

LCL OPPORTUNITIES 3 S.à r.l.

Series AC Digital Bond — ISIN XS3356029788

Investor Guide: What Happens at Early Redemption

Issuer Call Option | Investor Put Option

This information document explains to you as an investor what will happen to your investment in the LCL Series AC Digital Bond in three scenarios:

- (1) when the Issuer decides to call (redeem early) all bonds,
- (2) if the Issuer redeems for tax reasons, and
- (3) when you as an investor choose to exercise your put option on a specific date.

Please read this guide alongside the Issuer's Information Memorandum and Final Terms. If you have any questions, please contact Tokinvest before any deadline.

Bond Quick Reference

Bond	LCL Opportunities 3 — Series AC Digital Bond
ISIN	XS3356029788
Issue Date	15 May 2026
Maturity Date	15 May 2030
Coupon	10.0% per annum, paid quarterly
Interest Payment	10 Business Days after each Determination Date (1 Jan, 1 Apr, 1 Jul, 1 Oct)
Issuer Call — Eligible From	15 May 2028 (at Issuer's discretion on any date after this)
Investor Put Dates	15 May 2028 and 15 May 2029 (specific dates only)
Redemption Amount	€1.00 per bond plus accrued and unpaid interest
Smart Contract	0x83eCECE38d58C7CCa6085462F2437Ad67c7c338F (Ethereum)

Section 1 — What Happens When the Issuer Calls the Bond**1.1 What is the Issuer Call Option?**

The Issuer (LCL Opportunities 3 S.à r.l.) has the right — but not the obligation — to redeem some or all outstanding Series AC Digital Bonds before the scheduled Maturity Date of 15 May 2030. This means that the digital bonds are returned to the Issuer and your principal and accrued interest is returned to you. This is called exercising the "Call Option."

The Issuer may exercise this right on any date from 15 May 2028 onwards. You will not be asked for your consent and cannot opt out or refuse. Once the Issuer has given notice it is irrevocable and the bonds must be returned.

1.2 Could the Issuer call only some bonds and not mine?

Yes. The IM permits the Issuer to call all or some of the outstanding bonds. If a partial call is made, only the holders of the bonds selected for redemption will be affected — the remaining bonds continue until maturity or a further call. If the Issuer calls bonds held on your behalf by Tokinvest we will notify you directly that your bonds are included in a call.

1.3 How much notice will you receive?

The Issuer must give at least 7 calendar days' notice before the Call Option Redemption Date. Tokinvest will receive the notice on your behalf and advise you via your registered contact details held in our records for you. The notice is irrevocable once issued — the Issuer cannot withdraw it. Redemption takes effect 7 calendar days after the notice period expires. Notice may also be published on the LynxCap Investments website (<https://www.lynxcapinvestments.com>).

1.4 What will you receive?

For each bond called you will receive:

- €1.00 — the full face value (principal) per bond
- Plus all interest that has accrued and has not yet been paid, up to (but not including) the Call Option Redemption Date

Payment will be made up to 10 Business Days after the Call Option Redemption Date. Funds will be returned to your account with Tokinvest where you can withdraw to your bank or invest in other products on our platform.

1.5 What do you need to do?

In most cases, nothing — the redemption is automatic for the bonds selected. However, you should:

STEP 1

Watch for notice from Tokinvest

You will receive communication confirming whether your bonds are included in the call, the Call Option Redemption Date, and the amount you will receive. Ensure your contact details on the platform are current.

STEP 2

Verify your payment details are correct

Ensure your registered bank account or payment details on Tokinvest are up to date if you wish to withdraw the funds to an external account.

STEP 3

Note the redemption date

Interest accrues up to but not including the Call Option Redemption Date. Payment arrives 10 Business Days after that date.

STEP 4

Check your account for receipt of funds

The tokens for called bonds will be redeemed and funds will appear in your account within the settlement period. If only some of your bonds were called, your remaining tokens continue as before.

1.6 What happens to your bond tokens?

This bond is implemented as a digital token on the Ethereum blockchain (smart contract: 0x83eCECE38d58C7CCa6085462F2437Ad67c7c338F). Tokens for called bonds will be returned to the Issuer where they may be cancelled ("burned") on-chain automatically. You do not need to take any action. If only some of your bonds are called, the tokens for the remaining bonds are unaffected.

Section 2 — Early Redemption for Tax Reasons or Force Majeure Event

2.1 What are these redemptions?

Separately from the Call Option, the Issuer has the right to redeem all Series AC digital bonds early if;

i) a change in tax law or its official interpretation means the Issuer would be required to make a withholding or deduction from payments to bondholders — for reasons outside its control and after taking reasonable steps to avoid it. This is called an "Early Redemption for Taxation Reasons" and is described in Section 9.11.3 of the IM documentation

(* note that this is an edge-case protection for the Issuer against unforeseen tax changes. It has nothing to do with your personal tax position).

OR

ii) An event occurs due to circumstances outside the Issuer's reasonable control that prevent it from operating normally — for example, extreme events that disrupt its business or ability to perform its obligations under the bond. Such events are known as Force Majeure Events. This is called exercising the FME Option and is described in section 9.11.6 of the IM documentation

Like the Call Option, these redemptions are the Issuer's rights, not yours. You will not be asked for your consent in the case of an Early Redemption for Taxations Reasons or the Issuer exercising the FME Option.

2.2 Key features of a Tax Redemption

- The Issuer may only use this right if the tax change becomes effective after the Issue Date (15 May 2026).
- Unlike the Call Option, a tax redemption must redeem all outstanding bonds — the Issuer cannot selectively redeem some.
- Notice: the Issuer must give between 30 and 60 Business Days' irrevocable notice to bondholders.
- Redemption occurs on the next Interest Payment Date following expiry of the notice period.
- You will receive: €1.00 principal per bond plus accrued interest to (but not including) the redemption date — the same amount as a standard early redemption.

You do not need to take any action if a tax redemption is triggered. The process is automatic, and proceeds will be paid to your account with Tokinvest in the same way as a standard redemption.

2.3 Key features of a Force Majeure redemption

- The Issuer may only use this right while a Force Majeure Event is continuing.
- Notice: the Issuer must give at least 7 calendar days' notice to bondholders. Once given, this notice is irrevocable.
- Redemption Date: redemption takes place 7 calendar days after the notice period expires (the "FME Redemption Date").
- Scope: the Issuer may redeem all or only some of the outstanding bonds — similar to the Call Option, this is not necessarily a whole-series redemption.
- Amount you will receive: €1.00 principal per bond, plus interest accrued (but not yet paid) up to (but not including) the FME Redemption Date.

You do not need to take any action. If your bonds are included in a Force Majeure redemption, you will be notified directly, and proceeds will be paid to your registered payment details in the usual way, with settlement 10 Business Days after the FME Redemption Date.

Section 3 — Exercising Your Put Option

3.1 What is the Put Option?

The Put Option gives you — as the bondholder — the right to require the Issuer to redeem your bonds early on specific dates. Unlike the Issuer Call (which the Issuer decides), the Put Option is your personal right. You choose whether to exercise it; other investors are not affected by your decision.

3.2 When can you exercise your Put Option?

There are two and only two dates on which you may exercise the Put Option:

Put Option Date	What you receive (per bond)	Notice deadline
15 May 2028	Principal (€1.00) + accrued unpaid interest to (but not including) redemption date, less any pro-rata Issuer fees/costs	By 31 March 2028 (end of Q1 2028)
15 May 2029	Principal (€1.00) + accrued unpaid interest to (but not including) redemption date, less any pro-rata Issuer fees/costs	By 31 March 2029 (end of Q1 2029)

Important: If you miss both Put Option dates without exercising, your bonds will continue until the Maturity Date of 15 May 2030 (or until the Issuer exercises its Call Option, if earlier).

3.3 How much will you receive? — The Put Option Redemption Amount

For each bond you hold, the Put Option Redemption Amount is calculated as follows:

- €1.00 — the full principal amount per bond
- Plus accrued and unpaid interest from the last interest payment date up to (but not including) the Put Option Date
- Less any pro-rata share of fees, costs and expenses incurred and recharged by the Issuer in connection with the redemption

Always check whether the Issuer has issued any Information Notice that may affect the amount before submitting your Put Option Notice. You can contact Tokinvest directly to enquire about this or any other question you have about the Put Option ahead of submitting your notice.

3.4 How do you give notice? — The notice mechanics

To exercise the Put Option you must submit a written Put Option Notice to the Issuer (via Tokinvest) by the end of the calendar quarter immediately before the Put Option Date you wish to elect. The specific deadlines are:

- For the 15 May 2028 Put Option Date: your notice must be submitted by 31 March 2028 (end of Q1 2028).
- For the 15 May 2029 Put Option Date: your notice must be submitted by 31 March 2029 (end of Q1 2029).

Your Put Option Notice must specify the number of bonds that you wish to redeem and should be sent to Tokinvest directly ops@tokinvest.capital.

3.5 Minimum size — Can I exercise on only part of my holding?

Yes. You may exercise the Put Option on some or all of your bonds, provided the amount you are putting represents at least 25% of your total Series AC bond holding. You cannot exercise on less than 25% of your holding.

3.6 What if the Issuer cannot pay in full? — The Adverse Event process

If the Issuer's available assets are insufficient to pay the full Put Option Redemption Amount, this constitutes an "Adverse Event." The following process applies:

1	Issuer issues Information Notice	At least 20 Business Days before the payment date, the Issuer must send you a formal Information Notice containing: (i) details of the Adverse Event; (ii) the revised (reduced) amount it can pay on the original date; and (iii) a revised later date on which it could pay the full Put Option Redemption Amount. Tokinvest will receive this notice on your behalf and inform you via your registered contact details. Please ensure that these are up to date.
2	You respond within 5 Business Days	Within 5 Business Days of receiving the Information Notice you must confirm whether you wish to: (a) proceed immediately and accept the revised (lower) amount on the original date, or (b) wait and receive the full Put Option Redemption Amount on the revised later date. Respond Tokinvest immediately if you receive an Information Notice — do not miss this 5 Business Day window.

3.7 Step-by-step: How to exercise the Put Option

STEP 1	Check for Information Notices Before anything else, confirm whether the Issuer has issued any Information Notice amending the Put Option Redemption Amount or conditions. These are available via Tokinvest and at https://www.lynxcapinvestments.com .
---------------	--

STEP 2

Verify you meet the minimum threshold

You can only exercise on a portion of your holding if that portion is at least 25% of your total Series AC bonds. Please check on the Tokinvest investor platform to confirm your current holding before submitting your notice.

STEP 3

Submit Put Option Notice before the quarterly deadline

Contact Tokinvest and submit your formal Put Option Notice by end of the calendar quarter before your chosen date — 31 March 2028 or 31 March 2029. Late notices will not be accepted.

STEP 4

Respond promptly to any Adverse Event Information Notice

If you receive an Adverse Event Information Notice from the Issuer, you have only 5 Business Days to elect whether to proceed at the revised amount or wait for full payment. Respond to Tokinvest immediately.

STEP 5

Token burn and settlement

On the Put Option Date your bond tokens returned to the Issuer where they will be cancelled. The Put Option Redemption Amount (principal + accrued interest, less any Issuer fees) is transferred your account with Tokinvest, settling within 10 Business Days.

Section 4 — Important Reminders

- Keep your contact details on the Tokinvest platform up to date. All notices — including irrevocable call notices (minimum 7 calendar days) and tax redemption notices (30–60 Business Days) — will be sent to your registered details.
- Keep your payment / bank account details current if you wish to withdraw your funds from the Tokinvest platform after redemption.
- Monitor your inbox and the LynxCap website (<https://www.lynxcapinvestments.com>) for any Information Notices that may update the Put Option Redemption Amount or other terms.
- The Issuer may call some but not all bonds — if a partial call occurs, check your Tokinvest account to confirm whether your specific bonds are affected.
- The bond is governed by Luxembourg law. Any disputes are subject to Luxembourg jurisdiction.
- This digital bond is not guaranteed or insured. Capital is at risk.
