

Tokinvest DMCC

LynxCap LCL Opportunities 3 Digital Bond token

Virtual Asset Whitepaper (Primary Distribution)

11th May 2026

REGULATORY DISCLAIMER

VARA has not taken any steps to verify the information set out in this whitepaper, including its accuracy and completeness, and has no responsibility for any loss arising from reliance on it. The liability for the content of the whitepaper lies with Tokinvest DMCC.

This whitepaper is a regulated disclosure document prepared in accordance with the requirements of the Dubai Virtual Assets Regulatory Authority (VARA). It is intended to provide prospective investors with a clear explanation of the Token and its distribution through the Tokinvest platform.

Core Product Sections (Sections 1–8)

These sections contain the primary investor-facing disclosure:

1. Key Features & Core Definitions
2. Token Overview
3. Parties, Roles & Responsibilities
4. Purchase, Redemption & Flow of Funds
5. Token Representation & Custody
6. Dealing, Pricing & Liquidity
7. Key Risks
8. Legal Structure & Important Disclosures

Appendices (Supporting Disclosures)

The appendices contain supporting detail required for completeness and regulatory transparency:

Appendix A – Tokinvest Overview, Governance & Regulatory Status

Appendix B – Regulatory Disclosures & Legal Information

This whitepaper provides a high-level description of:

- the Token; and
- its distribution through Tokinvest

It does not replicate the full detail of the underlying asset and Token documentation. Investors should rely on:

- the LCL Opportunities 3 Digital Bond Final Terms prospectus;
- the LCL Opportunities 3 Limited Retail Programme information memorandum;
- the LCL Opportunities Bond Programme prospectus; and
- the Risk Disclosure Statement for a full description of risks

1. KEY FEATURES & CORE DEFINITIONS

This Section summarises the key structural, operational, and economic characteristics of the Token and defines the principal terms used throughout this document. Capitalised terms introduced in this Section have the meanings given below and apply throughout.

1.1 Overview

The Token is the **LynxCap LCL Opportunities 3 Digital Bond token** (the “Token”), a digital representation of the economic performance of a bond issued by **LCL Opportunities S.C.S** (the “Bond Issuer”). The Bond Issuer is a common limited partnership (société en commandite simple) organised under the laws of the Grand-Duchy of Luxembourg, having its registered office at 34, rue du Curé, L-1368 Luxembourg, Grand Duchy of Luxembourg, registered with the Luxembourg Register of Commerce and Companies (Registre de Commerce et des Sociétés) under number B 267834

LCL Opportunities 3 (the “Token Issuer”) is a private limited liability company (société à responsabilité limitée), having its registered office at 34, rue du Curé, L-1368 Luxembourg, Grand Duchy of Luxembourg, registered with the Luxembourg Register of Commerce and Companies (Registre de Commerce et des Sociétés, Luxembourg) under number B 260326.

The Token Issuer is a fully owned subsidiary of **LynxCap Investments AG**, (“the Parent”) a Swiss public limited liability company, having its registered office at Lüssihofweg 4, 6300 Zoug, Switzerland, registered with the Register of Commerce of the canton of Zug under number CHE-244.186.164.

Decentral Limited (“Defactor”), is an Irish limited company, having its registered office at Dogpatch Labs, CHQ Building, Dublin 1, D01Y6H7, Ireland, registered under number 625523. Defactor provides the technology infrastructure for the tokenization process but does not act as an intermediary in issuance, custody, or compliance verification.

The Token is issued and managed by the Token Issuer and is made available to investors through a structured distribution framework involving Tokinvest as a licensed distributor.

1.2 Token Details

The Token is an asset-referenced virtual asset (ARVA) that represents a fractional beneficial interest in a senior secured bond (or bonds) issued by the Bond Issuer and identified by its International Securities Identification Number (ISIN). The issued bond is part of a wider programme from the Bond Issuer, full details of which can be found on the Luxembourg Stock Exchange website at; [Luxembourg Stock Exchange - LCL OPPORTUNITIES LUXEMBOURG S.C.S. | LuxSE](#)

The underlying bond confers defined contractual rights, including entitlement to principal and any applicable coupon payments, subject to the terms of the bond documentation. The Token does not constitute the bond itself but operates as a digital representation of an economic interest in the underlying instrument, with corresponding rights and obligations administered through an intermediary structure.

Tokenholders’ exposure is therefore dependent on the performance of the underlying bond and the proper operation of the associated legal, custody, and settlement arrangements. The product is intended to facilitate access, transferability, and fractionalisation of such exposure, while maintaining alignment with applicable regulatory requirements governing ARVAs.

1.3 Investment Objective

The Bond Issuer seeks to:

- provide a stable and attractive yield; and
- preserve capital and maintain liquidity

The proceeds of the bonds issued under the above-mentioned program may be used in connection with the financing of the acquisition of non-performing, sub-performing and performing loans portfolio and real estate owned, through the subscription by the Bond Issuer of debt instruments or equity, issued by a fully directly or indirectly held Subsidiary or Affiliated Companies.

1.4 Underlying Assets

The Digital Bond invests only in the specific ISIN identified bonds issued by the Bond Issuer as described above. The Token Issuer is contractually obliged to pass all proceeds from the issuance of the Digital Bond (excluding fees) into the bonds as per the **Limited Retail Programme information document** ("the LRP") included with this submission (below).

1.5 Key Parties

The following entities are involved in the structure, management, and distribution of the Token:

- **Token Issuer:** LCL Opportunities 3
- **Bond Issuer:** LCL Opportunities SCS
- **Parent Company:** LynxCap Investments AG
- **Decentral Limited ("Defactor")** provides the technology infrastructure for the tokens.
- **Custodian:** Hex Trust MENA (on behalf of clients of Tokinvest DMCC)
- **Primary Distributor:** Tokinvest DMCC, which provides investor onboarding, order aggregation, execution, and platform access

Tokinvest interfaces directly with the Token Issuer as its counterparty on behalf of underlying investors.

1.6 Role of Tokinvest

Tokinvest acts solely as:

- a licensed distributor of the Token; and
- the operator of the investor platform through which investors access the Token

Tokinvest does not:

- issue the Token;
- manage the underlying assets related to the bond issuance;
- determine investment strategy; or
- guarantee performance or returns

1.7 Token Purchases

The Tokens are offered on a buy now basis on the Tokinvest platform. Investors must hold sufficient balances (including all applicable fees) in the currency of issuance on account with Tokinvest to purchase Tokens.

Liquidity is subject to:

- sufficient balances of the Token available from the Token Issuer at the time of purchase;
- operational requirements on the Tokinvest Investor Platform; and
- prevailing market conditions

1.8 Pricing and Valuation

At primary purchase, the Tokens are valued at the same price as the underlying referenced senior secured bond. During the life of the bond there may be fluctuations between the prices of the two assets due to differences in liquidity between the token and the underlying instrument, prevailing market conditions in both the digital asset and traditional fixed income markets, supply and demand dynamics specific to the token, and any constraints on

transferability or access to secondary markets

1.9 Currency and Foreign Exchange

- Base currency of the Bonds: EUR and USD
- Tokinvest offering currency: EUR, USD or AED

Purchases, coupon flows and repayment of principal may involve foreign exchange conversion if not in the currency of the Token. Investors are exposed to fluctuations between currencies in this case which may impact investment returns.

1.10 Distributions

Distributions arise in the form of periodic coupon payments and return of principal as documented in the details of the underlying bond. Whilst token purchases are atomic and the Token Issuer initiates the accrual period upon receipt of investor funds, distributions may take up to 10 business days to be received in the investor's account with Tokinvest DMCC due to the payment structure of the tokenisation. Diagram 1 below displays the cashflow processes;

Diagram 1

1.11 Capital Protection

The Token does not provide:

- capital protection;

- guaranteed returns; or
- any form of insurance or principal preservation mechanism

Investors may lose part or all of their invested capital.

1.12 Nature of Investor Rights

Investors:

- obtain economic exposure to senior secured bonds through the Token via Tokinvest's distribution framework;
- are entitled to economic participation in the performance of the specific ISIN identified senior secured bond through the Token; and
- do not hold direct ownership of said bonds, only the Tokens and the rights that they represent.

All rights are governed by the documentation issued by the Token Issuer.

1.13 Tokenisation Framework

Ownership of the Token will be recorded on the CAP table held by Tokinvest DMCC, which:

- links investor identity to wallet addresses at a VARA approved custodian; and;
- records ownership using distributed ledger infrastructure

As a licensed distributor, Tokinvest DMCC is the sole counterparty to the Token Issuer and sits on their CAP table. The Token Issuer does not record Tokinvest's investors on their CAP table.

1.14 Token Identifiers & Reference Data

The following identifiers and reference information relate to the Tokens:

- **ISIN:** XS3356029788
- **Smart Contract Address:** 0x83eCECE38d58C7CCa6085462F2437Ad67c7c338F
(see <https://etherscan.io/token/0x83eCECE38d58C7CCa6085462F2437Ad67c7c338F>)
- **Issuer Domicile:** Luxembourg
- **Asset Class:** Senior Secured Bond
- **Tenor:** 4 years (from date of issuance) /2 years option
- **Call Option:** as from 15th May 2028 (see section 9.11 in the Information Memorandum)
- **Put Option:** dates 15th May 2028/15th May 2029 (see 9.11.5 in the Information Memorandum)
- **Coupon:** 10% fixed, paid quarterly
- **Minimum Investment (Token Issuer Level):** EUR 10k/USD10k or currency equivalent
- **Minimum Investment (through Tokinvest):** EUR 10k/ USD10k or currency equivalent

Further details are set out in the **Final Terms Digital Bonds Series document** ("the Final Terms") of the Digital Bond issued by the Token Issuer and included with this submission.

Final Terms Digital
Bonds Series AC_RT_c

1.15 Important Distinction

The Token is:

- issued and managed by LCL Opportunities 3; and
- made available to investors via Tokinvest as a distribution platform

Tokinvest does not act as issuer, asset manager, or fiduciary and does not assume responsibility for the investment performance of the Tokens.

1.16 Smart Contract Information

The Token is minted by a smart contract created and published by Defactor. The smart contract:

- is an ERC-20 compliant EVM compatible contract; and
- has been security audited and confirmed as secure by Zokyo on 28th March 2025. Audit findings are available here; [Zokyo audit report Defactor March28th 2025.pdf - Google Drive](#)

2. TOKEN OVERVIEW

2.1 Overview

The Token provides investors with access to the LCL Opportunities 3 Digital Bond, an on-chain product which allows investors to participate in the economic performance of senior secured bonds issued by the Bond Issuer as part of a limited retail programme (included with this submission).

The Token is issued under a legal structure which makes it pari passu and pro rata with all other creditors of the Bond Issuer in the case of default (see sections 9.5 and 9.8 of the Token Issuer's LRP document included with this submission).

2.2 Nature of the Token

The Token is an ARVA which references the economic performance of a specific and ISIN identified senior secured bond issued by the Bond Issuer.

2.3 Role of Tokinvest

Tokinvest acts as a licensed distributor and provides access to the Token through its platform.

Tokinvest enables investors to:

- purchase the Token;
- hold the Token within a controlled custody environment;
- receive cashflows arising from ownership of the Token; and
- list the Token for sale to other investors on the platform via a secondary market (where available)

Tokinvest does not manage or have any involvement with the Token or underlying bond asset.

2.4 Investment Exposure

Investors gain exposure to the economic performance of the referenced senior secured bond, which has an attractive fixed quarterly coupon. Returns are achieved through the yield from the referenced bond with principal returned at the maturity of the bond.

The Token represents fractionalised exposure to the underlying bond and is offered in lower minimum subscription denominations than other tokens issued by the Token Issuer. In consideration of the additional structuring and operational costs associated with enabling such fractional access, the coupon payable in respect of the Token may be set at a rate marginally lower than that of the underlying bond. The coupon payable by the Token is clearly described in the offering and this differential does not alter the disclosed entitlement of Tokenholders under the applicable terms and conditions

2.5 Token Custody

After purchase on the Tokinvest platform, investor holdings of the Token are maintained in individual segregated wallets held with a VARA regulated VA custodian under the oversight of Tokinvest. Tokinvest maintains a CAP table of each investor's holdings. Tokinvest's investors do not appear on the CAP table of the Token issuer.

2.6 Access and Participation

The LCL Opportunities 3 Digital Bond is a Token that is designed to be suitable for all investor types including retail. However, the Tokens may be made available through Tokinvest only to clients who have successfully completed all onboarding, KYC/AML, sanctions screening, suitability or appropriateness assessments, and who are located in jurisdictions where such distribution is lawful.

The Tokens will not be offered, sold, transferred, or made available to:

- any U.S. person, or any person acting for the account or benefit of a U.S. person;
- retail members of the public in the United Kingdom;

- persons located in any jurisdiction where the offer or sale would be unlawful;
- or any sanctioned, restricted, or otherwise prohibited person.

Access by persons resident in the European Economic Area may be restricted, limited, or unavailable depending on the laws and regulatory requirements of the relevant Member State.

Tokinvest shall apply ongoing controls in relation to transfers, secondary trading access, and beneficial ownership screening to ensure continued compliance with applicable distribution restrictions.

Tokinvest reserves the right to refuse, suspend, or terminate access where required for regulatory, legal, or investor protection reasons.

2.7 Relationship to Issuer Documentation

This document provides a high-level overview of the Token and its distribution through Tokinvest.

Full details of the Token and the underlying bond programme are set out in the official documentation issued by the Token and Bond Issuers and included with or mentioned within this submission. Investors should thoroughly review this underlying documentation before investing.

3. PARTIES, ROLES & RESPONSIBILITIES

3.1 Overview

The Token involves multiple parties across issuance, distribution, and custody. Tokinvest provides investor access to the Token but does not issue or manage the Token or the underlying bond.

3.2 Token Issuer, Bond Issuer & Parent Company

- **Token Issuer:** LCL Opportunities 3
- **Bond Issuer:** LCL Opportunities SCS
- **Parent Company:** LynxCap Investments AG

The Token Issuer is responsible for:

- issuance and Token integrity;
- accurate maintenance of underlying asset exposure;
- disclosure and reporting;
- ongoing compliance and regulatory alignment; and
- technology and smart contract governance

3.3 Tokinvest (Licensed Distributor & Platform Operator)

Tokinvest DMCC acts as a licensed distributor of the Token and operator of the investor platform.

Tokinvest is responsible for:

- investor onboarding and AML/KYC;
- order execution between investors and the Token Issuer;
- client money handling and settlement;
- custody integration and investor record-keeping; and
- ongoing investor servicing and reporting

Tokinvest does not:

- manage the Token, the underlying bond or control investment decisions; or
- guarantee performance or returns

3.4 Custody

Tokinvest operates a platform-controlled custody model supported by regulated third-party custodians.

As at the date of this document, custody services are provided through Hex Trust.

Custody providers are responsible for:

- safeguarding digital assets; and
- supporting secure holding and transfer within the platform environment

Investors do not interact directly with the custodian.

All holdings remain within the Tokinvest-controlled custody environment unless permitted for self-custody by Tokinvest.

3.5 Investor Relationship

Investors in this distribution:

- access the Token exclusively through Tokinvest;
- do not have a direct contractual relationship with the Token Issuer or Bond Issuer; and
- rely on Tokinvest for execution, custody, and servicing

All investor-facing services for this distribution are provided by Tokinvest.

3.6 Responsibility Summary

- **Token Issuer:** the structuring, issuance, and ongoing administration and regulatory compliance of the Token
- **Bond Issuer:** performance of the bond, including payment of interest and principal in accordance with its terms
- **Tokinvest:** investor access, execution, custody, and servicing

Each party operates within its defined role and is responsible only for the functions described above.

4. PURCHASE, REDEMPTION & FLOW OF FUNDS

4.1 Overview

Tokinvest investors access the Token exclusively through the Tokinvest platform. Tokinvest executes orders on behalf of investors and interfaces with the Token issuer for purchase and delivery of the Token.

Tokinvest acts as the sole counterparty to the Token issuer on behalf of their investors.

4.2 Token Purchase Process

The purchase process operates as follows:

1. **Onboarding**
Investors complete onboarding, including AML/KYC verification and account setup on the Tokinvest platform.
2. **Funding**
Investors deposit funds into their Tokinvest account via approved funding rails.
3. **Instruction**
Purchase orders are submitted through the Token offering page on the Tokinvest investor platform.
4. **Execution**
The purchase order is submitted to the Token Issuer and funds transferred to their fiat account with their correspondent institution.
5. **Delivery**
Following execution, tokens are received in the Tokinvest corporate wallet with Hex Trust and then transferred to the individual investor wallet and recorded on the Tokinvest CAP table.

4.3 Minimum Purchase Amount

Purchase amounts are:

- subject to minimum investment thresholds applied by the Token Issuer; and
- set at EUR10k, USD10k (or currency equivalent) as dictated by the issuance currency of the Token and underlying bond.

4.4 Redemption Process

Under normal circumstances redemptions occur only at the expiry date of the Token which is itself dictated by the terms of the underlying bond:

1. The Token Issuer makes final payment of coupon and principal to all Tokenholders on its CAP table.
2. Tokinvest receives the aggregate proceeds for all Tokens held by Tokinvest investors.
3. Tokinvest distributes proceeds to each investor on their internal CAP table based on Token holdings.
4. Tokens are transferred out of investor wallets and returned to the Token Issuer
5. No further rights or distributions are retained by the Token.

However, for specific issuances the Token Issuer may include a Put and/or Call option in the terms of the bond, as detailed in Section 9.11 of the LRP. A Put option allows the Tokenholder to request early redemption of the Token whilst a Call option allows the Token Issuer to redeem the Token early and pay principal plus any accrued interest to the Tokenholder.

For this instance of the Digital Bond, as per sections 18-21 of the Final Terms, the Token Issuer has implemented a Call option as applicable from 15th May 2028 and a Put option as applicable on 15th May 2028 and 15th May 2029 specifically.

The Token Issuer also reserves the right to redeem the Token early for taxation reasons (unforeseen changes in tax rules relevant to the Token and/or the Token Issuer) or should a force majeure event occur. Investors are advised to refer to both documents mentioned in this Section 4.4 for full details and to confirm that either or both of these terms are applicable.

Outside of the specific events mentioned above Tokens cannot be redeemed on demand and neither Tokinvest nor the Token Issuer are in any way obliged to redeem or repurchase tokens at any time.

4.5 Flow of Funds

Purchase:

Investor → Tokinvest Client Money Account → Token Issuer → Bond Issuer

- Investor funds are held in a segregated Client Money Account (CMA).
- Tokinvest transfers funds to the Token Issuer for each executed order (net of fees).
- The Token Issuer in turn transfers all proceeds to the Bond Issuer for investment in the underlying bond.

Redemption:

Bond Issuer → Token Issuer → Tokinvest → Investor

- Redemption proceeds are received by Tokinvest from the Token Issuer
- Funds are credited to investor accounts on the platform.

4.6 Accrual Start

Coupon accrual commences when the Token Issuer has received and cleared subscription funds from the investor. Tokinvest will normally remit investor funds to the Token Issuer on the date of purchase (subject to a cut-off time of 6pm UAE), however such remittances may be subject to operational delays and confirmation from the Token Issuer may therefore occur on the same or a subsequent business day. Investors can view their tokens and accrual schedule on the Tokinvest investor platform once Tokinvest has received confirmation from the Token Issuer.

Purchase orders received after the cut-off are processed on the next business day and the coupon accrual calculation is adjusted accordingly.

4.7 Investor Token Positions

Investors:

- do not submit instructions directly to the Token Issuer;
- are represented by Tokinvest in all purchase order and redemption activity; and
- receive allocations and proceeds through the Tokinvest platform.

Tokinvest maintains the definitive internal record of their investor holdings and transactions within its platform.

5. TOKEN REPRESENTATION & CUSTODY

5.1 Overview

Investor holdings in the Token are represented within the Tokinvest platform through a controlled framework. Tokens are custodied in individual investor wallets with a VARA regulated custodian under the oversight of Tokinvest unless permitted for withdrawal and self-custody.

This framework enables precise digital record-keeping, custody, and operational functionality

5.2 Upstream Ownership Representation

The Token Issuer maintains their own CAP table of investors in the Token. Tokinvest sits on this CAP table on behalf of all Tokinvest investors.

Tokinvest maintains its own CAP table of Tokinvest investors which represent the aggregate held on the Token Issuer CAP Table.

5.3 Custody Model

Investor holdings are maintained within a platform-controlled custody framework supported by regulated third-party custodians.

As at the date of this document, custody services are provided through Hex Trust.

- All holdings remain within the Tokinvest-controlled environment unless Tokinvest permits transfer
- The Token cannot be withdrawn to external wallets unless Tokinvest permits self-custody

Tokinvest may utilise alternative or additional regulated custody providers where appropriate, subject to regulatory requirements.

5.4 Daily Reconciliation

Tokinvest maintains a 1:1 economic alignment between:

- its aggregate holdings in the Token Issuer CAP Table; and
- the total of investor Tokens recorded on its platform and custodied as described in 5.3 above.

Daily reconciliation processes are performed to ensure consistency between on-chain positions and investor-level records.

5.5 Transferability

Transfers of the Token, where permitted:

- is restricted to the Tokinvest platform or self-custody where approved;
- is restricted to approved and onboarded investors; and
- is subject to compliance and operational controls

Tokens distributed by Tokinvest cannot be transferred to unapproved wallets or platforms.

5.6 Nature of Investor Rights

Investors:

- do not hold direct positions with the Token Issuer or Bond Issuer; and
- hold their interests through Tokinvest's platform and custody framework only.

Investor rights are limited to ownership of the Token as facilitated through Tokinvest.

6. DEALING, PRICING & LIQUIDITY

6.1 Pricing

The Token is offered for sale in the primary market on the Tokinvest platform at the prevailing market price at the time of transaction.

- In the primary market, the Token is priced at the same price as the underlying bond it relates to.
- The underlying bonds are not traded on an exchange and as a result prices tend to be stable
- Tokinvest will update their platform with any change of price immediately upon advice from the Token Issuer

Tokinvest does not determine or influence pricing of the Token in the primary market.

6.2 Liquidity

The Token is offered as part of a programme with a pre-defined total issuance amount. As such, liquidity is subject to:

- remaining outstanding Tokens available from the Token Issuer; and
- any applicable limits, suspensions, or market conditions

Liquidity is not guaranteed, and investors may not be able to purchase Tokens that were previously available on the Tokinvest platform.

6.3 Currency and Foreign Exchange

The Tokens are denominated in EUR or USD, as determined by the underlying bond. Tokinvest may offer purchases in EUR, USD or AED.

Foreign exchange conversion may be required at purchase and redemption and upon receipt of coupon cashflows. In such cases, investors are exposed to fluctuations between currencies, which may impact returns.

The AED is currently pegged to the USD at a stable rate, which reduces but does not eliminate foreign exchange risk between this currency pair.

6.4 Secondary Market

Where possible Tokinvest will aim to provide a secondary trading market where Token holders may offer for sale Tokens previously purchased via the Tokinvest platform. Secondary market availability is subject to:

- market conditions;
- participant demand; and
- regulatory and compliance requirements.

Liquidity in the secondary market is not guaranteed. Furthermore, Tokinvest is under no obligation to provide liquidity, support pricing, or facilitate continuous trading.

6.5 Fees and Charges

Investment in the Token is subject to fees and charges.

Tokinvest Fees

Tokinvest applies the following fees in connection with the Token:

- 2% brokerage fee for primary purchase, payable upon purchase and charged based on the value of Tokens purchased;
- 0.25% transfer fee for OTC secondary market purchases and sales (payable by both Token buyer and seller);
- 0.20% per annum custody fee, calculated daily and charged periodically, in respect of assets held within the platform custody framework; and
- 0.10% transfer fee on transfers within the custody environment (including Hex Trust), where applicable.

Other Costs

Additional costs may arise from:

- banking and payment processing; and
- use of digital settlement rails, where applicable
- details of fees are available through the Tokinvest platform and Terms of Business.

7. KEY RISKS

7.1 Overview

An investment in any financial product involves risk. The value of investments may go up or down, and investors may lose part or all of their invested capital.

This Section provides a summary of key risks associated with accessing the Token through Tokinvest. It does not contain a complete description of all risks.

Investors should review the official documentation issued by the Bond Issuer and Token Issuer for both bond and Token-level risks, and the Risk Disclosure Statement (RDS) for a comprehensive description of platform, custody, operational, and structural risks.

7.2 Market Risk

The performance of the Token depends on the performance of the underlying bond. Risks include:

- changes in interest rates;
- credit risk of the Bond Issuer, Token Issuer and/or Parent; and
- broader market conditions affecting fixed income instruments

Returns are not guaranteed.

7.3 Liquidity Risk

The Tokens are not redeemable upon demand and are only redeemed upon expiry of the underlying bond asset or in the specific circumstances described in Section 4.4 of this whitepaper. Tokinvest does not guarantee a liquid secondary market; As such investors;

- may not be able to realise some or all of their investment until the expiry of the Token; and
- may be subject to wider bid-ask spread in secondary markets where available

7.4 Foreign Exchange Risk

The Tokens are denominated in EUR or USD, while investors may have a base currency of AED or another currency.

Foreign exchange movements may impact such investors by:

- reducing returns; or
- increasing volatility in realised outcomes

Tokinvest does not hedge FX exposure on behalf of investors.

7.5 Platform and Intermediation Risk

Investors access the Token through Tokinvest and do not interact directly with the Token Issuer. As a result:

- investors rely on Tokinvest for execution, custody, and servicing; and
- any disruption to Tokinvest's platform or operations may impact access to the Token.

7.6 Custody Risk

Investor holdings are maintained by Tokinvest within a platform-controlled custody framework supported by VARA licensed third-party custodians. Risks include:

- failure or disruption of custody providers; and
- loss or restriction of access to assets due to operational or security events

7.7 Regulatory Risk

The Token operates within a regulated environment.

Changes in applicable laws or regulatory requirements may:

- affect the availability of the Token;
- restrict investor access; or
- impact the operation of the platform or distribution model

7.8 Technology Risk

Ownership of the Token incorporates digital systems and tokenised record-keeping infrastructure.

Risks include:

- system failures or outages;
- data integrity issues; and
- cybersecurity threats

7.9 Further Information

This summary is not exhaustive. Investors should refer to the Bond Issuer and Token Issuer documentation and the Risk Disclosure Statement (RDS) for a full description of risks.

8. LEGAL STRUCTURE & IMPORTANT DISCLOSURES

8.1 Nature of the ARVA

The Token represents ownership of the economic interest in underlying senior secured bond issued by the Bond Issuer and managed by the Token issuer.

Investor holdings:

- do not constitute direct ownership of the underlying bond;
- are not deposits or guaranteed investments; and
- are subject to the terms of the Token and applicable issuance documentation

8.2 Investor Position

Investors access the Token through Tokinvest and:

- do not hold a direct contractual relationship with the Token Issuer;
- do not appear on the CAP Table at the Issuer level; and
- are represented through Tokinvest's aggregated position

Investors have a contractual relationship with Tokinvest in respect of platform access, execution, and custody.

8.3 Role of Tokinvest

Tokinvest acts as:

- a licensed distributor; and
- the operator of the investor platform

Tokinvest is responsible for;

- onboarding and AML/KYC;
- order aggregation and execution;
- custody integration and record-keeping; and
- investor servicing

Tokinvest does not:

- manage the Token;
- control investment decisions; or
- guarantee performance or returns

8.4 Custody and Control

Investor holdings of the Token are maintained within a platform-controlled custody framework supported by regulated VARA approved third-party custodians.

- Investors do not self-custody assets unless permitted by Tokinvest
- Transfers are restricted to the Tokinvest platform unless self-custody is permitted
- Access and control are subject to platform and regulatory requirements

8.5 No Ownership or Control Rights

Investors:

- do not have legal or beneficial ownership of the underlying bond;
- do not have governance or voting rights; and
- do not participate in Token-level decision-making

8.6 Reliance on Third Parties

The Token depends on multiple parties, including:

- the Token Issuer and Bond Issuer;
- the Parent;
- custody providers; and
- Tokinvest's platform infrastructure

Any failure or disruption involving these parties may impact investor outcomes.

8.7 Insolvency and Structural Considerations

Investors do not hold direct claims against the Token Issuer, the Bond Issuer, or the Parent. In the event of insolvency or operational failure of Tokinvest or any other party:

- investor access to the Token may be delayed, restricted, or suspended;
- recovery of assets will depend on the applicable legal framework, custody arrangements, and the rights of Tokinvest within the distribution chain; and
- outcomes may be uncertain, including the risk of partial or total loss.

Investors should assume that their rights are contractual and subject to applicable law.

8.8 Regulatory Considerations

The Token is distributed within a regulated framework.

However:

- regulatory treatment may vary across jurisdictions; and
- changes in law or regulation may affect availability, transferability, or access

Investors are responsible for complying with applicable local laws.

8.9 No Investment Advice

Tokinvest does not provide financial, legal, or investment advice.

Nothing in this document constitutes a recommendation or suitability assessment.

Investors are responsible for making their own investment decisions.

8.10 Limitation of Liability

To the extent permitted by applicable law:

- Tokinvest is not liable for market performance of the Token; and
- liability is limited to the performance of its operational responsibilities

Nothing excludes liability for fraud, wilful misconduct, or matters that cannot be excluded under law.

8.11 Further Information

This document is a summary of the Token and its distribution through Tokinvest.

Investors must refer to:

- the LRP and Final Terms documentation for Token-level details; and
- the Risk Disclosure Statement (RDS) for a comprehensive description of platform, custody, operational, and structural risks

These documents should be read together before making any investment decision.

APPENDIX A

TOKINVEST OVERVIEW, GOVERNANCE AND REGULATORY STATUS

A.1 Tokinvest DMCC

Tokinvest DMCC is a company incorporated in the United Arab Emirates, with its registered address at Unit No: UT-12-PO-8, DMCC Business Centre, Level 12, Uptown Tower, Dubai, United Arab Emirates.

In relation to the Token described in this whitepaper, Tokinvest acts as:

- a licensed distributor; and
- the operator of the investor platform through which investors access the Token

Tokinvest is not the issuer or manager of the Token.

A.2 Incorporation and Registration

Tokinvest DMCC is registered under DMCC licence number DMCC-928046 and was incorporated on 10 May 2024.

A.3 Regulatory Status

Tokinvest DMCC is licensed by the Dubai Virtual Assets Regulatory Authority ("VARA") as a Broker-Dealer and Issuer under licence number VL/2024/12/004.

In relation to the Token described in this whitepaper, Tokinvest acts solely as a distributor and platform operator.

A.4 Ownership and Senior Management

Tokinvest DMCC (DMCC-928046) is a wholly owned subsidiary of OREHC Holding Limited, a company incorporated and registered in the Abu Dhabi Global Market (ADGM) under registration number 25680.

The current shareholders and senior management includes:

- **Scott Thiel** – Chief Executive Officer
- **Matt Blom** – Chief Strategy Officer
- **Robert Cooper** – Chief Operating Officer
- **James Byrne** – Chief Technology Officer

The senior management team has experience across digital assets, financial markets, regulated financial services, operations, and technology. Responsibility for day-to-day management and strategic oversight rests with this team, subject to Tokinvest's internal governance framework and VARA regulatory oversight.

A.5 Fit and Proper Status

To the best of Tokinvest's knowledge and based on available information at the date of this document:

- no member of its board of directors, senior management, or other significant decision-makers has been convicted of any offence involving dishonesty, fraud, financial crime, money laundering, insider trading, or offences related to companies, banking, or insolvency, whether before the courts of the UAE or any other jurisdiction; and
- no such individuals are subject to ongoing criminal investigations or regulatory enforcement actions

A.6 Governance Framework

Tokinvest DMCC operates under a formal corporate governance framework designed to ensure effective oversight, accountability, and risk management across all regulated activities.

The Board of Directors is responsible for:

- setting strategic direction;
- approving material business and product decisions;
- overseeing risk management and regulatory compliance; and
- supervising senior management.

The Board meets at least quarterly, with decisions taken by majority vote.

The governance arrangements described in this Appendix are intended to support regulatory compliance and internal oversight and do not create contractual rights or obligations enforceable by Tokenholders.

The governance structures, committees, and internal controls described in this Appendix reflect Tokinvest's enterprise governance framework and are subject to ongoing refinement in accordance with regulatory expectations and business needs.

A.7 Committees and Oversight Structure

The Board may delegate specific responsibilities to standing committees or executive forums operating under formal terms of reference, which may include:

- **Risk Committee** – enterprise and product-level risk oversight
- **Listing Committee** – review and approval of new Virtual Asset issuances
- **Compliance & AML Oversight Committee** – regulatory compliance and financial crime controls
- **Technology / Product Committee** – platform integrity, smart contract design, and DLT oversight
- **Cyber Security Committee** – information security, resilience, and incident response

Each committee reports to the Board or relevant executive committee as appropriate.

A.8 New Product Approval

Products made available through the Tokinvest platform are subject to Tokinvest's internal new product approval process.

This process includes structured assessment of:

- strategic alignment;
- legal and regulatory considerations;
- operational readiness;
- custody and settlement arrangements;
- financial crime risks; and
- technology and reputational risks

Approval requirements are determined according to the assessed risk profile of the product.

A.9 Financial Controls and Regulatory Capital

Tokinvest maintains regulatory capital in accordance with VARA requirements, held in a dedicated capital lock-up account with a UAE-authorized bank.

The company:

- maintains segregation between regulatory capital, operational funds, and client money;
- submits periodic financial and capital adequacy reports to VARA; and
- is subject to annual external audit by a UAE-registered audit firm

A.10 Client Money and Asset Safeguarding

Client fiat funds received in connection with subscriptions and redemptions are held in segregated client money accounts with authorised banking institutions.

Tokinvest is not a standalone VARA-regulated custodian. Digital asset custody is provided as an incidental activity to its Broker-Dealer services using:

- VARA-licensed third-party custodians; and/or
- regulated custody technology providers

Tokinvest remains responsible for oversight of these arrangements in accordance with applicable regulatory requirements.

A.11 AML / CFT and Financial Crime Controls

Tokinvest maintains AML/CFT policies and procedures in compliance with:

- VARA Rulebooks;
- UAE Federal Decree-Law No. 20 of 2018; and
- Cabinet Decision No. 10 of 2019.

All investors accessing the Token through Tokinvest are subject to:

- customer due diligence and KYC;
- beneficial ownership verification (where applicable);
- sanctions and adverse media screening; and
- ongoing transaction monitoring

Enhanced due diligence is applied where required. Oversight is performed by Tokinvest's appointed Money Laundering Reporting Officer (MLRO).

A.12 Outsourcing and Third-Party Providers

Tokinvest relies on third-party service providers for certain operational functions, including:

- banking and payment services;
- Virtual Asset custody;
- blockchain infrastructure; and
- technology and security services

All outsourcing arrangements are subject to due diligence, contractual controls, and ongoing oversight. Outsourcing does not relieve Tokinvest of its regulatory responsibilities.

A.13 Conflicts of Interest and Market Conduct

Tokinvest maintains policies and controls to identify, manage, and mitigate conflicts of interest arising from its role as distributor and platform operator.

These include:

- segregation of duties;
- restrictions on proprietary trading;
- governance oversight of principal trading for settlement facilitation only; and
- market surveillance and post-trade review.

Tokinvest does not manage the Token.

A.14 Role in Relation to the Token

In relation to the Token described in this whitepaper, Tokinvest is responsible for:

- investor onboarding and AML/KYC;
- order processing and submission to the Token Issuer;
- client money handling and settlement;
- custody integration and investor record-keeping; and
- investor servicing through its platform

Tokinvest does not:

- issue the Token;
- manage the Token; or
- guarantee investment performance or returns

A.15 Other Key Parties

Other parties involved in the Token include:

- **Token Issuer:** LCL Opportunities 3
- **Bond Issuer:** LCL Opportunities SCS
- **Parent Company:** LynxCap Investments AG
- **Decentral Limited ("Defactor")** provides the technology infrastructure for the tokens.
- **Custodian:** Hex Trust MENA (on behalf of clients of Tokinvest DMCC)

These parties operate within their own defined roles and responsibilities.

Tokinvest is not responsible for functions performed by these parties outside the scope of its role as distributor and platform operator.

A.16 Governance, Risk and Product Approval Flow (Illustrative)

The diagram below provides a high-level, illustrative overview of Tokinvest's governance, risk oversight, and product approval structure as it relates to products made available through the Tokinvest platform.

This diagram is provided for explanatory purposes only and does not form part of the contractual terms applicable to the Token.

APPENDIX B

REGULATORY DISCLOSURES & LEGAL INFORMATION

B.1 Status of this Whitepaper

This whitepaper is a regulated disclosure document prepared by Tokinvest DMCC in accordance with the requirements of the Dubai Virtual Assets Regulatory Authority ("VARA").

This document:

- does not constitute a prospectus under UAE securities legislation;
- does not constitute an offer of securities by Tokinvest; and
- is intended to provide a high-level description of the Token and its distribution through the Tokinvest platform

This whitepaper must be read together with:

- the applicable Risk and Disclosure Statement (RDS);
- the official Token documentation issued by LynxCap and its subsidiaries (including the underlying bond prospectus and key investor information); and
- Tokinvest's Brokerage Terms of Business

B.2 No Investment Advice

This whitepaper is provided for informational and disclosure purposes only.

Tokinvest:

- does not provide investment advice or personalised recommendations;
- does not act as a fiduciary, adviser, or portfolio manager; and
- does not assess the suitability of the Token for individual investors

Investors are responsible for determining whether the Token is appropriate for their own circumstances.

B.3 Eligibility and Jurisdictional Restrictions

Access to the Token is limited to investors who:

- complete Tokinvest's onboarding and AML/KYC requirements; and
- meet applicable eligibility and regulatory requirements

The Token may not be offered or made available in jurisdictions where such distribution would be unlawful.

Tokinvest may:

- restrict or refuse access;
- suspend transactions; or
- impose additional controls

where required to comply with applicable law, regulation, or internal compliance policies.

B.4 Nature of Tokinvest's Role

Tokinvest acts solely as:

- a licensed distributor of the Token; and

- the operator of the investor platform

Tokinvest:

- is not the issuer of the Token;
- does not manage the Token or underlying bond; and
- does not guarantee performance or returns

B.5 Reliance on Third Parties

The Token relies on multiple third parties, including:

- the Token Issuer and Bond Issuer;
- the Parent;
- custody providers; and
- banking and payment partners

Tokinvest is not responsible for the performance or actions of these parties outside the scope of its own role.

B.6 Amendments and Updates

Tokinvest may amend or update this whitepaper in accordance with applicable regulatory requirements. Material updates will be communicated through the Tokinvest platform or other appropriate channels.

B.7 Governing Law and Jurisdiction

Unless otherwise specified in applicable contractual documentation:

- this whitepaper; and
- the contractual relationship between Tokinvest and investors

are governed by English law.

Tokinvest submits to the jurisdiction of the courts of the Dubai International Financial Centre (DIFC), subject to applicable law.

B.8 Hierarchy of Documents

This whitepaper is a summary document.

In the event of any inconsistency between:

- this Whitepaper;
- the Risk and Disclosure Statement;
- the Tokinvest Terms of Business; and
- the official Token Issuer Token documentation

the relevant contractual and Token documentation shall prevail.

B.9 Entirety of Disclosure

This whitepaper should be read together with:

- the Risk and Disclosure Statement (RDS); and
- the official Token Issuer and Bond Issuer documentation

These documents together form the complete disclosure framework for the Token.
