistake or inaccuracy relating to information included in this Information Memorandum, which is capable of affecting the assessment of any Digital Bonds, prepare a supplement which shall be incorporated by reference.

Copies of the documents which are incorporated by reference in, and to form part of, this Information Memorandum, will be available as follows:

- ➔ any published annual audited financial statements prepared for the Issuer can be obtained free of charge at the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*), or on its website at www.lbr.lu.
- ➔ Copies (and English translations where the documents in question are not in English) of the following documents will be available, during usual business hours on any weekday (Saturdays,

Sundays and public holidays excepted), for collection free of charge from the offices of the Issuer in Luxembourg:

- (a) the published audited annual financial statements of the Issuer for the years 2023 and 2024 together with any audit or review reports prepared in connection therewith and the most recent published audited ;
- (b) a copy of this Information Memorandum together with any supplement to this Information Memorandum (as the case may be);
- (c) a copy of the relevant form of Final Terms;

In addition, this Information Memorandum and any other supplements (as the case may be) will be published on the website of the Issuer: <https://www.lynxcapinvestments.com>

Documents indicated under letters b) to c) are incorporated by reference and form part of this Information Memorandum.

8. DATA PROTECTION

In accordance with the applicable data protection provisions, and notably (Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC ("**General Data Protection Regulation**"), the Issuer, acting as data controller, may collect, record, store, adapt, transfer or otherwise process certain investor's personal data (including, but not limited to, in the holding of Digital Bonds, name, address, contact details (the "**Personal Data**")) for the purposes set out below.

The prospective investor may, at his/her/its discretion, refuse to communicate the Personal Data to the Issuer. In this case however, the Issuer may reject his/her/its request for subscription for Digital Bonds.

The Personal Data may be processed for complying with its legal obligations and notably for the purposes of (i) maintaining the register of Digital Bondholders, (ii) processing subscriptions, redemptions as well as payments to Digital Bondholders, (iii) complying with applicable anti-money laundering rules, (iv) tax identification under applicable regulation such as the FATCA Rules, the CRS or similar laws and regulations, (v) providing client services, (vi) and complying with any other legal obligations.

The Issuer may delegate the processing of the Personal Data, in compliance and within the limits of the applicable laws and regulations, to other entities such as the Agents (as defined below) (the "**Processors**").

The relevant Agents may decide, under their own responsibility, and as data controllers, to transfer or sub-delegate the processing of the Personal Data to their parent companies, to one or several affiliates of their group or to their agents, including their offices located outside the European Union

and thus located in countries which may be deemed not to offer a level of protection which is equivalent to that offered in Luxembourg, for the purposes of carrying out the provision of different services, including but not limited to financial and operational management and reporting, risk management, legal and regulatory compliance, client service management, business continuity management and product development. The Issuer will not be involved in appointing these affiliates or agents and shall not bear any responsibility in relation to this sub-delegation.

The Issuer may disclose Personal Data to the Luxembourg tax authorities, which in turn may, acting as data controller, disclose it to foreign tax authorities.

Each Digital Bondholder has a right to access his/her/its Personal Data and may ask for a rectification thereof in cases where such data is inaccurate and/or incomplete. Request for a rectification should be made by a letter addressed to the Issuer.

The Digital Bondholder has a right of opposition regarding the use of his/her Personal Data for marketing purposes. This opposition can be made by letter or email addressed to the Issuer.

By subscribing for the Digital Bonds, each Digital Bondholder consents to such processing of his/her Personal Data.

9. TERMS AND CONDITIONS OF THE DIGITAL BONDS

9.1. Key features of the Digital Bonds

All Digital Bonds irrespective of their Series and Tranche qualify as financial instruments as defined under section C of Annex I of directive 2014/65/EU of 15 May 2014 on markets in financial instruments. The Digital Bonds issued fall outside the scope of Regulation (EU) 2023/1114 of 31 May 2023 relating to crypto assets.

Legally speaking, the Digital Bonds qualify as registered bonds, the register using the distributed ledger technology.

The issuance of the Digital Bonds will be made in euro or another Fiat Currency and any payments made in respect of the Digital Bonds will be initiated in the same currency. If cryptocurrencies are used by a Digital Bondholder, he/she/it will bear the risk associated with the volatility of such cryptocurrencies and the exchange ratio between FIAT currencies and cryptocurrencies in order to subscribe to the Digital Bonds. Cryptocurrencies received from an investor by the Issuer or by a third party on behalf of the Issuer, will be exchanged into the relevant Fiat Currencies within a maximum of two Business Days after being received by the relevant party. Any conversion from a Fiat Currency into a cryptocurrency for payment to an investor by, or on behalf of the Issuer will be made on the relevant Payment Date. The actual conversion process between cryptocurrencies and Fiat Currencies will not be handled by the Issuer but by a payment gateway provider or financial intermediary.

Therefore the Issuer may under no circumstances be held accountable for the conversion rate applied or associated costs which remain solely the Digital Bondholder's responsibility.

All Digital Bonds irrespective of their Series and Tranche will bear an interest (fixed or floating), the amount of which will be decided at the respective issuances.

All terms and conditions not stated in this Information Memorandum will be summarized in Final Terms, the content of which will notably include (but without limitation), the Interest Rate, the Maturity Date, the number of Digital Bonds issued, whether put or call options apply. These Final Terms will then be implemented into a smart contract.

The Issuer is not responsible for the accuracy of the smart contract save in the case of gross fault or wilful misconduct.

9.2. Proceeds of the Digital Bonds

The proceeds received from the Digital Bonds will be invested in bonds issued by LCL Opportunities Luxembourg S.C.S., which are listed on the professional segment of the Euro MTF of the Luxembourg Stock Exchange, i.e. the Traditional Bonds.

9.3. Issue procedure – transferability

The smart contract will make it possible for the Issuer to create and cancel the Digital Bonds. New Digital Bonds might be created up to the limits of the Programme.

The smart contract will only make it possible for the Issuer to issue whole numbers (as opposed to real numbers) of Digital Bonds. The Issuer's Digital Bonds will consequently have a decimal place set to zero (meaning that the transfer of a fraction of a Digital Bond will not be possible).

Digital Bonds will be cancelled at their term, or in the case of early redemption, as foreseen in the Final Terms as implemented in the smart contracts.

Any Investor shall enter into a Subscription Form with the Issuer at the issuance of the Digital Bonds, and, in the case of Atomic Settlement, at their acquisition. In any case and by subscribing to a Digital Bonds or buying it, as the case may be, each person:

- expresses to have full legal capacity to subscribe to or buy the Digital Bonds and that such subscription or purchase is not in breach of any personal restrictions or legal order pronounced against such person, and that such subscription or purchase is legal, valid and binding on his/her/its behalf, and that he/she/it can freely dispose of the funds used to subscribe to the Digital Bonds;
- accepts that the Issuer or its agents, shall not be responsible for damages caused in the event of an Investor's or third party authorized to act on his behalf legal incapacity, provided that the Issuer or its agents, have not received prior notice of the fact. The Investor shall compensate

and reimburse the Issuer or its agents for all complaints, legal action, fees expenses, damages losses or other sums paid, or responsibilities incurred by the Issuer or its agents resulting from the execution by the Issuer or its agents of such an instruction on the part of the Investor.

- understands that the personal data requested by the platform above must be transmitted in order to proceed with the purchase. Should the Investor refuse to communicate it, the Issuer or its agents, will refuse the purchase. Each Investor understands that his/her personal data (relating mainly to his/her identity, address, personal and marital status), specific information concerning my assets and transactions carried out on my behalf, may be recorded in one or several databases of the Issuer or its agents in accordance with applicable legislation. Under this legislation, the Issuer or its agents may outsource the processing and storage of this data. Each Investor expressly authorizes the Issuer or its agents to collect and process personal data relating to individual Investors as described in this section. Investors understand that they can consult the data concerning me and rectify any inaccuracies in this data. The Issuer or its agents may record, or process personal data for the purpose of carrying out transactions, managing contractual relations and in general for the purpose of carrying out their obligations and improving the services provided to Investors. Each Investor expressly grants the platform and the Issuer or its agents, an unlimited right to inspect all data concerning the Investor and/or relative to my purchase, including data stored by the Issuer or its agents.

Once the Subscription Form is executed, the Investor has three (3) Business Days to transfer the amount in the Specified Currency to the Issuer's account as stated in the Subscription Form. Digital Bonds are issued in FIAT currencies in the Specified Currency.

The Issuer has the obligation to issue and allocate Digital Bonds to the Investor only when the intended Subscription Price, as stated in the Subscription Form, is actually received by the Issuer (payment versus delivery).

For the avoidance of doubt, the Issuer does not charge any issuance fees to the investors.

9.3.1. Payment in FIAT currencies

As soon as the intended Subscription Price is actually received by the Issuer, the Issuer will allocate the Digital Bonds without delay to the Digital Bondholders. Payment in FIAT currencies are only accepted by the Issuer in the relevant Specified Currency, i.e. for any Digital Bonds issued in euro, the intended Subscription Price must be paid by the Investor in euro.

If, for any reason, the amount received from the Investor in the Specified Currency was below the intended Subscription Price of the Digital Bonds, the Issuer would without delay notify the Investor of the difference between the amount actually received and the intended Subscription Price of the Digital Bonds. The Investor would have an additional three (3) Business Days as of the notification made by the Issuer to make an additional wire in order to match the intended Subscription Price of the Digital Bonds.

As soon as the full intended Subscription Price is actually received by the Issuer, the Issuer will allocate the Digital Bonds without delay to the Digital Bondholder.

If no additional funds have been received by the Issuer within these (3) Business Days, but the amount received from the Investor in the Specified Currency is still higher than the minimum subscription amount stated in the Subscription Form, all available funds will be allocated towards the allocation of Digital Bonds and the Investor irrevocably consents on this new Subscription Price and number of Digital Bonds so allocated. In this case, the Issuer will allocate the Digital Bonds without delay to the Digital Bondholder.

In case the amount received from the Investor in the Specified Currency is lower than the minimum subscription amount stated in the Subscription Form, and that no additional funds have been received within three (3) Business Days, the subscription will be cancelled, and no Digital Bond will be allocated. In such a case, the funds held by the Issuer on behalf of the Investor will be returned to such Investor on the account as instructed by him/her/it. Under no circumstances the Issuer may be liable for any losses or costs incurred by the Investor in the repayment process except in the case of gross fault or wilful misconduct.

9.3.2. Conversion of cryptocurrencies process

If cryptocurrencies are used by a Digital Bondholder, he/she/it will bear the risk associated with the volatility of such cryptocurrencies and the exchange ratio between FIAT currencies and cryptocurrencies in order to subscribe to the Digital Bonds. Cryptocurrencies received from an Investor by the Issuer or by a third party on behalf of the Issuer, will be exchanged into the relevant FIAT Currencies within a maximum of two Business Days after being received by the Issuer or its agent. The conversion from cryptocurrencies to FIAT currencies will be handled by a financial intermediary as identified in the Subscription Form. Any conversion from a Fiat Currency into a cryptocurrency for payment to an Investor by, or on behalf of the Issuer will be made on the relevant Payment Date.

When the wallet of the Digital Bondholder is held by an electronic platform on behalf of the Digital Bondholder, or on an electronic platform, the actual conversion process between cryptocurrencies and Fiat Currencies will not be handled by the Issuer but by the relevant payment gateway provider or relevant financial intermediary. Therefore, the Issuer may under no circumstances be held accountable for the conversion rate applied or associated costs which remain solely the investor's responsibility.

Whenever the Digital Bondholder holds his/her/its wallet and private key personally, any payment in cryptocurrency to the Issuer will be subject to conversion in FIAT currencies. Such conversion will be made by the Issuer with any payment gateway provider the Issuer usually works with. The Issuer cannot be held accountable of the exchange rate or costs applied by such payment gateway provider.

Once the conversion done, the Issuer will consider the amount of FIAT currency actually received after conversion.

9.3.2.1. The amount received after conversion is equal or exceeds the intended Subscription Price

If the amount received in the Specified Currency after conversion of cryptocurrencies is equal or exceeds the intended Subscription Price, the Issuer will allocate Digital Bonds without delay to the Digital Bondholder for the whole amount received, and any difference will be rounded to the next closest euro or equivalent in the Specified Currency.

9.3.2.2. The amount received after conversion is below the intended Subscription Price of the Digital Bonds

If the amount received in the Specified Currency after conversion of cryptocurrencies is below the intended Subscription Price, the Issuer will without delay notify the Investor. In such a case, the Investor would have three (3) Business Days to send additional cryptocurrencies for conversion of FIAT currency, in order to match the intended Subscription Price in the Specified Currency, in which case, the Issuer will allocate the Digital Bonds without delay to the Digital Bondholder.

If no additional funds have been received by the Issuer within these (3) Business Days, but the amount received from the Investor in the Specified Currency after conversion is still higher than the minimum subscription amount stated in the Subscription Form, all available funds will be allocated towards the allocation of Digital Bonds and the Investor irrevocably consents on this new Subscription Price and number of Digital Bonds so allocated. In this case, the Issuer will allocate the Digital Bonds without delay to the Digital Bondholder.

In case the amount received from the Investor in the Specified Currency after conversion is lower than the minimum subscription amount stated in the Subscription Form, and that no additional funds have been received within three (3) Business Days, the subscription will be cancelled and no Digital Bonds will be allocated. In such a case, the funds held by the Issuer on behalf of the Investor will be returned to such Investor on the account and in the (crypto)currency as instructed by him/her/it. Under no circumstances the Issuer may be liable for any losses or conversion costs incurred by the Investor in the reconversion and repayment process except in the case of gross fault or wilful misconduct.

9.3.3. Long-Stop Date – over allocation of Bonds

In the unlikely event that more Digital Bonds have been subscribed than the number of Bonds available due to technical mistake or technological malfunction, system error, hardware/software failure, or operation fault, the Issuer has the right to reimburse the principal amount of such oversubscribed Digital Bonds to the relevant Digital Bondholder(s) without penalty for a period of ten Business Days after the Digital Bonds allocation to the relevant Digital Bondholder(s). As a consequence such oversubscribed Digital Bonds will be cancelled and any rights and obligations in connection therewith extinguished. In such a case, the funds held by the Issuer on behalf of the Investor will be returned to such Investor on the account and in the (crypto)currency as instructed by him/her/it. Under no circumstances the Issuer may be liable for any losses or reconversion costs

incurred by the Investor in the reconversion and repayment process except in the case of gross fault or wilful misconduct.

9.3.4. Technical Digital Bonds' issuance details

The Ethereum blockchain serves as the underlying DLT infrastructure for this issuance. Ethereum is a public, permissionless, decentralized network operating under a Proof of Stake (PoS) consensus mechanism, subsequent to its transition from Proof of Work in 2022 ("**The Merge**").

Key attributes of Ethereum relevant to this issuance include: Broad institutional adoption and regulatory familiarity, availability of audited, standardized smart contract templates, transparent on-chain recordkeeping of all issuance and transfer events. The Issuer retains comprehensive control over the issuance parameters, supply management, transfer logic, and off-chain KYC records through this DLT-enabled structure, while benefiting from the transparency, auditability, and security inherent in the Ethereum network.

Upon execution of the applicable terms and satisfaction of Know Your Customer (KYC)/Anti-Money Laundering (AML) compliance obligations via an authorized distribution or exchange platform, the Issuer shall mint and allocate an amount of Digital Bonds to the pre-approved blockchain addresses of eligible investors. Only investors duly onboarded and verified through regulated channels are authorized to receive Digital Bonds.

The Digital Bonds are minted through a smart contract deployed on the Ethereum network, adhering to the ERC-20 standard. As required, the Issuer can use specific asset standards such as ERC-3643 (ERC-3643 tokens include mechanisms to verify the identity and eligibility of participants before allowing transactions. This ensures that all transfers adhere to predefined compliance rules, such as Know Your Customer (KYC) and Anti-Money Laundering (AML) regulations). The smart contract governs: Overall supply control, transfer enforcement, Event-driven functions (e.g., freeze, burn). Subsequent to issuance, Digital Bonds transactions are immutably recorded on-chain and held within platform custodial wallets (such as YouHodler) or Ethereum-compatible non-custodial wallets under the control of the respective Digital Bondholders. Digital Bonds do not exist in physical or certificated form.

Digital Bond transfers are subject to stringent controls managed by the issuer. This ensures that only pre-approved and whitelisted wallet addresses will receive Digital Bonds. All transactions occur between verified, KYC-compliant parties.

9.3.5. Allocation of Digital Bonds to blockchain addresses

The smart contracts make it possible for the Issuer to allocate the Digital Bonds to a specified blockchain addresses, and to determine at all times the number of Digital Bonds associated with a specific blockchain address.

The Issuer may allocate Digital Bonds to a wallet held by an electronic platform on behalf of the Digital Bondholder or directly to the Digital Bondholder in the case he/she/it holds his/her/its wallet personally as well as the private key associated with such wallet.

Investors are aware of the principle **"Not your wallet, not your private key"** also known as **"Not your keys, not your coins"**. It means that If a person does not control the private keys to a crypto wallet, he/she/it does not truly control the assets stored in it. If the private key is held by a third party (e.g. an exchange, custodian, or wallet provider), they effectively control the crypto assets. In case of a hack, platform failure, regulation, or fraud, the user may lose access without recourse.

UNDER NO CIRCUMSTANCES MAY THE ISSUER BE HELD LIABLE FOR ANY FAILURE RELATING TO THE HOLDING OF THE CRYPTO-ASSETS OF THE DIGITAL BONDHOLDERS.

9.3.6. Transfer of Digital Bonds – Atomic settlement

The smart contracts make it possible for Digital Bondholders (*i.e.* for the owners of the private key controlling the blockchain address in which the Digital Bonds have been allocated) to transfer Digital Bonds from their blockchain address to another blockchain address. In accordance with the rules issued by the Issuer, such a transfer consequently results in the relevant Digital Bondholder being struck off from the register with respect to Digital Bonds associated with the transferred Digital Bonds.

Any transfer of Digital Bonds shall be notified by the Transferor and the Transferee to the Issuer in order for the register of Digital Bonds to be updated on the blockchain.

The transfer of Digital Bonds remains valid even if the agreement based on which the Digital Bonds were transferred is invalidated, for example further to a material error of one of the parties or fraud. If the invalidity of the agreement based on which the transfer of the Digital Bonds was effected is acknowledged in a final decision issued by a court of competent jurisdiction, the Issuer can decide to cancel the relevant Digital Bonds and allocate new Digital Bonds to the person who/which has been identified as the rightful owner of the Digital Bonds.

Atomic Settlement

In order to ensure an Atomic Settlement between the Digital Bonds allocation to the Investor and their connection with the bonds issued by LCL Opportunities Luxembourg S.C.S., LCL Opportunities 3 S.à r.l. will subscribe to the bonds and hold them in treasury until reconciliation is made with the Digital Bonds. If needed for technical purpose, the Issuer may hold its own Digital Bonds in treasury (which, for the avoidance of doubt would not accrue any interest or bear any voting right). Therefore, investors will in this case not subscribe Digital Bonds at their issuance, but right after, in a secondary trade. In this case, all rights under the Digital Bonds will start to accrue towards the Digital Bondholders as of the acquisition date of the Digital Bonds.

For the avoidance of doubt, investors shall have rights over the Digital Bonds, only when they are allocated to him/her/it, which may occur only after the payment of the subscription amount/acquisition amount is received by the Issuer. If the funds are received after the issuance of the Digital Bonds, the Digital Bondholder shall not have any rights over the Digital Bonds since their issuance but only as of the date of their allocation to the investor. As a consequence, the only way to have the right over accrued interest since the issuance date of the Digital Bonds is to ensure that payment of the subscription amount is received before their issuance or on the issuance date. A partial and incomplete payment does not give right to partial rights. Without prejudice to the other provisions regarding late payment, in the case of the payment of the subscription price after the issuance of the Digital Bonds (and provided they are actually allocated to the investor), the investor shall have only a *pro rata temporis* right over the accrued interest for the relevant interest period.

9.3.7. Consensus mechanism on Ethereum

Ethereum transitioned from a Proof-of-Work (PoW) to a Proof-of-Stake (“**PoS**”) consensus mechanism in September 2022, a significant upgrade known as "The Merge." This shift aimed to enhance the network's security, scalability, and energy efficiency.

➔ Validator participation

Staking Requirements: To become a validator, an individual must stake a minimum of 32 ETH. This stake acts as collateral, incentivizing proper behavior within the network.

➔ Block proposal and finalization

Epochs and Slots: Time in Ethereum's PoS is divided into epochs and slots. Each epoch consists of 32 slots, with each slot lasting 12 seconds. During each slot, a validator is selected to propose a block.

Attestations: After a block is proposed, other validators attest to its validity. Once a block receives sufficient attestations, it is added to the blockchain.

➔ Incentives and penalties

Rewards: Validators earn rewards for proposing blocks and for attesting to the validity of blocks proposed by others.

➔ Penalties

Validators can be penalized for malicious actions or inactivity. Severe infractions can lead to "slashing," where a portion of the validator's staked ETH is forfeited, and the validator is removed from the network.

➔ Energy efficiency

The transition to PoS has significantly reduced Ethereum's energy consumption, making it more environmentally friendly compared to the previous PoW mechanism. ethereum.org

This PoS mechanism enhances Ethereum's security and scalability while reducing its environmental footprint.

9.3.8. Freeze

The smart contracts make it possible for the Issuer to "freeze" the Digital Bonds associated with the debt instruments issued by the Issuer, *i.e.* to prevent execution of transactions on the blockchain until the Issuer puts an end to the freeze. This function may be used to block transactions in case of a "hard fork" of the blockchain, pending a decision of the Issuer as to which version of the blockchain it will support.

9.3.9. No preferential subscription right

In the case of further issuers of Digital Bonds, the existing Digital Bondholders have no preferential subscription right.

9.3.10. Loss or theft of Digital Bonds

The Issuer's regulations specify the procedure to be followed if a Digital Bondholder loses access to its Digital Bonds, e.g. because the corresponding private key has been lost or stolen. The procedure to be followed in such cases varies depending on whether the relevant Digital Bonds were recorded in the Issuer's debt instruments register under the name of the relevant Digital Bondholder or whether the relevant Digital Bonds had not been so registered.

9.3.10.1. Registered Digital Bondholder

If the Digital Bondholder who claims to have lost access to Digital Bonds (the "**Applicant**") was recorded in the Issuer's debt instruments register as the holder of such Digital Bonds, then, after having identified itself in a manner satisfactory to the Issuer, the Applicant must notify the Issuer that it has lost access to certain Digital Bonds (the "**Lost Access Digital Bonds**") and specify the blockchain address to which the applicant has lost access. The Issuer will, on three separate occasions, publish a notice on its website and in such other media as the Issuer may find appropriate, stating that it will cancel and reissue the Lost Access Digital Bonds to a blockchain address designated by the Applicant unless, within 30 days following the date of the first publication, a third party claims to own and provides *prima facie* evidence that such third party is the rightful owner of the Lost Access Digital Bonds.

The Issuer will also send a letter to the postal address of the Applicant (as evidenced by the debt instrument register), with a copy of the email sent by the applicant to the Issuer and of the notice published on the Issuer's website. It will ask the applicant to provide a blockchain address to which

the reissued Digital Bonds must be allocated, and to confirm that such blockchain address is controlled by the Applicant exclusively.

Unless the Issuer has received a notice from a third party that includes *prima facie* evidence that such third party owns the Lost Access Digital Bonds, the Issuer will cancel and reissue the Lost Access Digital Bonds to the blockchain address designated by the Applicant. If, before reissuing the Lost Access Digital Bonds, the Issuer receives a notice from a third party that includes *prima facie* evidence that such third party owns the Lost Access Digital Bonds, it will inform the Applicant of the fact and invite the Applicant to bring the matter to the competent courts. Upon receipt of a final decision from a Luxembourg court acknowledging the ownership of the Lost Access Digital Bonds, the Issuer will cancel and reissue the Lost Access Digital Bonds to the blockchain address that will have been designated by the person identified as the rightful owner of the lost access Digital Bonds.

9.3.10.2. Unregistered Digital Bondholder

If, for any reason, the Applicant was not recorded as the owner of the Lost Access Digital Bonds in the Issuer's debt instruments register, the Applicant will be invited to demonstrate in a manner satisfactory to the Issuer that the Applicant is the rightful owner of the Lost Access Digital Bonds. If the Applicant has provided such evidence to the Issuer, the Issuer will follow the procedure outlined above regarding loss or theft of Digital Bonds held by registered Digital Bondholders.

9.3.10.3. Investor's responsibility

Investors are responsible for implementing reasonable measures for securing the wallet, vault, or other storage mechanism used to receive and hold Digital Bonds, including any requisite private key(s) or other credentials necessary to access such storage mechanism(s). The loss of private key(s) or other credentials may result in Investors losing access to their Digital Bonds. Investors acknowledge that their holding in Digital Bonds may be deduced from records on the Ethereum blockchain.

9.3.10.4. Environmental considerations

The Digital Bonds are issued and transferred using the Ethereum blockchain, which, since its transition to Proof of Stake ("**PoS**") in September 2022 (known as "**The Merge**"), has significantly improved its environmental profile. Unlike Proof of Work ("**PoW**") systems, which require intensive computational effort and energy consumption to validate blocks, Ethereum's PoS mechanism relies on economic incentives and validator staking, resulting in a >99.95% reduction in energy consumption compared to its previous consensus model.

According to independent estimates published by the Ethereum Foundation and research groups, the Ethereum network now consumes approximately 0.0026 TWh/year, which is comparable to the energy footprint of a small town and dramatically lower than legacy financial systems or earlier blockchain platforms.

In addition to the core Ethereum mainnet, Layer 2 (L2) networks compatible with Ethereum such as Polygon, Arbitrum, and Base, further optimize energy usage by aggregating transactions off-chain and submitting them to Ethereum in compressed batches. These L2s offer enhanced scalability with minimal incremental energy use. Defactor's infrastructure is 'blockchain-agnostic' and can operate across multiple chains.

No additional environmental risks identified, aside from computational energy use (which is now minimal), the Issuer has not identified any further environmental externalities or sustainability concerns directly associated with the use of Ethereum or the tokenization process for this Programme. The on-chain issuance, distribution, and lifecycle management of the Digital Bonds occur digitally and do not require any paper documentation, transport, or physical handling. The process contributes to an overall reduction in administrative carbon footprint compared to traditional securities infrastructure.

The Issuer continues to monitor developments in blockchain sustainability and remains open to migrating to alternative DLT networks or adopting hybrid models in the future if material environmental advantages are identified.

9.3.11. Contingency Procedures in Case of Distributed Ledger Technology Failure

Ethereum is the most widely used and battle tested blockchain, currently secured by over 900,000 validators globally under a decentralized Proof of Stake mechanism. It supports the world's largest tokenized asset ecosystems.

In the event of a material disruption, malfunction, or failure of the Ethereum blockchain, the Issuer has implemented operational contingency procedures to protect Digital Bondholders and ensure the traceability and enforceability of their rights. The Issuer maintains, through coordination with the technology provider Defactor, the following safeguards:

9.3.11.1. On-chain Snapshots and Off-chain Mapping

Regular on-chain snapshots are taken to capture the current token balances across all whitelisted wallet addresses. The Issuer shall maintain a parallel electronic secure register based on all past transactions which shall match the data on the blockchain. This allows the Issuer to reconstruct the Digital Bondholder register in the event of failure.

9.3.11.2. Digital Bondholder Register

All Digital Bonds are issued and transferred only to pre-approved wallet addresses associated with verified investors. This record is maintained off-chain in a secure register, enabling the Issuer to identify Digital Bondholders even if on-chain data becomes temporarily or permanently inaccessible.

In the event of any claim by any person asserting rights in respect of the Digital Bonds and where the data recorded on the blockchain differs from the off-chain register, the off-chain register shall prevail unless and until evidence to the contrary has been provided to the satisfaction of the Issuer.

9.3.11.3. Fallback and Recovery Process

In a critical failure scenario, the Issuer may, subject to regulatory and legal requirements, (i) issue replacement Digital Bonds on a functioning blockchain or (ii) provide equivalent financial instruments in off-chain form (e.g., certificated notes), based on the latest verified snapshot.

The Issuer is not responsible for any IT failure with regard to the payment gateway provider's platform and does not provide any guarantee, indemnity or any insurance in the case of a technical failure leading in the loss of access to the wallets or the Digital Bonds. In such a case, the Investor shall have recourse only against the payment gateway provider and not the Issuer. The Investor is solely responsible for proceeding with the necessary due diligence about the capacity of the payment gateway provider to actually provide the offered services and its ability to recover pursuant to any disaster or loss of service.

9.3.11.4. Role of Defactor

Defactor, as the smart contract implementation partner, supports technical infrastructure but does not maintain off-chain records or investor identity data. The responsibility for maintaining compliance, snapshots, and recovery mechanisms rests with the Issuer.

The Issuer is responsible for maintaining these contingency procedures and ensuring they meet regulatory standards. Defactor acts as the technology provider, supporting the implementation and automation of smart contracts and snapshots, but does not retain or control Digital Bondholder identity data.

In the event of a failure, the Issuer remains liable for enforcing Digital Bondholder rights and ensuring that affected investors are either reinstated through reissued Digital Bonds or compensated per the terms of the security instruments.

9.4. Further issues

The Issuer may from time to time without notice to or the consent of the Digital Bondholders create and issue further Digital Bonds having the same rights, restrictions, terms and conditions as the Digital Bonds in all respects (or in all respects save for the Issue Date, the first payment of interest thereon and/or the Issue Price) so that the same shall be consolidated and form a single Series with the already issued Digital Bonds.

9.5. Digital Bonds Maturity, denomination and ranking

The Digital Bonds may have any Maturity between one month and 99 years, subject to compliance with all applicable legal and/or regulatory restrictions and any denomination (in euros or equivalent in any other FIAT currency) as may be decided by the Issuer (as indicated in the relevant Final Terms).

The Digital Bonds rank equally among themselves and (subject to the provisions of any security documents) *pari passu* in right of payment with all other present and future unsecured and unsubordinated obligations of the Issuer (except for obligations mandatorily preferred by law).

9.6. Interest / interest payment dates / Amortization

The Digital Bonds may be interest bearing (fixed or floating rate), non-interest bearing or profit participating instruments. The length of the interest periods for interest bearing Digital Bonds and the applicable interest rate or its method of calculation may differ from time to time or be constant for any Series. All such information shall be specified in the relevant Final Terms as implemented by smart contracts. Whenever amortization of a Series of Digital Bonds has been foreseen in the relevant Final Terms, such amortization shall apply to all Digital Bonds of the Series.

Amortization is the repayment of the nominal/principal amount/Calculation Amount of a Digital Bonds during the lifetime of such Digital Bonds through regular payments as foreseen in the Final Terms. The applicable interest rate (fixed or floating) will be applied against the amount of principal amount outstanding on the relevant Determination Date taking into account all repayments of nominal/principal amount/Calculation Amount made through amortization.

Interest accrual shall begin on the date specified within the relevant Final Terms (the “**Date of Accrual**”).

Payment of interests under a Series or a Tranche of Digital Bonds will be made on the date as indicated in the relevant Final Terms (each, an “**Interest Payment Date**”).

In case the said payment date would not fall on a Business Day, then the payment shall be due on the following Business Day, unless such day falls into the next calendar month, in which case the payment shall be due on the first preceding Business Day.

If any date for payment is not a Business Day, the Digital Bondholder shall not be entitled to any interest or other sum in respect of such postponed payment.

9.7. Payments of principal amount and interest

The Digital Bonds will be settled through the facilities of the electronic platform.

Any payments under the Digital Bonds made by the Issuer, or on its behalf, to the Digital Bondholders is subject to the Payment Waterfall, as further described in Section 9.8 (*Ranking of Digital Bonds – Subordination*) of the Information Memorandum.

Payments of principal amount and interests, if any, on the Digital Bonds shall be made by the Issuer, on each Payment Date, for further payment on the wallet of each Digital Bondholder held on the electronic platform held by a crypto payment gateway provider (a cryptocurrency payment gateway is a payment processor for virtual currencies, similar to the payment processor gateways and acquiring banks in credit card payment networks. Cryptocurrency gateways enable you to accept digital payments and receive fiat currency immediately in exchange). A record of each payment made, distinguishing between payments of principal and payments of interest, shall be recorded in the electronic records held by the Issuer and such registration in the record held by the Issuer together with the evidence of the wire shall be evidence that the payment has been made.

Furthermore, all payments are subject in all cases to:

- any applicable fiscal or other laws, regulations and directives; and
- the condition that if a payment is made to a Digital Bondholder in breach of the Information Memorandum, as supplemented by the relevant Final Terms (as implemented by smart contracts), such Digital Bondholder shall repay the amount so received to the Issuer's account. The Issuer shall then pay out the moneys so received in the way they were payable in accordance with the Information Memorandum, as supplemented by the relevant Final Terms (as implemented by smart contracts). If such repayment is not enforceable, the Issuer is authorised and obliged to make payments in such a way that any over-payments or under-payments made in breach of the Information Memorandum, as supplemented by the relevant Final Terms (as implemented by smart contracts), are set-off by correspondingly decreased or increased payments.

In addition, the Digital Bondholders agree that any payment under the Digital Bonds may be affected by a Force Majeure Event. Other than as provided herein or in the relevant Final Terms (as implemented by smart contracts), no commission or expenses shall be charged to the Digital Bondholders in respect of such payments.

Any claim brought by Digital Bondholders against the Issuer in relation to the Digital Bonds shall be exclusively limited to the Issuer's assets or pledged assets in favour of the Digital Bondholders.

9.8. Ranking of Digital Bonds - subordination

The Digital Bonds will be the Issuer's general obligations. The Digital Bonds rank equally among themselves and (subject to the provisions of any security documents) *pari passu* in right of payment with all other present and future unsecured and unsubordinated obligations of the Issuer (except for obligations mandatorily preferred by law).

The Issuer may issue other securities subject to priority right of payment in the case of a default by the Issuer, by virtue of security interests granted on one or several assets of the Issuer or claims held by the Issuer.

Individual security interest

As security for its obligations under the Digital Bonds (the “**Secured Obligations**”), The Issuer hereby grants to each Digital Bondholder a first ranking pledge (*gage de premier rang*) over the a portion of the claims the Issuer holds in the Traditional Bonds which subscription was financed by the proceeds of the Digital bonds held by each Digital Bondholder, equal to the *prorata* of the Digital Bonds held by the relevant Digital Bondholder in the relevant Series, under and subject to the provisions of the law of 5 August 2005 relating to financial collateral arrangements, as amended (the “**Pledge**”). Such Pledge becomes effective each time Digital Bonds are subscribed by a Digital Bondholder.

As an example, if one million (1,000,000) Digital Bonds of a Series denominated “ABC123” are issued and that one Digital Bondholder holds ten percent (10%) of that Series ABC123, such Digital Bondholder shall have a pledge over the claims held by the Issuer against LCL Opportunities Luxembourg S.C.S., in the Series of Traditional Bonds financed by such Series of Digital Bonds, up to ten percent (10%) of the proceeds coming from that Series of Digital Bonds (the “**Proceeds Share**”).

Whenever the proceeds of the Digital Bonds are used to subscribe to Traditional Bonds, the Issuer will notify LCL Opportunities Luxembourg S.C.S. that the claims existing under the Traditional Bonds are pledged in favour of the Digital Bondholders holding Digital Bonds in the relevant back-to-back Series.

Until the occurrence of an Event of Default which has not been remedied, the Issuer shall be entitled to collect all monies or proceeds in principal and interest which are owed under the claims object of the Pledge.

In the case of an Event of Default which has not been remedied, each Digital Bondholder shall notify LCL Opportunities Luxembourg S.C.S. of the number of Digital Bonds held and that they request direct payment out of the proceeds of the Traditional Bonds in the relevant Series, up to their Proceeds Share, on the bank account each Digital Bondholder will indicate.

If a Digital Bondholder does not notify his/her/its request of direct payment, the funds coming from the proceeds of the relevant Traditional Bonds Series shall be held by LCL Opportunities Luxembourg S.C.S. on behalf of the relevant Digital Bondholder and each relevant Digital Bondholder shall in the relevant case have a right of retention in respect of these funds.

For any unpaid remaining claim of the Digital Bondholder against the Issuer in excess of the Proceeds Share, such remaining claim shall rank *pari passu* in right of payment with all other present and future unsecured and unsubordinated obligations of the Issuer (except for obligations mandatorily preferred by law).

Neither the obligations of the Issuer nor the rights, powers and remedies conferred upon each Digital Bondholder by this Pledge provisions or by law, nor the Pledge created hereby shall be discharged, impaired or otherwise affected by:

- (i) any amendment to, or any variation, waiver or release of, any Secured Obligations; or
- (ii) any failure to take, or to fully take, any security contemplated by any other agreement or otherwise agreed to be taken in respect of any Secured Obligations; or
- (iii) any failure to realise or to fully realise the value of, or any release, discharge, exchange or substitution of, any security taken in respect of any Secured Obligations; or
- (iv) any other act, event or omission which might operate to discharge, impair or otherwise affect
- (v) any of the obligations of the Issuer contained in this Clause, the rights, powers and remedies conferred upon each Digital Bondholder by this the Pledge or by law.

For the avoidance of doubt, the Issuer hereby waives any rights arising now or in the future (if any) under article 2037 of the Luxembourg civil code as well as any benefit of discussion (*bénéfice de discussion*) as set forth by article 2021 of the Luxembourg civil code or benefit of division (*benefice de division*) as set forth by article 2026 of the Luxembourg civil code.

The Issuer hereby irrevocably waives any right of recourse, right, action and claim (including, for the avoidance of doubt, by way of set-off or by way of protective measures such as a *saisie-arrêt*) that it may have, whether by way of subrogation or directly or of any other nature, further to an enforcement of the Pledge by any means whatsoever (including, in particular, the right of recourse the Issuer may have against such entity under the terms of article 2028 et seq. of the Luxembourg civil code).

For the purpose of articles 1278 et seq. of the Luxembourg civil code and any other relevant legal provisions, to the extent required under applicable law and without prejudice to any other terms hereof or of any other bonds and in particular Clause 15.2. hereof, each Digital Bondholder is irrevocably deemed to have reserved and the Issuer agrees to the preservation of this Pledge and the security interest created thereunder in case of transformation, assignment, novation, amendment or any other transfer of the Secured Obligations.

The Pledge shall remain in effect for the benefit of any transferee of the Digital Bonds transferred in any way and for any reason. However, such transfer shall be opposable to the Issuer and LCL Opportunities Luxembourg S.C.S. only if such transfer was duly notified to the Issuer in accordance with the provisions of Clause 9.3.6. of the Information Memorandum.

Any dispute arising in connection with the Pledge shall be exclusively submitted to the competent courts of Luxembourg.

9.9. No other advantages

Unless specified otherwise in the relevant Final Terms (as implemented by smart contracts), no other advantages are attached to this issue of Digital Bonds. Digital Bondholders are entitled to receive coupon/interests and principal amount at Maturity (save in the case of amortization or in the case of early repayment), according and subject to the conditions of the present Information Memorandum and of the applicable Final Terms (as implemented by smart contracts).

9.10. Event of Default

The Digital Bonds shall become immediately due and repayable at their Final Redemption Amount in any of the following events (each an "**Event of Default**"):

9.10.1. default is made for a period of 10 (ten) Business Days (or such shorter period as specified in the applicable Final Terms, as implemented by smart contracts) or more in the payment of any sum due in respect of the Digital Bonds, unless such payment default is due to a Force Majeure Event or a Disruption Event:

- a) supervised management ("*gestion contrôlée*"), judicial liquidation ("*liquidation judiciaire*"), bankruptcy ("*faillite*") of the Issuer, or it becomes insolvent or a receiver or liquidator is appointed for all or any material part of its business or assets of the Issuer, or any act is done or event occurs under any foreign laws has an effect substantially similar to any foregoing acts or events;
- b) the Issuer fails to comply with any of the terms of the Information Memorandum or of applicable Final Terms (as implemented by smart contracts) or of any security agreement granted to the benefit of the Digital Bondholders;
- c) it is or will become unlawful for the Issuer to perform or comply with any one or more of its obligations under the Information Memorandum and/or the Final Terms (as implemented by smart contracts);
- d) if any order shall be made by any competent court or any resolution passed for the winding up or dissolution of the Issuer as an entire legal entity save for the purposes of amalgamation, merger, consolidation, reorganisation or other similar arrangement; or
- e) as may be further specified in the applicable Final Terms (as implemented by smart contracts).

9.11. Redemption, purchase and options

9.11.1. Redemption at Maturity

Payment of the Redemption Amount in cash in FIAT currency

Unless previously redeemed, exchanged or purchased and cancelled as provided below, each Digital Bonds will be redeemed at its Final Redemption Amount on the Maturity Date specified in the applicable Final Terms (as implemented by smart contracts). Redemption at Maturity will be made via payment in cash in FIAT currencies.

Payment of the Redemption Amount by exchange of securities

Upon request of a Digital Bondholder, the Issuer's obligation to pay the Final Redemption Amount on the Maturity Date may be satisfied by the Issuer delivering an equivalent proportion of new Digital bonds issued by the Issuer through an exchange of securities (repayment by reinvestment). In this respect and subject to the availability and existence of such other Digital Bonds. Digital Bondholders' requests must be received within 1 (one) month preceding the Maturity Date (and shall contain a copy of the subscription agreement in connection with the new Digital Bonds duly filled in by the Digital Bondholder, if any).

Upon receipt of the Digital Bondholder's request the Issuer shall apply the redemption amounts to the subscriptions for the new digital bonds for the account of the relevant Digital Bondholders. Delivery shall be made in accordance with the rules and procedures established by the Issuer.

9.11.2. Amortization

Amortization is the repayment of the nominal/principal amount/Calculation Amount of a Digital Bonds during the lifetime of such Digital Bonds through regular payments as foreseen in the Final Terms.

Whenever amortization of a Series of Digital Bonds has been foreseen in the relevant Final Terms, such amortization shall applies to all Digital Bonds of the Series.

9.11.3. Early Redemption for taxation Reason

If, in relation to any Series of Digital Bonds, as a result of any amendment to or change in or in the official interpretation or administration of the laws, regulations or rulings of their jurisdiction of incorporation or, in any case, of any political subdivision thereof or any authority therein or thereof having power to tax which becomes effective on or after the date of issue of the first Tranche of Digital Bonds or such other date as may be specified in the relevant Final Terms (as implemented by smart contracts), the Issuer would be required, for reasons outside its control, and after making such endeavours as may be reasonable to avoid such requirement, to make any withholding or deduction, the Issuer may at its option, at any time, on giving not more than 60 (sixty) nor less than 30 (thirty) Business Days' notice to the Digital Bondholders (which notice shall be irrevocable), redeem on the next Interest Payment Date (the "**Early Redemption Date**") all, but not some only, of the outstanding Digital Bonds comprising the relevant Series at their Early Redemption Amount, which shall be (subject to any applicable provision specified in the applicable Final Terms) their principal amount or, in the case of any original issue discount Digital Bonds, the issue price of such Digital Bonds on their original issuance plus accrued original issue discount to but, excluding the date fixed for redemption or such other redemption amount as may be specified in or determined in accordance with the relevant Final Terms (as implemented by smart contracts), together with accrued interest (if any) thereon to but excluding the date fixed for redemption (the "**Early Redemption Amount**").

9.11.4. Early Redemption at the option of the Issuer ("**Call Option**")

If the Call Option is specified as applicable in the relevant Final Terms (as implemented by smart contracts), the Issuer may, upon giving not less than 7 (seven) calendar days' notice (or such other notice period as may be specified in the applicable Final Terms as implemented by smart contracts) to the Digital Bondholders of the relevant Series (which notice shall be irrevocable), redeem 7 (seven) calendar days later upon the expiry of such notice (the **"Call Option Redemption Date"**) all or some only of the Digital Bonds then outstanding on the Call Option Redemption Date indicated in the applicable Final Terms (as implemented by smart contracts) and at the Optional Redemption Amount, which shall be (subject to any applicable provision specified in the applicable Final Terms, as implemented by smart contracts) their principal amount or, in the case of any original issue discount Digital Bonds, the issue price of such Digital Bonds on their original issuance plus accrued original issue discount to but excluding the date fixed for redemption together, if appropriate, with interest accrued to but excluding such Call Option Redemption Date (the **"Call Option Redemption Amount"**).

9.11.5. Early Redemption at the Option of a Digital Bondholder (**"Put Option"**)

If the Put Option is specified as applicable in the relevant Final Terms (as implemented in smart contracts), a Digital Bondholder may have the right to require the Issuer to redeem the Digital Bonds subscribed by him/her/it in a relevant Series on the Put Option Date at its principal amount, together with accrued and unpaid interest (if any) to such date (but, excluding the date fixed for redemption) and less a pro-rata amount of all fees, costs and expenses incurred and recharged by the Issuer in connection with such redemption (the **"Put Option Redemption Amount"**). To exercise such right, the Digital Bondholder shall give by the end of a calendar quarter a notice (or such other notice period as may be specified in the applicable Final Terms) to the Issuer (the **"Put Option Notice"**) for the Put Option to be effective on the last calendar day of the following calendar quarter (the **"Put Option Redemption Date"**). The Put Option may be exercised only if the Put Option Amount to be redeemed are corresponding to the entire outstanding principal amount of the Digital Bonds or at least to 25% of the Digital Bonds held by the Digital Bondholder in the relevant Series.

Payment in respect of any such Digital Bond shall be made by transfer to an Euro (EUR) (or any other currency as indicated in the Final Terms (as implemented by smart contracts) or as agreed between the Issuer and the relevant Digital Bondholder) bank account as specified by the relevant Digital Bondholder in the Put Option Notice.

In the case that the assets available to the Issuer are not sufficient to redeem the Digital Bonds at their Put Option Amount in accordance with this section (the **"Adverse Event"**), the Issuer shall deliver an information notice to the Digital Bondholder not less than 20 (twenty) Business Days before the payment date of the Put Option Amount including information (the **"Information Notice"**) on (i) the Adverse Event, (ii) the revised Put Option Amount that the Issuer would proceed with following the Adverse Event on the original payment date and (iii) the revised payment date for a redemption of the Digital Bonds at the full Put Option Amount. In such a circumstance, the relevant Digital Bondholder will have 5 (five) Business Days following the receipt of the Information Notice to confirm his intention to proceed or not with the Put Option and the related revised Put Option Amount.

9.11.6. Early Redemption in the case of a Force Majeure Event

Each Digital Bonds may be redeemed by the Issuer following the occurrence of a Force Majeure Event, which is continuing, subject to the conditions set out below (the **“FME Option”**).

If the FME Option is specified in the applicable Final Terms (as implemented by smart contract), the Issuer may, upon giving not less than 7 (seven) calendar days’ notice (or such other notice period as may be specified in the applicable Final Terms) to the Digital Bondholders of the relevant Series (which notice shall be irrevocable), redeem 7 (seven) calendar days later upon the expiry of such notice (the **“FME Redemption Date”**) all or some only of the Digital Bonds then outstanding on the FME Redemption Date indicated in the applicable Final Terms (as implemented by smart contracts) and at the FME Redemption Amount, which shall be (subject to any applicable provision specified in the applicable Final Terms as implemented by smart contracts) their principal amount or, in the case of any original issue discount Digital Bonds, the issue price of such Digital Bonds on their original issuance plus accrued original issue discount to but excluding the date fixed for redemption together, if appropriate, with interest accrued to but excluding such FME Redemption Date (the **“FME Redemption Amount”**).

9.11.7. Purchase

Subject to any applicable legal or regulatory restrictions, the Issuer may at any time purchase Digital Bonds in the open market or by private treaty at any price. If purchases are made by tender, tenders must be available to all Digital Bondholders of the relevant Series alike.

9.11.8. Cancellation

All Digital Bonds purchased by or on behalf of the Issuer, exchanged or redeemed must be surrendered for cancellation. Any Digital Bonds so surrendered for cancellation may not be reissued or resold and the obligations of the Issuer in respect of any such Digital Bonds shall be discharged.

9.12. Market and liquidity risk for the Digital Bonds

There is no guarantee that a liquid secondary market will develop for the Digital Bonds. In the absence of market activities (i.e. bids and offers), it is unlikely that a liquid secondary market will develop. Even if such a market is established, there is no guarantee that it will provide sufficient liquidity to sell each Digital Bond. Accordingly – and provided the Issuer has no duty to early redemption – Digital Bondholders should be prepared to hold their investment in the Digital Bonds until the Maturity Date.

The value of the Digital Bonds might be subject to fluctuation, which may be substantial and could result in significant losses for Digital Bondholders.

9.13. Taxation

All payments of principal and interest by the Issuer will be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed, levied, collected, withheld or assessed by or on behalf of the Issuer's jurisdiction of incorporation or any political subdivision thereof or any authority therein or thereof having power to tax (collectively, "**Taxes**"), unless the withholding or deduction of the Taxes is required by law. Where withholding or deduction is required by law, the Issuer shall not be required to make any additional payment and may redeem the Digital Bonds in accordance with Section 9.11.3 (*Early Redemption for Taxation Reason*).

9.14. Prescription

Claims against the Issuer for payment in respect of the Digital Bonds shall be prescribed and become void unless made within 10 (ten) years (in the case of principal) or 5 (five) years (in the case of interest) from the appropriate relevant date in respect thereof.

9.15. Notices

Notices to the Digital Bondholders will be validly given if transmitted individually at the postal address or electronic mail address as set out in the register of Digital Bondholders or by any electronic message as agreed by the Digital Bondholder.

In addition, as long as the Digital Bonds are outstanding, all notices to the Digital Bondholders regarding the Digital Bonds will be published on the website of the Issuer and shall constitute good notification to them.

Notices to be given to the Issuer by any Digital Bondholder shall be in writing or through electronic means.

the Issuer and its agents are not liable for any damages which may be directly or indirectly caused by the lack of authenticity or validity of the authorizations which refer to a Digital Bondholder or third parties with the legal capacity to act on his behalf, provided those who appear to give such instructions are on an authorized signature list established by the Digital Bondholder. Once the signature complies at first glance with the specimens held at the Issuer's office, the Issuer or its agents shall not be held responsible for any damages caused by the fact that the signature(s) on the instructions given to the Issuer or its agents are fraudulent. The Issuer or its agents may trust the signature(s) without having to proceed with a more detailed investigation and decline all responsibility for damages that could result from the absence of any legitimization or any undetected forgery. In the case of doubt, the Issuer may (but does not have the obligation to) delay any transaction until it has received satisfactory confirmation.

The Issuer or its agents reserve the right to refuse to process an instruction from any person whose identity and permissions have not been sufficiently established through electronic emails or electronic communications on the crypto assets platform used (if any).

The Issuer or its agents, shall not be responsible for damages caused in the event of the Digital Bondholder's legal incapacity or the legal incapacity of a third party authorized to act on a Digital Bondholder's behalf, provided that the Issuer or its agents, have not received prior notice of the fact. The Digital Bondholder shall compensate and reimburse the Issuer or its agents for all complaints, legal action, fees expenses, damages losses or other sums paid, or responsibilities incurred by the Issuer or its agents resulting from the execution by the Issuer or its agents of such an instruction on the Digital Bondholder's part.

9.16. Underwriting and placement of the Digital Bonds

The Digital Bonds are not covered or guaranteed by underwriters guaranteeing the subscription or placement of the Digital Bonds for the Issuer.

9.17. Meeting of the Digital Bondholders

In accordance with article 100-14 of the Companies law, Articles 470-1 to 470-19 of the same law are not applicable to the Digital Bonds and the Digital Bondholders unless otherwise expressly stated herein.

As the terms and conditions of the Digital Bonds as stated in this Information Memorandum and in the applicable Final Terms (as implemented by smart contracts) cannot be amended, no resolutions should be adopted by the Digital Bondholders. In the unforeseeable circumstances where such resolutions would become needed, the vote of Digital Bondholders will be gathered, when possible, by electronic messages sent at least three (3) weeks prior to the date where such resolutions must be adopted on the electronic mail address indicated by the Digital Bondholder to the Issuer, and in any case through a notice published on the website of the Issuer at least three (3) weeks prior to the date where such resolutions must be adopted.

Only Digital Bondholders holding Digital Bonds prior to the fourteenth days prior to the date of the meeting of Digital Bondholders are entitled to participate in the voting process. The identity of Digital Bondholders admitted to vote shall be established through the data recorded in the distributed ledger of Digital Bonds. Any transfer of Digital Bonds after this date shall not invalidate the vote expressed by the prior Digital Bondholder.

All electronic communications will be supplemented by publications made on the Issuer's website containing the wording of the resolutions to be adopted and the recommendations of the Issuer.

The voting rights attached to the Digital Bonds are equal to the proportion of the principal amount of the Digital Bonds represented by the principal amount of the Digital Bonds held by the relevant Digital Bondholders. Each Digital Bond gives the right to at least one vote. Each Digital Bondholder may vote physically at the meeting, through proxies or by correspondence only. Proxies containing voting instructions or votes by correspondence shall be received by the Issuer at least two Business Days prior to the meeting to be taken into account, the Issuer being entitled to accept proxies or

votes by correspondence later if it so wishes. No meeting of Digital Bondholders through conference-call will be held.

Such vote might be needed should the rights of the Digital Bondholders generally or of a particular Series be amended for legal or practical reasons. In such cases, only the Digital Bondholders whose rights are impacted will be contacted. Decisions will be approved in accordance with the provisions of article 470-14 of the Companies Law.

9.18. Distribution, subscriptions and transfer restrictions

The collection and placement of subscriptions are made by and under the sole responsibility of the Issuer. In case of over subscription, the Issuer may allocate those amounts at its discretion.

The distribution of this document and the offering of the Digital Bonds in certain jurisdictions may be restricted by law. Persons into whose possession this document comes are required by the Issuer to inform themselves about and to observe any such restrictions.

The Digital Bonds are freely transferable between Digital Bondholders, and are freely transferable to third parties. **Any person acquiring Digital Bonds is deemed to have accepted the terms of this Information Memorandum (as supplemented from time to time) and of the relevant Final Terms.**

However, the Issuer may not control sales made on the secondary market, and shall in any case not be held liable for any resale not made in compliance with the provisions of this Information Memorandum. Any person reselling bonds does so under his/her/its sole responsibility and should ensure that such resale is compliant with applicable laws and regulations (including in connection with offers to the public and thresholds as set out in the Prospectus Regulation and Luxembourg Prospectus Law).

The following is a description of the contractual and other restrictions applicable to the issuance of the Digital Bonds.

9.18.1. United States of America

The Issuer has not been and will not be registered under the Investment Company Act and the Digital Bonds have not been and will not be registered under the Securities Act.

Consequently, the Digital Bonds may not be offered, sold, resold, delivered or transferred within the United States of America or to, or for the account or benefit of, U.S. persons (as such term is defined in Regulation S under the Securities Act) except in accordance with the Securities Act or an exemption therefrom and under circumstances which will not require the Issuer to register under the Investment Company Act.

9.18.2. European Economic Area

Specific information as to the potential restriction relating to the distribution, sale or transfer of the Digital Bonds within States of the EEA may be included in the relevant Terms and Conditions.

9.18.3. Switzerland

The Digital Bonds may be offered in Switzerland by way of a private placement (i.e., to a limited number of selected investors only), without any public advertisement and only to investors who do not purchase the Digital Bonds with the intention to distribute them to the public, unless they are themselves duly licensed to do so and distribute derivatives instruments based on the Digital Bonds, thus bearing solely the responsibility of such distribution and all related obligations towards the subscribers.

The investors might be individually approached directly from time to time.

9.18.4. United Kingdom

The Digital Bonds are not offered to the public in the United Kingdom.

9.18.5. General

These selling restrictions may be modified by the Issuer following a change in a relevant law, regulation or directive. Any such modification will be set out in a supplement to this Information Memorandum.

The Issuer will comply, to the best of its knowledge, in good faith and on reasonable grounds after making all reasonable investigation, with all applicable securities laws, regulations and directives in force in any jurisdiction in which it purchases, offers, sells or delivers Digital Bonds or possesses or distributes the Information Memorandum or any other offering material and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it of Information Memorandum under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries and the Issuer shall have no responsibility therefor. No action has been taken in any jurisdiction that would permit a public offering of any of the Information Memorandum, or possession or distribution of the Information Memorandum in any country or jurisdiction where action for that purpose is required.

9.19. Governing law and jurisdiction

The Digital Bonds are governed by, and shall be construed in accordance with the Luxembourg law.

The courts of Luxembourg-City are to have exclusive jurisdiction to settle any disputes which may arise out of or in connection with the Digital Bonds and accordingly any legal action or proceedings arising out of or in conjunction with the Digital Bonds may be brought in such courts ("**Proceedings**"). The Issuer irrevocably submits to the jurisdiction of such courts.

10. INFORMATION OF THE DIGITAL BONDHOLDERS

Quarterly information will be provided by the Issuer on the LynxCap group general business results and such quarterly reports will be publicly available on the Issuer's website:

<https://lynxcapinvestments.com>

By subscribing to the Digital Bonds, each Digital Bondholder agrees to receive any information from the Issuer in connection with the Digital Bonds by electronic mail or any other form of electronic communication.

All Digital Bondholders will receive the same level of information and will be treated equally.

11. FORM OF FINAL TERMS

LCL OPPORTUNITIES 3 S.à r.l.

a private limited liability company (*société à responsabilité limitée*) organised under the laws of the Grand Duchy of Luxembourg, having its registered office at 34, rue du Curé, L-1368 Luxembourg, Grand Duchy of Luxembourg, registered with the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés*) under number B 260326 (the "Issuer")

LEI number 485100EKU8FVREA8DP27

**Final Terms of digital bonds (the "Digital Bonds")
issued pursuant to the up to EUR 1.000.000 (one million euros) (or its equivalent in other
currencies) secured Digital Bonds Programme dated 26 February 2026,
as amended on 16 March 2026**

PART A CONTRACTUAL TERMS

Final Terms used herein shall be deemed to be defined as such for the purposes of the terms and conditions of the Digital Bonds and as set forth in the Information Memorandum dated 26 February 2026 as amended on 16 March 2026. This document constitutes the Final Terms of the Digital Bonds described herein and must be read in conjunction with the Information Memorandum. Full information on the Issuer and the offer of the Digital Bonds is only available on the basis of the combination of these Final Terms and the Information Memorandum (as supplemented from time to time). This Information Memorandum is available for viewing on the website of the LynxCap group (<https://www.lynxcapinvestments.com>)

Terms defined in Section 12 (*Definitions*) of the Information Memorandum should have the same meaning herein, unless specified otherwise.

THESE FINAL TERMS WILL BE IMPLEMENTED IN SMART CONTRACTS.

The *[insert title of series]* shall have the following terms and conditions which shall complete, modify and amend the terms and conditions set out in the Information Memorandum.

SHOULD THE ASSETS OF THE ISSUER NOT BE SUFFICIENT TO MEET AMOUNTS PAYABLE UNDER THE DIGITAL BONDS, DIGITAL BONDHOLDERS WILL SUFFER A LOSS OF THEIR INVESTED CAPITAL AND/OR ANY INTEREST PAYMENTS WHICH MAY BE A COMPLETE LOSS. AFTER THE REALISATION OF THE ASSETS, SHOULD THERE BE NO FUNDS AVAILABLE FOR THE PAYMENT OF ANY AMOUNT DUE BY THE ISSUER TO THE DIGITAL BONDHOLDER UNDER THE DIGITAL BONDS, INCLUDING IN RESPECT OF INTEREST (FIXED OR FLOATING OR OTHERWISE) OR PRINCIPAL, NO PAYMENT MAY BE MADE.

[Include whichever of the following apply or specify as "Not Applicable" (N/A). Note that the numbering should remain as set out below, even if "Not Applicable" is indicated for individual paragraphs or subparagraphs. Italics denote directions for completing the Final Terms.]

1. Issuer: LCL OPPORTUNITIES 3 S.à r.l.
2.
 - [(i)] Series Number: [•]
 - [(ii)] Tranche Number: [•]
(If fungible with an existing Series, details of that Series, including the date on which the Digital Bonds become fungible.)
 - [(iii)] Date on which the Digital Bonds become fungible: [Not Applicable/The Digital Bonds shall be consolidated, form a single series and be interchangeable for trading purposes with the *[insert description of the Series]* on *[insert date/the Issue, as referred to in paragraph 8 below [which is expected to occur on or about [insert date]]].*]
3. Specified Currency or Currencies: [•]
The currency can only be a Fiat Currency.
4. Aggregate Issue Size:
 - [(i)] Series: [•]
[Insert total nominal amount of outstanding Digital Bonds, including the Tranche which is the subject of the Final Terms.]
 - [(ii)] Tranche: [•]
5. Issue Price: [•] Euro/other currency per Digital Bond [plus

- accrued interest from *[insert date]*
(in the case of fungible issues only, if applicable)]
6. Aggregate Proceeds: [•]
7. (i) Specified Denominations: The Digital Bonds are issued with a minimum denomination of [•] each.
- (ii) Calculation Amount: [•] *[If only one Specified Denomination, insert the Specified Denomination. If more than one Specified Denomination, insert the highest common factor.]*
8. (i) Issue Date: [•]
- (ii) Interest Commencement Date: *[Specify/Issue Date]*
9. Maturity Date: [•] *specify date*
10. Interest Basis: *[fixed rate/floating rate]*
(further particulars specified below)
11. Redemption/Payment Basis: *[Redemption at par] [Amortization] [Subject to any purchase and cancellation or early redemption in accordance with the conditions set out in the Information Memorandum, the Digital Bonds will be redeemed on the Maturity Date at the Final Redemption Amount]*
12. Call Option: *[Applicable/Not Applicable]*
[(further particulars specified below)]
13. Date of Issuer's approval for issuance of Digital Bonds: [•]
14. Status of the Digital Bonds: The Digital Bonds rank equally among themselves and (subject to the provisions of any security documents) *pari passu* in right of payment with all other present and future unsecured and unsubordinated obligations of the Issuer (except for obligations mandatorily preferred by law).
15. Method of distribution: Non-syndicated

PART B – OTHER INFORMATION

1. RATINGS AND FINANCIAL GUARANTEE INSURANCE

The Digital Bonds issued are not rated, are not guaranteed or insured.

2. REASONS FOR THE OFFER – USE OF PROCEEDS

The net proceeds of the issuance of the Digital Bonds will be applied by the Issuer to acquire bonds issued by LCL Opportunities Luxembourg S.C.S., which are listed on the professional segment of the Euro MTF of the Luxembourg Stock Exchange.

This Final Terms comprises the final terms required for the issue of the Digital Bonds described herein pursuant to the up to EUR 1,000,000 (or its equivalent in other currencies) secured Digital Bonds Programme of the Issuer.

3. RESPONSIBILITY

The Issuer accepts responsibility for the information contained in this Final Terms, which, when read together with the Information Memorandum (and any supplement thereto) referred to above, contain all information that is material in the context of the issue of the Digital Bonds.

Signed on behalf of the Issuer:

12. DEFINITIONS

Adverse Event	has the meaning given to it under Section 9.11.5 (<i>Early Redemption at the Option of the Digital Bondholder</i>) of the Information Memorandum.
Agents	means any services provider appointed from time to time by the Issuer in respect of the Digital Bonds (and “ Agent ” designates anyone of them).
AIFM Directive	means the directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on Alternative Investment Fund Managers and amending Directives 2003/41/EC and 2009/65/EC and Regulations (EC) No 1060/2009 and (EU) No 1095/2010.
AIFM Law	means the Luxembourg law on alternative investment fund managers dated 12 July 2013.
Articles	means the Issuer’s coordinated articles of association dated 26 February 2025.
Atomic Settlement	Atomic settlement is a delivery-versus-payment settlement mechanism in which the transfer of the securities token and the transfer of the cash token (or other payment leg) are executed as one indivisible operation: either both legs settle, or neither settles (“all-or-nothing”, no intermediate state). This is the distributed ledger technology / tokenised markets equivalent of eliminating “principal risk” by ensuring the two linked transfers are simultaneous and conditional.
Board	the board of managers of the Issuer.
Business Day	TARGET Business Days
Call Option Redemption Amount	has the meaning given to it under Section 9.11.4 (<i>Early Redemption at the option of the Issuer</i>).
Call Option Redemption Date	has the meaning given to it under Section 9.11.4 (<i>Early Redemption at the option of the Issuer</i>).
Companies Law	means the Luxembourg law of 10 August 1915 relating to commercial companies, as amended.
Date of Accrual	has the meaning given to it under Section 9.6 (<i>Interest / Interest payment dates</i>).
Digital Bonds	means the digital bonds issued under the form of securities tokens. A

token is a digital instrument representing a debt instrument, in this case, bonds, issued by the Issuer.

Digital Bondholder means the persons who are for the time being holders of Digital Bonds in any Series or Tranches of a Series (as the case may be) and the words "Digital Bondholder" and "Holder" shall be construed accordingly.

Day Count Fraction means, in respect of the calculation of an amount of interest on any Note for any period of time (whether or not constituting an Interest Period or Interest Accrual Period, the "**Calculation Period**"):

- (i) if "**Actual/Actual**" or "**Actual/Actual (ISDA)**" is specified in the applicable Issue Terms, the actual number of days in the Calculation Period divided by 365 (or, if any portion of the Calculation Period falls in a leap year, the sum of (A) the actual number of days in that portion of the Calculation Period falling in a leap year divided by 366 and (B) the actual number of days in that portion of the Calculation Period falling in a non-leap year divided by 365);
- (ii) if "**Actual/365 (Fixed)**" or is specified in the applicable Issue Terms, the actual number of days in the Calculation Period divided by 365;
- (iii) if "**Actual/Actual(ICMA)**" is specified in the applicable Issue Terms:
 - (A) if the Calculation Period is equal to or shorter than the Determination Period during which it falls, the number of days in the Calculation Period divided by the product of (x) the number of days in such Determination Period and (y) the number of Interest Payment Dates that would occur in one calendar year assuming interest was to be payable in respect of the whole of that year; or (B) if the Calculation Period is longer than the Determination Period, the sum of: (x) the number of days in such Calculation Period falling in the Determination Period in which it begins divided by the product of (1) the number of days in such Determination Period and (2) the number of Interest Payment Dates that would occur in one calendar year assuming interest was to be payable in respect of the whole of that year; and (y) the number of days in such Calculation Period falling in the next Determination Period divided by the product of (1) the number of days in such Determination Period and (2) the number of Interest Payment Dates that would occur in one calendar year assuming interest was to be payable in respect of the whole of that year, if "**Actual/360**" is specified in the applicable Issue Terms, the actual number of days in the Calculation Period divided by 360;

Disruption Event means:

- a material disruption to those payment or communications systems

or to those financial markets which are, in each case, required to operate in order for payments to be made in connection with the Digital Bonds, which disruption is not caused by, and is beyond the control of, any of the parties; or

- the occurrence of any other event which results in a disruption (of a technical or systems-related nature) to the treasury or payments operations of a party preventing that, or any other party (i) from performing its payment obligations under the Information Memorandum or the Final Terms or (ii) from communicating with other parties in accordance with the terms of this , and which (in either such case) is not caused by, and is beyond the control of, the party whose operations are disrupted.

Early Redemption Amount has the meaning given to it under Section 9.11.3 (*Early redemption for taxation reasons*).

Early Redemption Date has the meaning given to it under Section 9.11.3 (*Early redemption for taxation reasons*).

EEA means the European Economic Area.

EURIBOR 6 months means, in relation to the Bonds the 6-month interbank reference offer rate at which prime banking institutions are prepared to deposit cash funds with another prime banking institution for a specified amount of time, as it is published at (or about) 11:00am CET in the adequate page by Thomson Reuters or published in another way by the European Money Markets Institute. For the purpose of Bonds, (i) the EURIBOR shall be rounded up to two decimal places in a percentage denomination and (ii) the EURIBOR used for the calculation of the interest payments is the 6 month EURIBOR published 2 Business Days before the first Interest Period and is updated (to the extent applicable) after each 3 (three) consecutive Interest Periods (each time using the 6 month EURIBOR published 2 Business Days before the start of the next 3 (three) Interest Periods).

Euro, EUR or euro means the lawful currency of the Member States of the European Union participating in the Economic and Monetary Union.

Event of Default has the meaning given to it under Section 9.10 (*Event of Default*).

FIAT Currency Fiat currency is currency that a government has declared to be legal tender, but it is not backed by a physical commodity.

FME Option has the meaning given to it under Section 9.11.6 (*Early redemption in the case of a Force Majeure Event*).

FME Redemption Amount	has the meaning given to it under Section 9.11.6 (<i>Early redemption in the case of a Force Majeure Event</i>).
FME Redemption Date	has the meaning given to it under Section 9.11.6 (<i>Early redemption in the case of a Force Majeure Event</i>).
Force Majeure Event	means an event or circumstance which prevents or otherwise impedes the determinations or the performance of the duties of the Issuer and/or an Agent in relation to the Digital Bonds. These events and circumstances may include, without limitation, a system failure, fire, building evacuation, natural or man-made disaster, act of God, measures from public authorities, armed conflict, epidemics or pandemics, act of terrorism, riot or labour disruption or any similar intervening circumstance.
General Data Protection Regulation	has the meaning given to it under Section 8 (<i>Data protection</i>).
Information Notice	has the meaning given to it under Section 9.11.4 (<i>Early redemption at the Option of the Digital Bondholder</i>).
Interest Payment Date	has the meaning given to it under Section 9.6 (<i>Interest / interest payment dates</i>).
Investment Company Act	means the United States Investment Company Act of 1940, as amended.
Issue Date	has the meaning given to it under Section 9.3 (<i>Issue procedure - Form of Digital Bonds - Transferability</i>) of the Information Memorandum.
Issue Price	has the meaning given to it under Section 9.3 (<i>Issue procedure - form of Digital Bonds - transferability</i>).
Issuer	means LCL Opportunities Luxembourg S.C.S. , a common limited partnership (<i>société en commandite simple</i>), organised under the laws of the Grand-Duchy of Luxembourg, having its registered office at 34, rue du Curé, L-1368 Luxembourg, Grand Duchy of Luxembourg, registered with the Luxembourg Register of Commerce and Companies(<i>Registre de Commerce et des Sociétés</i>) under number B 267834.
Interest Commencement Date	Means the issuance date of the Digital Bonds or such other date as may be specified in the applicable Final Terms.
Interest Period	Means the period beginning on (and including) the Interest

Commencement Date and ending on (but excluding) the first Interest Payment Date and each successive period beginning anon (and including) and Interest Payment Date or the Maturity Date, as applicable.

LEI	means legal entity identifier.
Maturity	means the maturity of the Digital Bonds, as indicated in the relevant Final Terms (as implemented in smart contracts).
Maturity Date	means the calendar date on which Maturity occurs.
Personal Data	has the meaning given to it under Section 8 (<i>Data protection</i>).
Proceedings	has the meaning given to it under Section 9.19 (<i>Governing law and jurisdiction</i>).
Processors	has the meaning given to it under Section 8 (<i>Data protection</i>).
Programme	means the up to EUR 1.000.000 (one million euros) (or its equivalent in other currencies) Digital Bonds programme under this Information Memorandum.
Prospectus Law	means the Luxembourg law dated 16 July 2019 on prospectuses for securities, as amended.
Prospectus Regulation	means the regulation (EU) 2017/1129 of 14 June 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market.
Put Option	has the meaning given to it under Section 9.11.4. (<i>Early Redemption at the Option of the digital bondholder</i>).
Put Option Redemption Amount	has the meaning given to it under Section 9.11.4. (<i>Early Redemption at the Option of the Digital Bondholder</i>).
Put Option Redemption Date	has the meaning given to it under Section 9.11.4. (<i>Early Redemption at the Option of the Digital Bondholder</i>).
Put Option Notice	has the meaning given to it under Section 9.11.4. (<i>Early Redemption at the Option of the Digital Bondholder</i>).
Relevant Member State	any Member State of the EEA.
RESA	means the Electronic Compendium of Companies and Associations

(Recueil des Sociétés et Associations).

Responsible Person	means the Issuer.
Securities Act	means the United States Securities Act of 1933, as amended.
Shareholder(s)	means the shareholder(s) of the Issuer, from time to time.
Specified Currency	means the currency in which will be paid the principal and interest of the Digital Bonds, as specified in the relevant Final Terms.
Subsidiary	means any legal entity in which the Issuer holds, directly, or indirectly shares, units, or any other kind of equity instrument.
TARGET System	means the Trans-European Automated Real-Time Gross Settlement Express Transfer System (known as TARGET or T2).
TARGET Business Day	means any day on which the TARGET System is open for the settlement of payments in euro.
Tranche	means together the bonds corresponding to a subdivision of a Series of Digital Bonds, designated as a tranche within the relevant Final Terms. Each Series of Digital Bonds may be issued in Tranches and may have different settlement, issue dates or first interest payment dates. The specific terms of each Tranche (which will be supplemented, where necessary, with supplemental terms and conditions) will be set out in the relevant Final Terms.
U.S.	means the United States of America.
USD or U.S. dollar	means the lawful currency of the U.S.
U.S. person	has the meaning given to it in Regulation S under the Securities Act.
