INDEPENDENT PRACTITIONER'S REPORT ON RESERVE ASSETS REPORT IN RELATION TO ZAND AED PAYMENT TOKEN / STABLECOIN ("AEDZ")

To,
The Directors
ZAND TRUST L.L.C S.O.C
Dubai, United Arab Emirates

Purpose of the Report

In accordance with the requirements of Article 22 of the Central Bank of the UAE Payment Token Services Regulation issued under Circular No. 2/2024 dated 07 June 2024, we have been engaged by ZAND TRUST L.L.C S.O.C ("Zand Trust" or the "Company") to perform an independent proof-of-reserve / reserve attestation engagement over management's Reserve Assets Report for Zand AED payment token / stablecoin ("AEDZ") for the period From 01 September 2026 at 09:00 AM GST until 01 October 2026 at 09:00 AM GST (the "Reporting Period").

This report has been prepared with reference to the reserve asset management and safekeeping requirements applicable to payment token issuers and in accordance with the scope agreed under the executed Statement of Work between Zand Trust and AJMS LG.

We have examined the assertions defined by management of the Company in the Reserve Assets Report, which are summarised as follows:

- The Reserve Assets Report refers to the supply of Zand AED payment token / stablecoin ("AEDZ") issued / represented on the Ethereum Network under contract address [0xFC347c996BD66C1d92E2045c80b413ef3fc84A90](https://etherscan.io/address/0xFC347c996BD66C1d92E2045c80b413ef3fc84A90) and on the Solana Network under mint address [BMrgsEdrqfP4EAhiRbK5fFkq8xgQrqDacZrv8R2pG4zG](https://solscan.io/address/BMrgsEdrqfP4EAhiRbK5fFkq8xgQrqDacZrv8R2pG4zG) during the Reporting Period.
- The total AEDZ tokens in circulation as at the closing date and time of the Reporting Period were 806,300,260.48 AEDZ, comprising 416,273,390.48 AEDZ on Ethereum and 390,026,870 AEDZ on Solana.
- The Reserve Assets Report refers to the Company's reserve asset holdings for the Reporting Period, including the comparison of the fair value and amortised cost of the Company's reserve asset holdings by asset type.
- The AEDZ supply in terms of number of tokens, as represented by management in the Reserve Assets Report, does not exceed the eligible reserve assets maintained by the Company for AEDZ redemption obligations.
- The Reserve Assets Report refers to the reserve asset composition, which management confirms is consistent with the applicable reserve requirements and the information provided to AJMS LG for the Reporting Period.

Subject Matter and Criteria

The subject matter of this report is management's assertion that, as of the Report Date and Time, and based on the records and confirmations provided for the Reporting Period, the value of eligible reserve assets held for AEDZ was equal to or greater than the AED fiat face value of AEDZ tokens in circulation, and that the reserve

asset composition was presented in the Reserve Assets Report based on management's records and supporting evidence.

Field	Detail
Token ticker / symbol	AEDZ
Token name	Zand AED
Issuer / reporting entity	ZAND TRUST L.L.C S.O.C
Report date and time	01 October 2026 at 09:00 AM GST
Reporting period	01 September 2026 at 09:00 AM GST until 01 October 2026 at 09:00 AM GST
Blockchain networks in scope	Ethereum and Solana for the current reporting period.
Testing basis	Review of management's Reserve Assets Report and supporting records for the Reporting Period, including selected-date EOD / PRF 7 token supply reconciliation, bank / reserve evidence review, cut-off testing and public blockchain review.
Sample dates tested	01, 03, 08, 16, 22, 28 and 30 September 2026, plus the Report Date and Time
Assurance / engagement basis	International Standard on Assurance Engagements 3000 (Revised) — Assurance Engagements Other than Audits or Reviews of Historical Financial Information ("ISAE 3000 Revised")

Management Responsibilities

Management of the Company is responsible for preparing and presenting the Reserve Assets Report in accordance with the applicable CBUAE requirements and for ensuring the completeness, accuracy and validity of all information included in the Reserve Assets Report.

Management is responsible for the completeness, accuracy and validity of all token supply records, reserve asset records, reserve asset composition schedules, internal reconciliations, supported blockchain information, wallet classification, mint / burn records, bank / custodian records and related explanations provided to AJMS LG.

Management is also responsible for maintaining sufficient eligible reserve assets to support AEDZ tokens in circulation and for ensuring that reserve assets are separately maintained, available for redemption and not subject to undisclosed pledges, blocks, freezes, restrictions, encumbrances, set-off rights or third-party claims.

Management provides its assertions through the signed Reserve Assets Report and related written confirmations, including confirmations on the completeness and accuracy of information provided, official

blockchain identifiers, token supply position, reserve asset position, reserve composition and the absence of undisclosed matters affecting the reserve sufficiency position.

AJMS LG Responsibilities

Our responsibility is to perform the procedures described in this report, based on the evidence made available to us, and to express a conclusion in relation to management's Reserve Assets Report, subject to the scope, procedures, assumptions and limitations described herein.

Our examination was conducted in accordance with the International Standard on Assurance Engagements 3000 (Revised) — Assurance Engagements Other than Audits or Reviews of Historical Financial Information ("ISAE 3000 Revised").

Our work is limited to the proof-of-reserve / reserve attestation scope agreed with Zand Trust. It does not constitute a statutory audit, financial statement audit, legal opinion, smart contract security audit, cybersecurity review, AML/CFT transaction monitoring review, tax review, valuation opinion, or guarantee of future redemption or future reserve sufficiency.

Quality Management

AJMS LG applies policies and procedures designed to support compliance with professional standards, ethical requirements and applicable legal and regulatory requirements relevant to the engagement.

Compliance with Independence and Other Ethical Requirements

We have complied with the relevant independence and ethical requirements applicable to this engagement.

Procedures Performed

The procedures performed in respect of the Reporting Period included the following:

- Obtained and reviewed management's Reserve Assets Report and Zand Trust-provided supporting records for the Reporting Period, including EOD token supply reports, PRF 7 reports and supporting token supply records for the selected sample dates and the Report Date and Time.
- Reviewed management's confirmation of the supported blockchain networks and the official Ethereum contract address and Solana mint address for AEDZ.
- Compared Zand Trust-provided token supply information with public blockchain / explorer evidence from Etherscan and Solscan, where available for the relevant date/time or sample basis.
- Reviewed public blockchain evidence available for AEDZ on Etherscan and Solscan, based on the Ethereum contract address and Solana mint address confirmed by management, including token identity, on-chain supply information and relevant mint / burn information available from the applicable explorer records.
- Reviewed mint and burn movement information, where applicable, and reconciled opening supply, minted tokens, burned tokens and closing supply.
- Obtained reserve account statements, bank / custodian confirmations or equivalent reserve evidence and compared reserve balances to management's reserve schedules.
- Reviewed the reserve asset composition schedule and identified the nature, currency, valuation basis and eligibility of reserve assets included in the reserve sufficiency calculation.
- Considered management confirmations regarding restrictions, pledges, blocks, freezes, encumbrances, set-off rights or other claims over reserve assets.

- Compared eligible reserve assets against the AED fiat face value of AEDZ tokens in circulation as of the selected sample dates and the Report Date and Time.
- Reviewed management explanations for exceptions, reconciling items or limitations identified during the procedures.

Limitations

Our procedures were limited to AEDZ token supply, reserve assets, reserve asset composition and reserve sufficiency matters described in this report. Our assurance on the assertions is based on the records and evidence made available for the Reporting Period and the test checks performed, including selected sample dates and the Report Date and Time. Any activity after the Reporting Period was not considered when testing the assertions described above.

Public blockchain explorers / public chain records are used as external token-side reference evidence to verify AEDZ contract / mint information, token supply and relevant mint / burn activity against management records. Such on-chain evidence is considered together with bank / custodian reserve evidence and management confirmations to assess whether AEDZ tokens in circulation are supported on a 1:1 basis by eligible reserve assets.

Public blockchain explorers do not, by themselves, evidence reserve bank balances, reserve account ownership, reserve asset restrictions, management wallet classification, or the legal availability of reserve assets for redemption. Those matters are assessed based on bank / custodian evidence and management confirmations.

We have not performed an audit of the Company's financial statements. We have not performed any examination of the Company's compliance with laws or regulations other than the reserve asset matters specifically described in this report, nor have we examined the Company's contractual obligations to its clients.

Conclusion

In our opinion, based on the procedures performed and evidence obtained, and subject to the scope, assumptions and limitations described in this report, the assertions used by management of Zand Trust for preparing the Reserve Assets Report are fairly stated for the Reporting Period, in all material respects.

Our conclusion is based on the information and explanations provided to us by the Company, the reserve evidence made available to us, the public blockchain information reviewed, and the procedures performed for providing assurance on the assertions described in this report.

Use, Publication and Integrity of Report

This independent practitioner's report has been prepared for the purpose described above and should be read together with management's Reserve Assets Report included in this document.

Where this document is published for transparency purposes, it should be published in full and without amendment, extraction or selective quotation that may cause the scope, procedures, limitations or conclusion to be misunderstood.

Additional Scope and Liability Limitation

This report has been formulated based on information and explanations supplied by Zand Trust, supporting evidence made available to AJMS LG, and publicly available blockchain information reviewed within the agreed scope.

This report does not provide legal advice, investment advice, tax advice, valuation advice, smart contract assurance, cybersecurity assurance, AML/CFT assurance, or a guarantee of future redemption or future reserve sufficiency.

AJMS LG does not accept responsibility for any alteration, extraction, republication or presentation of this report after issuance that is not consistent with the signed final version.

Subject to the executed engagement terms and applicable law, AJMS LG Management Consulting L.L.C., including its partners, employees and associated entities, shall not be liable for any loss, damage, cost or expense arising from inaccurate, incomplete or misleading information provided by Zand Trust or its management / employees, or from use of this report outside the agreed scope and purpose.

ZAND TRUST L.L.C S.O.C**Reserve Assets Report****From 01 September 2026 at 09:00 AM GST until 01 October 2026 at 09:00 AM GST**

ZAND TRUST L.L.C S.O.C (the “Company”) is responsible for the completeness, accuracy and validity of this Reserve Assets Report for the period From 01 September 2026 at 09:00 AM GST until 01 October 2026 at 09:00 AM GST (the “Reporting Period”).

Management of the Company asserts that, as of the closing date and time of the Reporting Period, being 01 October 2026 at 09:00 AM GST, the fair value and amortised cost of eligible reserve assets held for AEDZ were greater than the AED fiat face value of AEDZ tokens in circulation.

Reserve Asset Assertion Summary

As of 01 October 2026 at 09:00 AM GST, management confirmed total AEDZ tokens in circulation of 806,300,260.48 AEDZ, comprising 416,273,390.48 AEDZ on Ethereum and 390,026,870 AEDZ on Solana.

Management confirmed total eligible reserve assets of AED 806,328,717.78. The fair value and amortised cost of eligible reserve assets were AED 806,328,717.78. Accordingly, eligible reserve assets exceeded the AED fiat face value of AEDZ tokens in circulation by AED 28,457.30.

Reserve Asset Composition

The Company’s total reserve assets as of 01 October 2026 at 09:00 AM GST are comprised of the following:

Reserve Asset Category	Fair Value (in AED)	Amortised Cost (in AED)	Included as Eligible Reserve?
Cash / AED balances	11,782,119.58	11,782,119.58	Yes
Term deposits	690,000,000.00	690,000,000.00	Yes
CBUAE Monetary Bills	104,546,598.20	104,546,598.20	Yes
Less: restricted / blocked / ineligible reserve amounts	0	0	No
Total eligible reserve assets	806,328,717.78	806,328,717.78	Yes

Notes to the Reserve Assets Report

- During the Reporting Period, AEDZ was issued / represented on the Ethereum Network under contract address [0xFC347c996BD66C1d92E2045c80b413ef3fc84A90](#) and on the Solana Network under mint address [BMrgsEdrqfP4EAhiRbK5fFkq8xgQrqDacZrv8R2pG4zG](#). These are the blockchain networks confirmed by management as being in scope for the Reporting Period. Management has advised that Zand Trust may expand the supported blockchain networks over time. Any additional networks will be included in future reports only from the reporting period in which they are confirmed by management and included in AJMS LG’s agreed scope.
- The AEDZ token supply stated in this Reserve Assets Report represents management’s confirmed AEDZ tokens in circulation as of the Report Date and Time. The treatment of treasury, operational, bridge, locked, burn, testing or non-circulating balances, if any, is based on management’s records and confirmations.
- This Reserve Assets Report refers to reserve accounts / custody arrangements maintained by the Company for the purpose of supporting AEDZ redemption obligations.

4. Management confirms that reserve assets are maintained separately from the Company's general operating funds and are intended to support AEDZ tokens in circulation.
5. AEDZ is a Dirham-denominated payment token / stablecoin representing tokenized Emirati Dirhams (AED), redeemable on a 1:1 basis with AED, subject to applicable terms and conditions.
6. Management confirms that the reserve assets included as eligible reserve assets are not subject to undisclosed pledges, blocks, freezes, restrictions, encumbrances, set-off rights or third-party claims as of the Report Date and Time.
7. Management confirms that the reserve asset composition stated above is consistent with the applicable reserve requirements and the information provided to AJMS LG for the Reporting Period.

To the best of the knowledge and belief of the undersigned, the information contained in this Reserve Assets Report as of the Report Date and Time is accurate and complete.
